American Railroad Journal.

Saturday, March 28, 1874.

Stock Exchange and Money Market.

The discussions relative to the financial situation, the volume of currency, and the probable action of the national legislature, have been unusually earnest, both in and out of Congress, during the week. The House of Representatives has decided on $400,000,000 as the limit of the legal tender circulation. Whether the Senate will concur in this action of the popular branch of the National Legislature is yet uncertain. The course of Money in the local market has been rather less favorable for borrowers, in view of the more active inquiry for accommodation, and the increasing calls for currency from the interior. The offerings on bank and private account have been on a somewhat reduced scale. The current quotations have been on the basis of 3@5 per cent on call; and 5½@7 per cent per annum, in the discount line. The U. S. Sub Treasury in this city closed the week with augmented cash reserves, the currency balance having been $38,027,747 or $342,602, more than the preceding week; and the coin board, $55,723,158, or $22,598, more than on the previous return. The City banks, in their last weekly exhibit, indicated a further general reduction in their averages. The City bank exchanges, during the week, were $410,207,171, or a daily average of $68,367,862. The customs revenue of the port, during the week, was $2,507,832 of which $2,377,832 were in coin certificates. The deposits of the City banks show a decrease of $2,247,400; the legal tender notes a decrease of $1,468,200, and the specie reserve of $1,218,000. The banks enlarged their loan and discount average $149,100, and contracted their circulation $3,600. The City banks reported their average of gold last week at a trifle over 26⅝ millions; and their greenback average at $60,184,400. Their deposits stood at $240 991,100. The loan item was about 285⅞ millions. The circulation was less than 26¾ millions.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation $348,751,869.

Government has received $70,985,851 from internal revenue, thus far in the current fiscal year.

The U. S. Treasurer now holds in trust as security for national bank circulation, U. S. bonds to the amount of $392,880,200 and for public deposits, $16,270,200.

Gold has been moderately active. The speculative demand has been somewhat brisker, especially toward the close. The customs drain has been up to a fair average. There has not been much of an export movement. The extremes of the price have been 111⅝@112½, closing at 112⅜ as against 112 on Wednesday of the preceding week. The specie outflow, last week, was $680,332. The imports of specie at this port since Jan. 1, have been $1,096,463, against $597,689 same time last year. The customs demand for Gold last week averaged $417,972 a day. Foreign Exchange has been rather more sought after and generally quoted steady, with Bankers' sixty day bills on London quoted on Wednesday at $4 84¼@$4 85; sight bills on London, at $4 87½@$4 88¼. The week's exports of Domestic Produce have been to the currency value of $5,413,034.

Government had under its control on Wednesday, in the national treasury, a cash balance of $3,250,000; and a coin reserve of $86,500,000, of which $39,500,000 were represented by outstanding coin certificates.

Government securities have been in good demand, especially on investment account, and have been quite strong as to values. U. S. sixes of 1881 closed on Wednesday of this week at 120¼@120½; U. S. Five-Twenties of 1862, 117½@117¾; U. S. Five-Twenties of 1864 at 119½@120; U. S. Five-Twenties of 1865, 120@120½; U. S. Five-Twenties of 1865 consolidated, 119@119⅛; U. S. Five-Twenties of 1867, 119¾@120; U. S. Five-Twenties of 1868, 119⅝@119⅞; U. S. Ten-forties at 114½@114¾; U. S. Fives of 1881, (Funding Loan) 115@115¼; Six per cent. currency Sixes from 117@117½.

State and Railway bonds have been in fair request since our last, at generally steady rates. Central Pacific first mortgage six per cents closed at 94@94½. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 56@56½. Railway and miscellaneous share property has been more active and toward the close, quoted stronger as to price.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,517,103, against $10,997,728 same week last year. The exports of domestic produce are $5,413,034, as against $5,260,047, last year. The exports of Gold and Silver, $680,332, as against $781,774 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,574,744, as against $3,231,640, same week last March.

There has been rather less animation in most kinds of domestic produce, though the cotton movement has been fairly active, and closing more firmly. The cotton receipts of the week past, at all the ports were 67,000 bales; the total since Sep. 1, to date, 3,830,476 bales, as against 2,974,987 last season. The exports of the week, 91,000 bales, and the whole amount of the present crop thus far marketed abroad is 2,030,000 bales, against 1,803,000 bales to date last season. The stock in the ports is now 683,500 against 531,000 bales last year. Breadstuffs and Provisions have been in moderate demand, at irregular prices. Groceries, Wool, Tobacco, Hops, Hemp, Fish, Fruit, Oils and Leather have been less freely dealt in. Hides, Naval Stores and Petroleum were in fair request. The Metal trade has been comparatively dull, the only important sales of iron reported having been of 1,800 tons American Rails on p. t. We now quote: Eglinton Pig Iron at $38@$39; Glengarnock, $39@$41; Coltness, $44; Gartsberrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. Ocean freights have been unusually depressed and rates decidedly lower, on a comparatively limited business.

At the auction sale of Scranton Coal on Wednesday, 60,000 tons were disposed of at $4 50 for steamboat, $5 60 for grate, $4 82½ for egg, $5 22½@$5 30 for stove, and $4 22½@$4 25 for chestnut.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 16½@18; George's Creek Coal, 125@140.

☞ At the election for Directors of the Pennsylvania Railroad Company, held in Philadelphia on the 24th inst., the following-named persons were chosen to serve for the ensuing year: J. Edgar Thomson, Josiah Bacon, Wistar Morris, John M. Kennedy, John Scott of Pittsburg, Alexander J. Derbyshire, Samuel M. Felton, Alexander Biddle, N. Parker Shortridge, and Henry M. Phillips.

BANKING-HOUSE OF FISK & HATCH.
No. 5 NASSAU ST.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which, at present prices, are very desirable for investment.

We are also selling the CENTRAL PACIFIC GOLD SIX PER CENT. LAND BONDS at 85 and accrued interest.

FISK & HATCH.

Pennsylvania Railroad.

The improvements making by the Pennsylvania Railroad Company on the Newark (N. J.) meadows, will afford standing room on the multitude of tracks there for more than three thousand cars, and they are so arranged that freight is sent into New York in the order of its arrival. Ordinarily, freight which arrives first during a busy season is the last delivered; but under the new order of things, this difficulty is avoided. The timber trestle work is 200 by 400 feet, and is reached by an inclined plane 1000 feet long. There is a capacity for the storage of 8000 tons of coal. Engines of trains can be coaled in from one-half to one minute. Already about one million and a half dollars have been spent, and the estimate for the present season's expenditures are $450,000. The entire cost is estimated at about $2,000,000.

The "Pulsometer."

Latterly we have been favored for some reason with a number of inquiries respecting the operation and efficiency of the Pulsometer for mining purposes, and as a steam pump on shipboard. At present we can only say that our impressions of the machine for these purposes are much in its favor; but it is our intention at an early day to make a critical examination of it, its performances and claims to public favor, and we shall report the result in these columns for the benefit of intending purchases of steam pumps and all similar machinery.

Asbestos,

As a building and protective material, is evidently destined to come rapidly into general use and favor. Its cheapness, variety of use, and application; its wonderful resistance to fire, and perfect protection as against water and weather, render it invaluable in the construction of private and public buildings, ships, and indeed in any and every structure and thing likely to be any way exposed to either fire, water or weather. We are in possession of some valuable information regarding the uses and application of Asbestos, which is reserved for a future occasion.

☞ We invite the attention of our readers to the card of Messrs. MILLER & SMITH, of 43 Exchange Place, New York, who are dealers in Steel and Iron Rails, Locomotives, Cars, Railroad Machinery, and all articles appertaining to the building and equiping of railroads. They are also the agents of the well known Dickson Manufacturing Company of Scranton, Pennsylvania.

St. Louis, Iron Mt. and Southern Railway.

The various interests in the St. Louis and Iron Mountain and Cairo and Fulton Railroads, embracing 700 miles, from St. Louis to Fulton, on the frontier of Arkansas, where the line connects by bridge over the Red River, with the Texas Railroads, are about to be consolidated. The stock of the St. Louis and Iron Mountain, proper, $10,000,000 in amount, is to be taken in at 115 per cent, and the stock of the Cairo and Arkansas connections, $16,000,000 in amount, at 60 per cent. And there is to be a reserve of $5,000,000 of the Consolidated Stock of the "St. Louis, Iron Mountain and Southern Railway," (the newly formed corporation,) for future contingencies in equiping the whole line and for such improvements as may be needful for its efficiency and growing business.

Self Lubricating Axle Box.

"Master mechanic" writes us from Chicago, asking what we know about a certain French article in the above line. We saw the invention referred to in the last Fair of the American Institute, but before recommending it unreservedly, shall send our expert to make an exhaustive and reliable investigation into its real merits. Then we shall be prepared to back up what we may say.

☞ The bill passed by the Missouri State Legislature to extend for twenty years the $1,500,000 bonds of that State, advanced to the Hannibal and St. Joseph Railroad Company, has been signed by the Governor, and becomes therefore a law. This relieves the company from embarrassment, and enables it to commence the extension of its road to St. Louis, which will open up connections with all the railroads of Iowa, Wisconsin, Northern Illinois, and Minnesota, and furnish an important trunk line from St. Paul to St. Louis.

☞ The president of the Massachusetts Central Railroad is represented as being very hopeful and confident as to the prospects of that road. He says that the bonds are now being negotiated, and that the negotiations will soon be completed, and the work on the road resumed immediately thereafter. We have heard from other sources that it was expected that the work on the road would be resumed this spring.

☞ The Washington and Ohio Railroad Extension from Hamilton to Purcellville, a distance of four miles, will be opened with public ceremonies, a dinner, speeches, &c., on the 30th inst.

☞ The Ogdensburg and Lake Champlain Railroad Company have declared a semi-annual dividend of $4 per share on the preferred stock, payable April 1.

☞ We learn that surveys are now being made by E. Stratton, C. E., for a railroad from Northampton to Shelburne Falls, designed to connect the Massachusetts Central with the tunnel.

☞ The Governor of California has approved the bill granting the right of way to the Texas Pacific Railroad along the river and bay of San Diego.

☞ Mr. Adolphus Meier has been elected President and Mr. Nicholas Schaeffer Vice President of the Illinois and St. Louis Railroad Company.

St. Louis, Salem and Little Rock Railroad.

At a meeting of the stockholders of this company, held at Steelsville, Crawford County, Mo., on the 12th inst., the following directors were chosen: A. L. Crawford, of Newcastle, Penn.; Wm. L. Scott and Wm. Brewster, of Erie, Penn.; A. J. Crawford, of Terre Haute, Ind., and C. C. Simmons, of St. Louis. At a subsequent meeting of the directors the following officers were elected: A. L. Crawford, President; Wm. L. Scott, Vice President; Wm. Brewster, Secretary and Treasurer; Emmerson L. Foote, Assistant Secretary and Treasurer; J. W. Blanchard of Steelsville, General Superintendent, and G. B. Sankey, Chief Engineer and General Freight Agent.

☞ The Railroad Commissioner of Michigan, after thoroughly investigating the subject in all its bearings, has come to the conclusion that it would be impossible to devise any measure for the regulation of freights that would be of just application to all of the roads, and that even separate rates of tariff on each road would be productive of great injury to the material interests of the State. He therefore asks to be relieved of the responsibility of fixing rates of fare. The reasons given are conclusive, and will be found to exist in Illinois and every other State in the Union.

☞ The managers of the ticket departments of the New York Central, Pennsylvania and Erie Railway Companies agreed to advance the prices of tickets to all Western points to the old figures, an advance on the Chicago fare from $22 to $26; St. Louis, from $20 to 27; Cincinnati, from 15 to $20, and Cleveland, from $11 to $14 25.

The Baltimore and Ohio road continue to sell Cincinnati tickets for $13 50; Chicago (by way of Cincinnati), for $18 50; St. Louis, $21 25; and Omaha, $36.

☞ The Philadelphia and Trenton Railroad Company will pay a quarterly dividend of 2½ per cent on the 10th prox. The United Companies of New Jersey will pay a like quarterly dividend at the same time.

☞ The regular half-yearly dividend of four per cent on the stock of the New York Central and Hudson River Railroad will be paid on the 15th of April.

THE ILLINOIS CENTRAL RAILROAD COMpany offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

NICKEL
AND
SILVER PLAITING,
Bronzing and Coppering
IN ALL STYLES BY
A. W. LADD,
5 Dey St., Room 7, N. Y.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, April 4, 1874.

The Public and the Trunk Line Railroads.

President Thomson, of the Pennsylvania Railroad Company, in submitting to the shareholders the Annual Report of the Directors, takes occasion, under the head of "General remarks," to allude to some of the prominent topics relating to internal transportation, now very widely discussed, more particularly the cost of moving agricultural products to the seaboards, the conditions of canal competition with railroad lines, and the practical bearing of the policy of stock "watering." These observations have great value both from the fact that they are very ably presented, and are besides the testimony of the chief officer of one of the largest transportation corporations in the country, whose ramified lines are spread over the western States, where the burden of the farmers is alleged to be insupportable. The perusal of the Pennsylvania Company's Report will have uncommon interest for the thinking public at large, as well as for the stockholders immediately addressed.

This discussion of two or three topics upon which it was supposed railroad men would be reticent, by the chief of their number, is timely; and the subject has been well presented in the Report before us. It states, for example, in regard to that portion of the freights which constitutes the bulk of the eastward bound, and upon which great stress is laid by the farmers and their representatives:

"A close examination of the accounts of this company will show that its charges for freight upon agricultural products scarcely bear the expenses of transportation, and on many items the charges for transportation are below actual cost, leaving for the conveyance of the aggregate tonnage of agricultural products little or no profit to the railroad company; this is largely due to the irregularity of its movement, and the comparatively small amounts of back-loading obtained, as four-fifths of the cars return empty. The profits of the company from this source are almost wholly derived from the transportation at higher rates of the valuable articles which the sale of these products enables the merchants and farmers to purchase in the East for consumption at home. If the shareholders of the Eastern Trunk Lines relied upon the direct profits from the carriage of agricultural products for dividends they would be disappointed in their expectations."

This testimony is in conformity with other statements which have recently been made public. It is well known that there has lately been a sharp competition between the rival trunk lines for the carriage of breadstuffs and field products. During the past three years this rivalry has been conspicuous in the items of wheat, flour and live stock. It is quite apparent that when the lakes are open, the railroad charges are limited by the water rates. But Mr. Thomson goes further; he shows that the average charges on the Pennsylvania Railroad have fallen from 2.46 cents per ton per mile, in 1864, to 1.41 cents in 1873; so that it is a fact, established by one of the great trunk lines, that the rates of transportation are gradually and steadily being lowered, and that the public are deriving the benefit of every new improvement in railroad operation, and in the growth of the volume of traffic. This statement is corroborated by the Report of the Massachusetts Railroad Commission; whose chairman, an able man, in many respects, destroyed much of the value of his Report, by interweaving a puerile hobby, borrowing the habiliments of Herbert Spearc's Evolution Theory, for application to railroads, where it has no sort of propriety. Nevertheless, the fact ought to be more widely circulated that railroad fares and freights are steadily getting less; that competition is keen enough now to give to the public the smallest advantage which applied science or massed capital can win. On the subject of profits over and above the actual investment of capital, the Report has a few excellent words:

The process of "watering" railway stocks—that is, the increase in the capital stock of the company by the issue of shares unrepresented by actual property—so much complained of by the public, is very unusual. Even the increase of shares made by the New York Central Railroad Company, so frequently alluded to, was made upon the same principles adopted by every merchant if at the end of each year the stock of merchandise he may have had on hand had materially advanced in value, as was the case with the real estate of the company, and the addition to its works paid out of the net profits of the railway."

President Thomson might have gone further. He need not have confined his remarks to the New York Central and his own corporation. In a general way, what is to prevent the owner of a railroad from taking advantage of the rise in value of his species of property, and putting up its price in just the same manner as the owner of a farm, a store or a mill—no matter whether that rise grows out of the natural increase in population and wealth, or through the use of a debased currency; from superior foresight or sagacity, or from any other cause? Nor does it make any difference to the public whether the owners call the cost of a road ten or twenty millions; whether the ownership is split up into ten thousand or twenty thousand pieces. If the road is paying dividends it is because it is fairly earning them; and if it is not, then the practice does neither good nor harm. In other words we must stand on the broad principle that railroad transportation like other pursuits is entitled to all it can earn by the laws of trade.

This reference to the New York Central Company's capital account is a kindly mention of a great rival, or ally; and while true enough, in itself, leaves unnoticed that other great example of diluted capital, the New York and Erie Company, which has never derived the first dollar of benefit from its enormous inflation of shares. The difference in territory, in grades, in management, and in resources, or all combined, account for the different results to the shareholders between these neighboring and interlacing lines; for "stock watering" does not seem to serve both alike.

The application of this remark to the other great trunk line further South is particularly felicitous, and was, no doubt, deliberate. It has been the boast of the Baltimore and Ohio Company that it had accumulated and invested a large surplus out of its earnings, (amounting last year to 29 millions,) and this circumstance has led many persons to inquire why the Maryland line, with its steep grades, sparse population and few connections, should be apparently more productive than its neighbor, in Pennsylvania, whose advantages in grades, population, minerals, and connection were so manifold? Mr. Thomson illuminates this point. The Pennsylvania corporation has been profitable almost from the first year of its operation, and the profits have been regularly divided among its owners; the dividends in the last twenty years having averaged nearly 10 per cent. The Maryland Company, on the other hand, pursued a different course. For the first twenty years it paid next to nothing in dividends. At the outbreak of the war the concern was virtually broken down. Since that period, and especially during the struggle, its profits were large; yet so imperative were the needs of western connecting lines that the managers deemed it best to forego large dividends in order to perfect their system of feeders. The most valuable part of its works, the Washington Branch, has now a competitor in the hands of the Pennsylvania Co. There is, then, no comfort to be drawn from the capital account of the Baltimore Company; and it would not be surprising if the Directors should, at an early day, be asking for authority to issue additional shares for the surplus invested in tributary works and improvements, of which a minute account is kept.

With the statement of President Thomson that

"The facilities for transportation between the East and West are now in excess of the demands of the public, and the construction of any additional avenues for through traffic would, from the causes already stated, rather tend to increase the cost of moving freight than otherwise, and no new avenue could be built at this time that would not greatly exceed, in actual cost of construction, those now in existence in consequence of the advance in price of labor and materials,"

we may agree provisionally. It is doubtful, however, if the present lines, even with all the contemplated improvements to them completed, would long suffice. For a year back they have been sufficient; but by the time new lines could be built there would be business for all. The interchange of commodities between the Mississippi region and the seaboard is merely in its infancy.

On the subject of canals the few words used in the Report:

"Experience seems to have developed the fact that no system of canals can now be worked profitably at their original cost in competition with railways, unless they are located like the Chesapeake and Delaware and Delaware and Raritan canals, connecting navigable rivers, and between great commercial centres,"

are all that are necessary. It is conceded by everybody who has not a "plan," that the age of canals, for long internal transport, has passed. Only in the cases where two long water-ways are to be connected by a short artificial channel, as, for example, across a narrow isthmus, or around some rapids or other obstruction, can canals be made serviceable or profitable.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$1,329,714 83	$1,379,425 71
" freight	3,607,604 90	3,897,461 76
" express	94,868 65	98,851 35
" U. S. mail	77,171 64	77,811 86
" miscellaneous	46,927 69	44,930 59
	$5,156,325 71	$5,497,540 77
Expenses, viz:		
Conducting transp.	$902,508 95	$990,719 27
Motive power	910,273 49	907,508 95
Maintenance of way	861,575 64	869,390 29
" cars	335,214 88	345,663 97
Taxes	128,858 30	121,595 63
General expenses	138,747 01	132,376 76
	$3,277,178 27	$3,376,254 87
Net earnings	$1,879,147 44	$2,121,285 90
Add balance to credit of income account, December 31, 1872		303,773 15
Total to be accounted for		$2,425,059 05
Disbursed as follows:		
Interest on bonds		$333,257 81
Interest on scrip, convertible September 1, 1875		71,410 57
Payments to sinking funds		85,000 00
Rent paid Joliet & Chicago R.R. Co.		137,127 19
Rent paid St. Louis, Jacksonville and Chicago R. R. Co.		240,000 00
Rent paid Louisiana and Missouri River R. R. Co.		138,369 96
Dividends, March and September, 1873, five per cent each		1,135,080 00
Balance December 31, 1873		284,813 52
Total, as above		$2,425,059 05

The gross receipts from traffic were $341,215 06 or 6.62 per cent, and the net receipts $242,138 46 or 12.88 per cent more than during the preceding year. The operating expenses (exclusive of taxes) amount to 59.20 per cent of gross receipts; including taxes, 71.41 per cent. During the year 1872, the operating expenses were 61 per cent and 63.6 per cent respectively.

Eight hundred and twenty-nine thousand eight hundred and seventy-six passengers were transported during the year, an increase of 7.43 per cent over the number during the preceding year. The proportion between through and local passengers being 5.62 per cent of the former, to 94.38 per cent of the latter.

The gross receipts from passenger traffic show an increase of 3.74 per cent over those of 1872. The average fare paid per passenger was one dollar and sixty-six cents, being six cents less than the average of the preceding year.

The aggregate tonnage of freight transported is 3,284,880,748 lbs., an increase over that during 1872 of 2.48 per cent.

The proportion between through and local freight being 9.3 per cent of the former to 90.7 per cent of the latter.

The coal traffic of the year, which is included in the above statement, amounts to 549,245,350 lbs. tons; an increase compared with that of the preceding year of 14.52 per cent.

Coal is mined at about one-half of all the stations upon the main line between Wilmington and E. St. Louis—a distance of 227 miles—and also at many stations upon your branch lines.

The increase of gross receipts from freight traffic amounts to about 8 per cent compared with that of 1872.

Your property has been in all departments, maintained in first class condition, and is fully equal to that of the best western railways; 5,294 tons of steel rails, 1,210 tons of iron rails, 140 tons of track spikes, 257 tons splice bars and bolts, and 175,000 cross-ties have been used in repairs of track.

Three miles and three-fifths of a mile of additional side tracks and fifteen and one-half miles of second or double tracks have been constructed during the year.

The necessary grading for completing a continuous double main track between Chicago and Joliet has been completed.

Grading is in progress for a second track from Joliet to Wilmington, including the reduction of the heavy grades on that section of the road.

That work will be completed by the 1st of May and thereafter trains between Odell and Chicago when moving north (in the direction of the heaviest traffic) will not ascend any inclination exceeding 24 feet to the mile, and in going south none exceeding 36 feet to the mile—at present several grades exceeding 50 feet to the mile are encountered. This important improvement will enable engines to move much larger trains and greatly reduce the cost of operating upon that part of your lines on which there is the greatest accumulation of traffic.

The continued substitution of steel in place of iron rails, as the latter become worn out, is deemed no longer an experiment. It is fully demonstrated to be true economy. We have, at the close of the year, one hundred and six miles of single main tracks and sixteen miles of double tracks laid with steel rails. Upon the 649.1 miles of railway operated there is an aggregate of 46 miles of double track and in addition 96.6 miles of side tracks. The double track is in three sections upon the main line between Odell and Chicago. It is important that it should be made continuous so as to complete a double track railway for the entire distance of 82 miles where a very heavy traffic renders it necessary, and it is hoped that in the course of the present year that will be accomplished.

At the close of the year the number of locomotives and cars upon your lines was as follows: Locomotives, 155; Pullman Palace sleeping cars 12, dining cars 5, passenger coaches 58, baggage cars 4, baggage and mail 9, baggage and express 4, express cars 7, house freight cars 1,614, combination (house and stock cars) 151, stock cars 397, platform cars 764, drovers' cars 23, tool and wrecking cars 6, paymaster's car 1. Whole number of cars 3,038.

The number of miles run by locomotives during the year was 3,983,560—an increase of 81,458 miles, or 2.1 per cent over the number of miles run in 1872.

The cost per mile run compared with that in 1872, is as follows:

	1872.	1873.
Repairs	6.12 cents.	6.08 cents.
Wages	6.59 cents.	6.48 cents.
Fuel	7.34 cents.	7.08 cents.
Oil and waste	0.86 cents.	0.82 cents.
Cleaning, etc	1.20 cents.	1.06 cents.
Total	22.11 cents.	21.52 cents.

Showing a reduction of 5.9 mills per mile.

The amount of coal consumed was 94,331 tons or about 300 tons per day. The amount of wood consumed was 12,933 cords or 41 cords per day. The distance run by engines per ton of coal averages 37.66 miles, and per cord of wood, 40 miles.

Experience in operating the "leased lines" during the past year, has demonstrated the following results:

The Joliet and Chicago Company is paid a fixed rental, and no separate account of the earnings of that line has been kept, but the lease is known to to be a profitable one to your company. The net earnings from the traffic of the St. Louis, Jacksonville and Chicago line during the year amounted to $399,429 50 from which, after deducting the amount of rent paid ($240,000), there remains a net gain to your company of $159,429 50. A similar computation based upon the traffic and rent paid for the use of the Louisiana and Missouri River Road, shows a loss of $51,174 29.

The necessity for the construction of a bridge over the Mississippi River to connect your lines at Louisiana, was shown in our last annual report. To accomplish that object, the Mississippi River Bridge Company was duly organized, and after some delay occasioned by the opposition of the

"steamboat interest," the plans submitted by the company were approved by the Secretary of War as required by law, and the company was at liberty to proceed with the work. The construction of the bridge was commenced on the 30th day of June last, and completed so as to admit of its use for the passage of trains on the 24th of December. The entire work having been accomplished in less than six months at a cost, including dykes, approaches, etc., of $685,000.

The bridge is 2,042 feet in length. The superstructure is of wrought iron, and rests upon piers and abutments of masonry of the most substantial character.

The approaches consist of solid embankments of earth, protected by Rip Rap; their aggregate length is 5,000 feet. The width of the river at the bridge line is (when within its banks) 3,900 feet. The draw-section of the bridge is 446 feet in length, and in conformity to the Act of Congress, is arranged to provide two openings, each 200 feet in the clear for the passage of boats. The entire capital stock of the Mississippi River Bridge Company is owned by and held in trust for your company, and the management of the property is wholly under your control.

The General Assembly of the State of Illinois, at its last session, passed an act prescribing rules for the operation of railways, which were designed as remedies for supposed evils relative to railway management, and to enhance and secure the interest of shippers and producers, without, as we think, due regard to your rights. The complaints against Railway Companies have been, in most instances, without just foundation, but, nevertheless, a large number of persons believed otherwise, and that supposed grievances would be remedied by an observance of the rules prescribed by the act. While the act referred to is manifestly unconstitutional, and will doubtless be so declared by the courts; still we thought that a better understanding might be had relative to proper relations between railways and their patrons, by making the experiment of a fair trial of the rules prescribed by the act. We were satisfied that the interest of all parties would suffer therefrom in some degree, but we deemed it important that the result of a fair trial should be known to the public. So far as the act prescribes a rule for fixing rates to be charged for transportation, it proceeds upon the principle that no account shall be taken of relative supply and demand; cost of labor, materials, and the many elements that ever have and ever will control prices in commercial and business transactions. It is true that the act provides that certain railway commissioners, appointed by the Governor of the State, "shall fix reasonable maximum rates of charges." But however competent the commissioners may be to perform the difficult task of fixing reasonable rates to meet all of the changing circumstances connected with the traffic upon all the roads in the State, the act itself deprives them of the requisite discretion to perform it, by fixing an inflexible rule, of the character stated, by which they must be governed. It is perhaps unnecessary to add that the results of the experiment are not satisfactory to the public. With no discretion in making rates to meet competition, which in most cases would have secured considerable traffic at a moderate rate of profit to the company and great benefit to the merchants and business men of Chicago, St. Louis and the large market towns of Illinois, we were compelled to allow competing lines to take the products of the country in many cases directly to eastern markets, which they were able to do by reason of having only a portion of their several lines within the State of Illinois, and being therefore enabled to divide their through rates so as to have the portion nominally charged in that State conform to the requirements of its legislation.

This loss of traffic to the railways, whose lines are wholly in Illinois, and the loss to merchants and others residing in the State, is probably not so apparent in its full extent to any other class as to those engaged in transportation, for the reason that the general increase of business has been more than equal to it. It is by reason of this general increase of traffic at non-competing points that we are able to report larger earnings than during the preceding year.

It will be observed that the loss of the traffic referred to has resulted in a larger per centage of net earnings than was realized in 1872; the profit upon the remaining traffic being nearly uniform, and, of course, at a rate above what would have been the average if business had been obtained as heretofore from competing points at such smaller profits as could have been realized.

It has heretofore been the policy of this company to encourage all local business enterprises by making concessions in rates for transportation when necessary to develope them.

The result of that policy is seen in the fact that for several years past more than nine-tenths of all our traffic has been local, and its increase has been rapid. Since the 1st of July last, under the operation of the rules prescribed, no concessions could be made, although by reason of the panic, in many cases, the necessity for them had never at any time before been so great.

The present popular outcry against railways in the west is mainly based upon the erroneous supposition that prices charged for transportation are unreasonably high; not in exceptional cases only, but universally. If it be true that the rates charged do not produce net profits equal to the lawful rate of interest for money loaned, taking as the basis for calculation, actual cost we presume it will be conceded by all that the charges as a whole, are not too high; and if it be also true that the net profits upon the line producing the best results, do not exceed ten per cent, we think it must be admitted that the charges upon that line are not, as a whole unreasonably high.

The true interest of a railway company, and that of its patrons, are inseparable. Neither party can promote its own business welfare by treating the other unfairly or unjustly—each can best secure its own interests by dealing liberally and justly. The use of railways in Illinois cannot be dispensed with, and it is equally true that they cannot be made to render satisfactory service to the public very long unless the owners are permitted to reap fair and reasonable profits. The increase of wealth in Illinois has been largely promoted by the introduction and operation of railways, and it is but just that railway shareholders who have furnished capital for their construction should participate in the general welfare. When the people of the country learn, as they will ere long, that they have been deceived by political demagogues, they will acknowledge and accept these facts as the basis for proper relations between themselves and the railways, and will no longer attempt by unwise and impracticable legislation to deprive the owners of railway property of a reasonable discretion in its management. The operations of your company have been conducted during the past year under many disadvantageous circumstances, but we trust when they are duly considered, the result will not be found unsatisfactory to the shareholders.

GENERAL BALANCES, December 31st, 1873.

Cost of road and equipment		$16,506,942 86
Machinery and tools		190,544 26

President.—T. B. BLACKSTONE.

Directors.—T. B. Blackstone, John B. Drake, D. Willis James—term of service expires first Monday in April, 1874. John F. Slater, John A. Stewart, George Strant—term of service expires first Monday in April, 1875. John Crerar, Lorenzo Blackstone, John J. Mitchell—term of service expires first Monday in April, 1876.

Secretary and Treasurer.—W. M. LARRABEE.

General Superintendent.—J. C. MCMULLIN.

☞ Mr. D. F. Whitcomb has been appointed Superintendent of the Elizabethtown and Paducah Railroad, with office at Louisville, Ky.

Philadelphia and Reading Railroad.

We gave in our issue of Jan. 24, an abstract of the "Transportation and Income Account" of this company for the fiscal year ending November 30, 1873, together with the Report of the Managers. Below will be found several important tables referring to the years 1872 and 1873, including the "General Account." We also append a statement of the Cost, Earnings, Dividends, etc., etc., since the completion of the road in 1842–'43:

	1872.	1873.	1872.	1873.	1872.	1873.
	Miles of Track.		M. of Sidings.		—Total.—	
Philadelphia & Reading R. R.	196.8	196.8	143.0	149.9	339.8	346.7

The Coal Trade of the United States.

We present our readers with the official returns of Anthracite Coal mined in the United States in the year 1873, together with the quantity sent to market; also the official quantity of Bituminous Coal moved towards the seabord. These returns embrace all the Bituminous Coal sent towards the Atlantic seaboard, except the quantity that reached Richmond, Va, which was not very large. The product of the other Bituminous regions in the United States we have to estimate, but from the data we have we can approximate very nearly to the actual quantity produced.

In 1872 the quantity of Anthracite Coal sent to market was 18,932 265 tons, and the estimated quantity consumed in the Coal Regions were put at 3,110,000, making the whole quantity mined 22,032,265 tons, as follows:

	Sent to market. Official.	Home Consumption. Estimated.	Total Production.
Schuylkill	4,135,908	875,000	5,010,908
Northumberland	1,221,327	170,000	1,391 327
Columbia	319,220	25,000	344,220
Dauphin	450,328	30,000	480,328
Wyoming	9 194,808	1,500,000	10,694,808
Lehigh	3,610,674	500,000	4,110,674
	18,932,265	3,100,000	22,032,265

The whole quantity mined and sent to market, together with the estimated quantity consumed in the Coal Regions, in 1873, we give as follows:

	Sent to market. Official.	Home consumption. Estimated.	Total Production.
Schuylkill	4,252,043	880,000	5,132,043
Northumberland	1,234 070	170,000	1,404,070
Columbia	358,741	25,000	383,741
Dauphin	449,915	30,000	479,915
Wyoming	10,047,241	1,675,000	11,722,241
Lehigh	3,243,168	463,000	3,706,168
	18,585,178	3,243 000	22,828,178

The total supply of Anthracite Coal sent to market in 1872 and 1873, sums up as follows:

	Tons.
In 1873	19,585,178
In 1872	18,932,265
Increase in 1873	652,913

The whole production, including the consumption in the regions, foot up as follows:

	Tons.
In 1873	22,828 178
In 1872	22,032,265
Increase in production in 1873	795,913

The whole supply of Bituminous Coal embraced in our tables, and moved toward the seaboard was:

	Tons.
In 1873	5,515,784
In 1872	5,231,998
Increase in 1873	283,786

The above increase of 283,786 tons Bituminous Coal, added to the increase of 652,913 tons Anthracite, makes the total increase for the year 936,699 tons.

The following table gives the official quantity of coal mined in the different Coal Regions, with the production of each separated and credited to each region. The quantity under the head of the Schuylkill Region, embraces all the coal sent from Schuylkill County, and also the quantity mined in Columbia and Northumberland counties sent to market via the Schuylkill Valley; and all the coal from the Schuylkill and Wyoming Regions, sent to market via the Lehigh Valley is also reported and credited to the proper regions:

OFFICIAL TABULAR STATEMENT.

Of the whole product of Anthracite Coal, and that portion of Bituminous Coal moved toward the seaboard in 1873, compared with 1872:

		24,164,263
Total increase in 1873		936,699

* The total coal tonnage of the Philadelphia and Reading Railroad in 1873 was 6,546,553, including 665,223 tons Anthracite and 323,254 tons Bituminous coal received at Harrisburg and other points.

† The total coal tonnage of the Lehigh Valley Railroad in 1873, was 4,144,340, including 28,026 tons of Bituminous coal.

‡ The total coal tonnage of the Lehigh and Susquehanna Railroad was in 1873, 3,089,698 tons. The balance is reported by other companies.

§ Net tons—all the other are gross tons.

¶ The total coal tonnage of the Pennsylvania Railroad was 4,527,501 tons, of which 1,173,960 were Anthracite, and 3,353,541 Bituminous. The balance is embraced in other reports.

The supply of Anthracite Coal sent to market in 1872 and 1873 was furnished as follows:

	1872.	1873.
Schuylkill	4,135,908	4,252,043
Northumberland	1,221,827	1,234,070
Columbia	319,220	358,741
Lykens Valley	450,328	449,915
Wyoming	9 194,808	10,047,241
Lehigh	3,610,674	3,243,168
	18,932,265	19,585,178
		18,932,265
		652,913

Below we give the quantities of coal sent to market since 1860, from the three principal regions, the Schuylkill, the Wyoming, and the Lehigh. The coal credited to the Lehigh is the quantity mined in what is termed the Lehigh District. The Schuylkill embraces all the coal sent to market from Schuylkill County, and also that mined in Northumberland and Columbia counties sent to market via the Schuylkill Valley:

Year.	Schuylkill.	Wyoming.	Lehigh.
1860	3,2.0,516	2,941,817	1,821,774
1861	2,607.489	3,055,140	1,738,377
1862	2,890,598	1,145,770	1,851,054
1863	3,443,265	3,759,610	1,984,713
1864	3,642,218	3,960,836	2,054,699
1865	3,735,802	3,256,658	1,822,585
1866	4,633.487	3,736,616	2,128 867
1867	4,334,820	5,328,322	2,062,446
1868	4,414,856	5,990,813	2,507,582
1869	7,718,960	6,068,865	1,929,088
1870	3 720,103	7,559 902	1,040 303
1871	5,124,780	6,481,171	2,249,857
1872	5,106,451	9,194,808	3,610,674
1873	5,209 156	10,047,241	3,243,168

The above shows the current of trade. In 1866 the Schuylkill furnished more coal than the Wyoming Region did, but since then the trade of the Schuylkill Region has increased only 575,669 tons, while the trade from the Lehigh has increased 1,114,201 tons, and the Wyoming has increased 6,610,675 tons, having more than trebled in the intervening period.—*Pottsville Miners' Journal.*

Allegheny Valley Railroad.

The eastern extension of the Allegheny Valley Railroad, known as the Low Grade Railroad, was completed on the 24th ult. This connects the Allegheny Valley Railroad with the Philadelphia and Erie Railroad. The line will be opened for business on May 1. In reference to this enterprise, the Pittsburg *Chronicle* of March 28th says:

The opening of the Low Grade Railroad, expected to take place on May 1st, next, will mark an era in the history of Pittsburg Railroad enterprises. On the 17th of March, 1854, ground was broken at Lawrenceville for the Allegheny Valley Railroad by the late Governor Johnston, and yesterday the last spike was driven. This enterprise has had more ups and downs than perhaps any road in the country. Its first purpose, to make a broad gauge track to connect with the New York and Erie, has been almost lost sight of, in the marvellous origin and growth of the Petroleum business. Numerous railroads now cross that region, besides the other novel device, so entirely American, the Pipe lines, which attend to an important part of the transportation problem as applied to oil. It took twenty years of hard work, and no small amount of skill, faith and engineering of all sorts, to carry forward the enterprise. The Valley Road is not, as was originally intended, a competitor of the Pennsylvania, on the contrary, the good luck that has attended the latter organization, is no where more conspicuously shown than in this instance; for instead of being a rival, the Valley road is an important adjunct of the Central. As soon as the Bennett Branch is thrown open for business, it will be very largely used for the carrying of heavy freight between tide water and the West, and *vice versa*. The grades are exceedingly, nay surprisingly, favorable.

Leaving the Allegheny river at the mouth of Redbank, sixty four miles above Pittsburg, the grade is only sixteen feet to the mile eastwardly, with the exception of the summit sections, of about three miles in length, where it is thirty five feet per mile. The tunnel is less than two thousand feet long. The Low Grade Railroad is one hundred and nine miles in length, and opens a region of country for Pittsburg enterprise, mercantile as well as mining and manufacturing, destined to be of great importance. Vast stores of lumber, iron ore, coal, and other sources of wealth can now be reached, and what is of no small importance, in an immediate way, is that our mercantile community may soon enjoy a considerable advantage in a reduction in freight charges from and to, the East.

Pittsburgh's importance as a commercial point is rising, her merchants are slowly regaining the importance this city once held as a wholesale mart. With the firm foundation, always of first importance, of a large and substantial home retail trade, and far reaching river routes, Pittsburg has now a railroad system that may be considered complete. The rich regions of Western Pennsylvania, and of Eastern Ohio, portions of West Virginia and a corner of Maryland, are already tributary to her. The solid wealth created by honest labor at oil wells, in coal mines, and furnaces, and rolling mills is at this point converted into the thousand articles of merchandise demanded by the necessities, comfort and enjoyment of three or four millions of people. An extending area may still further be attracted to purchase all these things here, since our merchants can sell them as cheap as anybody. And for this consideration, primarily, we tender our thanks to Col. William Phillips and his co laborers in their life effort to create a new and vital artery of trade for the Iron City.

Texas Railroad.

C. C. FULTON, Esq., Editor of the Baltimore *American*, in a letter to his paper dated Fulton, Texas, March 10, 1874, says:

The State has now two lines of direct communication with the North and East. A little over a year ago the only route was around by the Gulf to New Orleans, requiring so much time and trouble to get out of or into the State that the great Southwest was practically as far away from the Union as Europe, and one made as much preparation to go from St. Louis to Galveston as he would to go on a journey across the Atlantic. Now he can start from St. Louis at 10 o'clock one morning and land in Galveston the next afternoon at 4 o'clock, and travel all the way in a magnificent Pullman Palace Sleeping and drawing room coach. I came over the newly opened route by way of the Iron Mountain Road, and found it excellent and prompt in every respect. The International and Great Northern Railroad, which forms the Texas Division of the Iron Mountain route, is admitted by all to be the best equipped, smoothest and cleverest managed railroad in Texas, and, I think, will vie, in every respect, with the finest roads in the North and East. It runs daily a magnificent Pullman coach through to St. Louis. These coaches are bran new and are fac similes of those which the Pullman Company made especially for display at the Vienna Exposition. This line is 135 miles shorter than the other, and makes the time through to Houston and Galveston twelve hours sooner.

The Texas Central Road runs from Houston to the northern border of the State, where it connects with the Missouri, Kansas, and Texas Road, which reaches to St. Louis, and has convenient connections with the great Northwest.

The only means of rail communication between this city and Galveston is the Houston, Henderson and Galveston Railroad, fifty miles in length, and it has all that it can do to forward the accumulations of passengers and freight which the International and Great Northern and the Houston and Texas Central Roads bring to this place from the North. There is also a line of steamers running down the bayou to Galveston, which do a splendid business.

There is a road in course of building between Houston and San Antonio—the beautiful and ancient city, the metropolis of Southwestern Texas—which will be finished in the course of the year.

The Texas and Pacific road is at present in operation between Shreveport and Dallas, where it is to cross the Texas Central, and will shortly be finished to Forth Worth, thirty miles further west. It also has a northeastern branch from Longview to Texarkana, a new and bright little city on the border line between Texas and Arkansas. Also a line running through the northern portion of the State to Sherman, where it forms another junction with the Central.

These lines constitute the whole of the completed railroads of Texas, but they permeate the richer portions of the State and afford an outlet for the cotton and the cattle and the sugar, the principal products of Texas.

☞ The death of William H. Petit, of the firm of Wm. H. Petit & Pike of 72 Wall street, creates an appreciable vacancy among the young business men of this city, of a class from among whom none can be spared without regret. Mr. Petit has been for some eight or nine years past engaged in the iron business, and had gained deserved reputation as a man of industry, energy and the highest principles of integrity and honor. He will be alike missed from the social circles of Brooklyn and the commercial circles of New York.

☞ The opening of the extension of the Washington and Ohio Railroad from Hamilton to Purcellville, Va., a distance of four miles, took place on Tuesday, the 31st ult.

THE WHARTON

Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line,

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

FOUNDRY FACINGS & SUPPLIES
OF ALL KINDS.
Bituminous Coal, Sea Coal, Lehigh, Mineral, Charcoal, Black Lead, &c., &c.
Also Selves, Brushes, Molders' Tools, and all articles required for foundry use.
BOYD & PEASE,
Manufacturers,
508, 520 & 528 East 18th St.,
NEW YORK.

To Banks and Bankers.

The great number of frauds committed by raising the amounts of checks and other vouchers of value by removing the original writing and filling in larger sums, has suggested the necessity of some means of preventing such consequences.

THE NATIONAL SAFETY PAPER has been thoroughly tested by eminent chemists and experts, and pronounced

A Perfect Security Against Fraudulent Alterations.

For Checks, Drafts, Notes, Exchanges, Certificates of Deposit, Letters of Credit, Bonds, Legal Documents, and all written evidences of value, this invention affords a protection that cannot be overestimated.

This paper is manufactured only by

CAMPBELL, HALL & CO.,
110 & 112 Nassau St., N. Y.

For sale by all the leading Stationers.

RIEHLE BROS.,
650 North Ninth St., Philadelphia,
New York Store, 93 Liberty Street,
Pittsburg Store, 56 Wood Street.
LATEST IMPROVED STANDARD.

Our Patented Double Beam Iron Lever Rail Road Track Scale acknowledged the BEST.
MAKERS of the NEW TESTING MACHINE.

Internal Seaboard Navigation.

A note appended to the Annual Report of the Pennsylvania Railroad Company—which was published by us entire in our last issue—states a fact which very few would have thought existed. It is that--

"The tonnage delivered by the Delaware and Raritan canal into the Raritan river exceeds that delivered by the Erie canal into the Hudson river, and equals that of the foreign trade of New York, both in American and foreign vessels, passing out of Sandy Hook."

The Philadelphia *North American* comments upon this as a fresh illustration of the vast extent of the domestic commerce of the republic. It is but a single line of transit, but its importance lies in its being a direct water route from Philadelphia to Newark and New York. No debt is piled up by any State government to enlarge this work. Yet it delivers in the Raritan river a tonnage equal to the foreign trade of New York. The port of Philadelphia, however, has other lines in addition which constitute it an emporium of lines of internal navigation, such as the Chesapeake and Delaware canal and its southern connections, the Schuylkill Navigation and its connections, the Delaware Division canal and the Lehigh Navigation. Philadelphia thus has a great domestic trade, which she has cherished and developed in contradistinction to New York's foreign trade.

Commendable Action of Gov. Hartranft.

The publication in the daily papers, of the full correspondence between Gov. Hartranft and the local authorities, in that part of the State of Pennsylvania crossed by the Erie Railway, discloses a piece of honesty, courage and efficiency, in an Executive Chair, which cannot be too highly commended, in these days when so many office seekers are pandering to the passions of the mob. The whole country owes to Pennsylvania a debt of gratitude for being so prompt in laying down the law, and the true course of action in regard to combinations of employes to obstruct the business of railroad companies. It is no sufficient excuse for the men at Susquehanna to say that their pay has been wrongfully withheld from them. They have other, and peaceful, remedies against the company. *Prima facie*, it is for the interest of all railroad corporations to keep their employes well paid up; and we are at a loss to account for this neglect on the part of the Erie Company, which is seeking to borrow money on the strength of the earning-power of the property. We suspect that this has been a bad season for this corporation, as well as for some others. But it is especially fortunate for this company that their mutinous workmen chose the territory of Pennsylvania for their exploits. We fear that New York and New Jersey Executives would not have been so prompt to protect a corporation so essentially foreign. Pennsylvania will have her reward. The expense and trouble she has been put to in this matter, will save her much trouble and money hereafter.

It would seem that the sheriff of the county was anxious to do his duty, on the one hand, and to preserve the peace by conceding something to the strikers, on the other; and it would seem that some unauthorized committee (composed most likely of hired lawyers, or office seekers) telegraphed to the Governor protesting against the employment of the military against their fellow-townsmen at the behest of a railroad corporation. Gov. Hartranft's reply is admirable, and completely covers the issue. After expressing his sympathy with the strikers in their failure to get their pay, he said:

"But, as the Chief Executive of this State, I cannot allow creditors, however meritorious their claims may be, to forcibly seize property of their debtors, and hold it without due process of law. Much less can I allow them to take and hold illegal possession of a great highway, and to punish the innocent public, either as passengers or transporters, for the default of a corporation with which they have no concern. Whenever the laws of this Commonwealth shall provide that the employes of a railroad may suspend all traffic upon it until their wages are paid, I will acquiesce, but I cannot do so while the law refuses to contemplate any such remedy. My duty is not to make the laws or to criticise them, but to execute them, and that duty I must discharge without fear or favor."

At the same time there were persons near the scene telegraphing to the New York papers that "the law was on the side of the strikers." It is impossible to resist the conviction that there are conspirators against the Erie Company fomenting mischief, for the purposes of Stock speculation. There should be some law to reach the cunning plotters, as well as the ignorant tools whom they use.

Arkansas Railroad Aid Bonds.

A letter from Gov. Baxter, of Arkansas, is published, in which he says that, upon full investigation, he is satisfied that neither he nor his predecessors had any authority to issue any railroad aid bonds in the name of the State, the provisions of the constitution not having been regarded in the act of the Legislature authorizing them. The question must, of course, be decided by the courts The Governor, says:

'Though the amount of the bonds is large, and the loss to the holders would seem to be serious, it must not be forgotten that, owing to their doubtful validity, and other considerations, they have always been at a very heavy discount, and that their present value in market is nominal. But, if it should transpire that these bonds have any legal validity, they will be paid, although the people have received little consideration for them, and the present holders obtained them at merely nominal prices on a speculative venture."

☞ According to the *Planter's Gazette* the Republic of Costa Rica contains many elements of future prosperity. Its chief requirements are labor and railways, both of which are being gradually provided. A line now under construction between the capital, San Jose, and Port Limon, on the Atlantic, has already made considerable progress. Out of the total length of 114 miles about 40 are finished, 24 ready for rails, 15 under construction, and 35 untouched. The summit of the line is Cartago, 5,000 feet above the sea, to which trains now run.

DREDGING MACHINES AND SCOWS

FOR SALE.

One (Osgood Pattern) Second Hand. Price $10,000.

One, Almost New. Price $22 000.

Two Large Dumping Scows, $3,500 Each.

Apply to

A W. LADD,

The Self-Lighting Kerosene Lamp!

LIGHTS YOUR LAMP IN AN INSTANT!

No Removing the Chimney!

NO ELECTRICITY!

No Lucifer Matches!

Thousands View it with Perfect Admiration.

No more Houses, Stores or Railway Trains set afire by the Carelessness of Matches.

There are few inventions which spring into such sudden and universal popularity upon the first introduction as was achieved at once by this

Self-Lighting Lamp.

This valuable patent has nearly 17 years to run. You can at once see the advantage of owning and controlling the

EXCLUSIVE RIGHT OF MANUFACTURE

and sale of these goods in a single County in this densely populated State, or indeed any other State.

A SELF-LIGHTING KEROSENE LAMP!
A SELF-LIGHTING GAS ATTACHMENT!!
A SELF-LIGHTING HAND LANTERN!!!
A SELF-LIGHTING TORCH!!!!

We feel confident in our ability to offer to enterprising men of moderate capital, in the purchase of Territory, such inducements that they will have no cause to doubt the results.

IT SELLS AT SIGHT EVERYWHERE.

Just the thing long needed for **Railroad Cars** and Officials, **Depots, Stores, Dwelling Houses** and **Factories.** Every such place will have them at once.

Thousands of these Self-Lighting Burners have been sold during the past season in the New England States alone. What better proof need we ask for its merit and growing popularity?

WE ASSERT WITHOUT HESITATION

They are the best selling and most money-making inventions ever put on this or any other market for sale.

The price is within the reach of all. We have goods now ready for delivery, and any man can commence today to make a small fortune in the sale of these goods alone.

Call and see it in practical operation.

Or enclose one dollar for a sample Burner.

One dollar for Gas Attachment.

Two dollars for a Torch, two dollars and a half for a Self Lighting Lamp, and they will be sent with our terms for territory to any part of the country.

OFFICE AND SALESROOM OF

"The Universal Self-Lighting Lamp Co."

No. 563 Broadway, New York.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, April 4, 1874.

Stock Exchange and Money Market.

Money has been more active. The demand from speculative sources has been more animated, while from mercantile borrowers there has been a more urgent inquiry for accommodation. Rates have shown more firmness, with call loans quoted at 3@5, generally at 4@5, and the best discounts at 6@7 per cent per annum. The banks have added moderately to their loan and discount averages. The Washington reports, through the week, have been of a disturbing nature, and have tended to unsettle confidence as to financial, as well as commercial values. The Secretary of the Treasury announced on Monday that five millions of Gold would be offered for sale, through the New York office, as follows: Thursday, April 2, $1,000,000; Thursday, April 9, $1,000,000; Thursday, April 16, $1,000,000; Thursday, April, 23, $1,000,000; Thursday, April 30, $1,000,000. The U. S. Sub Treasury in this city closed the week with currency balance of $38,492,853 or $466,106 more than the preceding week; and a coin hoard, of $54,089,782, or $1,638,875 less than on the previous return. The City banks, in their last weekly exhibit, indicated a further reduction in their specie and deposit averages. The City bank exchanges, during the week, were $444,832,108, or a daily average of $74,138,684. The customs revenue of the port, during the week, was $2,400,755 of which $2,272,755 were in coin certificates. The deposits of the City banks show a decrease of $1,260,200; the legal tender notes an increase of $400,700, and the specie reserve a reduction of $1,256,700. The banks enlarged their loan and discount average $311,300, and their circulation $9,100. The City banks reported their average of gold last week at $25,439,300 and their greenback average at $60,585,100. Their deposits stood at $239,730,900. The loan item was about 286⅛ millions. The circulation was less than 26¾ millions.

The U. S. Sub-Treasury receipts in March were $43,374,481, including $11,029,633 from customs; payments, $42,848,629, including $1,077,472 of coin interest.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation $348,751,869.

Government has received about 73½ millions from internal revenue, thus far in the current fiscal year.

The U. S. Treasurer now holds in trust as security for national bank circulation, U. S. bonds to the amount of $392,880,200 and for public deposits, $16,270,200.

Gold has been quoted decidedly stronger in price, on a more spirited speculative movement, stimulated in part, by the Washington reports of a probable enlargement of the volume of currency. The customs drain has been fair, and the export call on the increase. The extremes of the price have been 112⅜@113¾, closing at 113⅜ as against 112⅜ on Wednesday of the preceding week. The specie outflow, last week, was $848,811. The imports of specie at this port since Jan. 1, have been $1,135,878, against $652,852 same time last year. The customs demand for Gold last week ave aged $410,834 a day. Foreign Exchange has been in fair demand, closing rather more firmly, with Bankers' sixty day bills on London quoted on Wednesday at $4 84¼@$4 85; sight bills on London, at $4 87¼@$4 88. The week's exports of Domestic Produce have been to the currency value of $6,047,968.

The amount of U. S. currency outstanding on the 1st inst. was $431,761,363.

Government securities have been quoted higher, with a livelier business reported, chiefly in the way of purchases on investment account. U. S. sixes of 1881 closed on Wednesday of this week at 120¾@121; U. S. Five-Twenties of 1862, 117¾@118; U. S. Five-Twenties of 1864 at 119¾@120; U. S. Five-Twenties of 1865, 120⅛@120¾; U. S. Five-Twenties of 1865 consolidated, 119⅛@119⅜; U. S. Five-Twenties of 1867, 120⅛@120⅜; U. S. Five-Twenties of 1868, 119¾@120; U. S. Ten-forties at 115⅛@115¼; U. S. Fives of 1881, (Funding Loan) 115@115⅛; Six per cent. currency Sixes from 117@117⅜.

State and Railway bonds have been moderately inquired for since our last, and have been held with firmness. Central Pacific first mortgage six per cents closed at 94¼@94⅛. Chesapeake and Ohio First Mortgage Bonds, Six per cents, 56@56⅛. Railway and miscellaneous share property has been quite active but variable as to values, closing, however, rather tamely and heavily.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $12,431,936, against $13,884,598 same week last year. The exports of domestic produce are $6,047,968, as against $5,361,289, last year. The exports of Gold and Silver, $848,811, as against $748,012 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,466,200, as against $2,970,295, same week last March.

General business has been more active in the line of domestic produce, with Breadstuffs, Cotton, Provisions, Petroleum, and Naval Stores quoted firmer, though closing irregularly. Groceries have also attracted more attention. Sugars and Molasses quoted a shade dearer. Wool, Tobacco, Hemp, Hides, and Leather have been in moderate request at about former rates. The Metal trade has been very dull throughout, with only a restricted call, for supplies for prompt use. The dealings in Iron have been comparatively unimportant. We now quote: Eglinton Pig Iron at $38@$39; Glengarnock, $39@$41; Coltness, $44; Gartsherrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $62 50@$65; Old Rails, $40; Wrought Scrap, $40@42 50. Ocean freights have been more active, but closing, however, with berth rates quoted much stronger than early in the week.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Pacific R. R. of Mo., 41⅛; do. 1st mort., 78⅞; Ohio and Mississippi 7s, consol., S. F., 92¾; Toledo, Wabash and Western 7s, consol., 71; St. Louis and Iron Mt. R. ☞ The officers of the Indianapolis and St. Louis Railway, recently elected, are: E. W. Woodward, President; Edward King, Secretary and Treasurer; A. J. McDowell, Auditor; and Samuel Woodward, General Superintendent.

☞ A new railroad is to be built from the Delaware River, near the mouth of Monroe Creek, in Hopewell, Township, to the Central Railroad at Bound Brook, N. J. The capital stock of the company is $1,000,000.

☞ The Philadelphia and Reading Railroad Company have declared a quarterly dividend of 2½ per cent in cash, on the preferred and common stock, payable, clear of all taxes, at the office of the company in Philadelphia on and after the 24th inst.

☞ The Delaware, Lackawanna and Western Railroad Company have declared a quarterly dividend of 2½ per cent, payable on and after the 20th inst.

☞ A dividend of three per cent, has been declared on the stock of the Dubuque and Sioux City Railroad Company, payable on the 15th of April, at the office of the company, 59 Liberty St., N. Y.

BANKING-HOUSE OF FISK & HATCH,
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest.

FISK & HATCH.

The House Transportation Bill.

The *Tribune*, of the 31st ult., has the following dispatch from Washington on the above subject:

There are as yet no indications of an early consideration of the Transportation bill in the Senate. Some of the opponents of the measure assert that the leading railroad men of the country desire its passage on the ground that it will lead to the assumption by the Government of complete authority over all the railroads of the country, whether inter-State or local, and that it will be far easier for the companies to deal with a single Government Commission than with thirty-seven different State Legislatures. The Commission, it is argued, would be removed from the influence of the Granger movement, which begins to exert such a power in the Legislatures of the Western States as to trouble the railroad companies. There would be no difficulty in making the provisions of the bill apply to nearly all the roads, because every one running through freight or passenger cars destined to cross a State line, would come within the terms of the bill, and would be free from the annoyance of hostile State legislation, by placing itself under the authority of the Government Commission. The passage of the bill by the House is still spoken of as a bun combe performance.

☞ The stockholders of the Toledo, Peoria and Warsaw Railway Company have elected John B. Brown, Jas. F. Secor, Charles A. Secor, J. W. Smith, Charles Bard, L. V. F. Randolph, J. D. Fish, Charles L. Frost, and John Newell, as directors of the company for the ensuing year.

☞ The Union Pacific Railroad Company has issued a circular announcing its readiness to give $6000 of its eight per cent mortgage bonds for $5000 of the income bonds now maturing. To facilitate exchange the company will pay on September 1 as much interest as if the ten per cent bonds had not been exchanged.

☞ The bridge over Red River, at Fulton, Ark., was finished March 21st, and trains of the Cairo and Fulton Road will hereafter run to Texarkana without change.

☞ The Directors of the Pennsylvania Railroad have unanimously re-elected their old officers—John Edgar Thomson, President; Thomas A. Scott, First Vice President, and George B. Roberts, Second Vice President.

☞ The opening of the Parker and Karns City Railroad—extending from Parker to Karns City—will be celebrated on Wednesday, the 8th of April.

☞ A Syracuse (N. Y.) firm has been awarded the contract for the construction of a ship canal from Port Dalhousie, Lake Ontario, to Thorold, a Canadian work.

Atlantic and Lake Erie Railway.

The Directors of the Atlantic and Lake Erie Railway Company, consisting of V. B. Horton, Thomas Ewing, Charles Foster, Thomas Beer, Wager Swayne, James Taylor, H. P. Platt, J. S. Trimble, J. P. Wetherel and G. B. Johnson, met in Cincinnati last week, and elected officers for the ensuing year as follows:

President, V. B. Horton; Vice President, G. B. Johnson; Secretary and Treasurer, James B. Gormly.

Executive Committee—Messrs. Ewing, Beer, Taylor, Johnson, and the President.

Finance Committee—Messrs. Ewing, Foster, Platt, Trimble, and the President.

The Board concluded a contract with B. B. Mc Donald & Co., of Bucyrus, Ohio, for the substructure from New Lexington, on the Cincinnati and Muskingum Valley Railway, through the Great Vein coal fields, to Salina, on the Columbus and Hocking Valley Railroad; and for the superstructure from New Lexington to Moxahala. The contractors are required to have the iron and rolling stock on part of the division by the 1st of September next, which will give the several coal companies an outlet for their coal to Cincinnati by the Cincinnati and Muskingum Valley Railway from New Lexington.

☞ The stockholders of the Montpelier and St. Johnsbury and Essex County Railroads held their annual meetings at St. Johnsbury, Vt., on the 21st ult. Each elected the old board of directors, and voted to ratify the contracts executed by and between their companies and the Eastern Railroad Company of Massachusetts, the Portland and Ogdensburg Railroad Company of Maine and New Hampshire, the Montpelier and St. Johnsbury Railroad Company, the Lamoille Valley Junction Railroad Company, the Northern Vermont and Lake Champlain Railroad Company, the Missisquoi Junction Railway Company of Canada, and the Montreal, Chambly and Sorel Railway Company of Canada, bearing date February 25, 1874, and authorized the issue of second mortgage bonds secured by a mortgage of their road and property for the purpose of completing and fully equipping the same as provided in said contracts with said several railroad companies.

☞ The Boston and Newton Railroad Company, formed under the general railroad law of Massachusetts to secure the building of the Newton and Boston Railroad, has been organized by the election of the following persons to act as Directors: J. D. Towle and John F. Boyd of Newton; H. H. Fitch of Boston; W. C. Strong, Charles Dana, C. H. B. Breck, B. F. Ricker, S. W. Trowbridge and Henry Baldwin of Ward Nineteen (Brighton). At a subsequent meeting of the Directors J. D. Towle was chosen President.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 21, at 292,817 tons, and for the coal year 2,917,912 tons, against 3,261,573 tons to corresponding time last year, being a decrease of 342,661 tons. The bituminous tonnage for the week is 43,952 tons, and for the year 421,796 tons, giving a total of all kinds for the week of 336,769 tons, and for the year of 3,349,708 tons, against 3,724,806 tons to same time last year, being a decrease of 375,018 tons.

☞ The basis of the compromise between the Pennsylvania Railroad and the New York and Long Branch Railroad, in regard to the bridge over the Raritan River, has been arranged as follows: The Pennsylvania road is to give $100,000 to widen the draws on each side of the main pier to two hundred feet, and to erect a wrought-iron swinging bridge for this part of the roadway. The work is to be done in five months, and the railroad bridge is to be used in common by both companies.

☞ Under order of the United States Circuit Court for the 6th Circuit the Alabama and Chattanooga Railroad is to be sold at public sale in Mobile, Ala., on the 4th of May. No bid will be received for less than $5,220,000. The purchaser must pay $200,000 in cash on the acceptance of his bid, and the balance in sixty days, any or all of it first mortgage bonds. The road is 295 miles long, from Chattanooga southwest to Meridian, Miss.

☞ The Grand Southern (Canada) Railway was recently organized at St. George. W. K. Reynolds A. H. Gillmor, jr., M. P., Francis Hibbard M. P. P., Hugh Ludgate, J. E. Lynott, C. McGee, and Samuel Johnson were elected directors. Subsequently the directors elected W. K. Reynolds President, and appointed J. E. Lynott Secretary, Samuel Johnson, Treasurer, and Geo. McSorley, Solicitor.

☞ The Spartanburg and Ashville Railroad Company has been organized at Charleston, S. C., with C. G. Memminger as President. The road is to be a link in the projected line of direct communication between Charleston and Chicago.

☞ The first mortgage seven per cent bonds of the Nashville, Chattanooga and St. Louis Railway Company have been placed on the free list of the New York Stock Exchange.

☞ A new line of railway from Lodi to Milan, through Wellington and Wakeman, Ohio, is being surveyed.

WANTED.—A young married man, who is not afraid to work, would like a situation in a R. R. Depot as baggage master or to make himself generally useful. A steady job required. No objections to going any distance. Address, stating amount of wages and kind of work to be done,

O. W. BISHOP, Ludlow, Vt.

THE ILLINOIS CENTRAL RAILROAD COMPANY offers par and a premium of one per cent. (101 per cent.), with accrued interest, for any of its construction mortgage bonds presented for prepayment prior to July 1, 1874, at its office in New York.

The outstanding balance of its Construction Mortgage Debt is about $3,000,000. These Bonds mature April 1, 1875.

L. V. F. RANDOLPH,
Assistant Treasurer.

NICKEL

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. The Company also proposes to license R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Direct-Acting Steam Hammers.
Communications by letter will receive prompt attention.
Jacks for Pressing on Car Wheels or Crank Pins made to order.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:
F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
F. L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
C. A. JOY, Ph. D., General Chemistry.
W. G. PECK, LL. D., Mechanics.
J. H. VAN AMRINGE, A. M., Mathematics.
O. N. ROOD, A. M., Physics.
J. S. NEWBERRY, M. D., LL. D., Geology and Paleontology.
Regular courses for Mining and Civil Engineering, Metallurgy, Geology and Natural History, Analytical and Applied Chemistry.
Special students received for any of the branches taught. Particular attention paid to assaying.
For further information and catalogues, apply to
DR. C. F. CHANDLER,
Dean of the Faculty.

Jersey City Steel Works.
JAS. R. THOMPSON & CO.,
MANUFACTURERS OF
HAMMERED AND ROLLED
CAST STEEL,
OF ALL DESCRIPTIONS,
Warren Street, Jersey City, N. J.
Tool, Drill, Frog Plates and Points, Cutlery, Rake, Axe, Hoe, Machinery, Spring Wagon-Axle, Tyre, Sword, Bayonet, Rifle, and Pistol, *made to Order.*
JAS. R. THOMPSON,
H. CAUTIER, B. ILLINGSWORTH,
D. C. GARDNER, H. DICKINSON.

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,
HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either
COAL OR WOOD BURNING
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.
J. S. ROGERS, *Pres't.*
R. S. HUGHES, *Sec'y.* } Paterson, N. J.
WM. S. HUDSON, *Sup't.*
THOMAS ROGERS, Treasurer,
44 Exchange Place, New York.

THE
PHŒNIX IRON CO.,
410 Walnut St., Philadelphia,
MANUFACTURERS OF
CURVED, STRAIGHT AND HIPPED
Wrought Iron Roof Trusses
BEAMS, GIRDERS and JOISTS,
and all kinds of Iron Framing used in the construction of Iron roof buildings.
DECK BEAMS, CHANNEL, ANGLE AND T BARS
curved to template, largely used in the construction of Iron Vessels.
Patent Wrought Iron Columns,
Weldless Eye Bars,
for top and bottom chords of bridges.
Railroad Iron, Street Rails, Rail Joints and Wrought Iron Chairs.
Refined Bar, Shoeing, and every variety of Shipping Iron Made to Order.
Plans and Specifications furnished. Address

Congressional Finance and the Railroad Corporations.

It may now be accepted that we are likely to have no inflation of the legal tender notes beyond the 400 million limit, on the one side, nor any issue of bank notes beyond the 400 million limit, on the other. This is, on the whole, quite as satisfactory as might have been expected. The temper of the southern and western members is strongly in favor of "more money," "cheap money;" and some of their advocates clamor for the privilege of issuing notes so loudly as to give the impression that they confound the right to start banks with a downright gift or loan of money from the government. Several causes conspire to bring about this mystification. One of the effects of our redundant currency was to stimulate trade and manufactures far beyond their legitimate and proper needs. Panic and collapse were certain to follow. We are undergoing the pains and penalties of having lived too fast. We must now go slowly, and let extravagant luxuries alone for awhile. The policy of the government in applying the surplus revenues to liquidating the unmatured debt, instead of accumulating a fund with which to begin the redemption of the legal tender notes, naturally threw large amounts of fixed capital—not less than a hundred millions a year—into the open money market, there to be bid for by all sorts of adventures; and it is a fortunate circumstance that so much of it went into the construction of railroads, even at high prices for material and labor. It is much better in that shape than in inflation of prices, already high, for city lots, or in the luxurious furnishing of costly buildings. The lessons of last September will not be forgotten this year; and though there is likely to be an addition to the currency of the country, we do not look for the mischevious effects of former years to follow. Perhaps we shall be better reconciled to this increase if we reflect what might have happened, if contraction had been adopted instead of inflation. A "cramp" among the banks, and hard times among the people, with a Presidential election looming up next year, would have created such a storm of opposition, that the next Congress would have swept away all barriers of limitation and opened the flood gates of new issues to the extent of one or two hundred millions. It is predicted of the present settlement that it will restore confidence to debtors, speculators, and business men. Money will be taken from bank-vaults to be spread among the people, and, what is of more importance, the wheels of industry will be set in motion. The evils of inflation may in this way be offset by greater benefits derived from a population kept at work. There will but little fresh capital find its way into the construction of new railroad lines, as compared with late years. The great lines will, in adding, here and there to their feeders and connections, strengthen themselves. Loans will seek the usual channels, and not be offered so much by popular subscriptions. Traffic will gradually and certainly revive. There will be a cutting down of useless functionaries, but better public service.

Of course, it is desirable that Congress should shape legislation in the direction of an early return to specie payments. It should not be lost sight of that our government notes are not money; but only promises to pay money. That day of payment and redemption in real "dollars" should not be indefinitely postponed; it should be definite, and the purpose of the nation to accomplish it should be expressed in proper legislation to that end.

How, then, can the government pay its notes? It certainly ought to be as able to cancel this debt of $446,000,000 (including fractional notes) as it was for the French people to pay off the indemnity of fifteen hundred millions to Germany, and in as short a time. It is a mistake to suppose that this can be done by issuing new bonds to be sold abroad for the coin, inasmuch as the same nations who sold us the coin would straightway proceed to take the coin back again by exchanging with us our old and new government and corporate obligations. There remains, then, the plan of hoarding up a sufficient sum in the Treasury Vaults (not less than two hundred millions) and as soon as that sum is reached have it understood that the notes would be paid. For that purpose a certain per centage of the customs should be accumulated. To be successful redemption must be so full and free that every body, who had the requisite greenbacks, could get all the gold he wanted; and for six months it should be a drug. By that time the appetite for gold would be sated; it would flow into the banks and thence it would gradually be withdrawn to Europe.

The railroad companies, most of whom have long bonds out, would lose nothing by this policy of resumption. Their revenues would be in the better currency meanwhile, and less of them would be consumed in the purchase with gold of foreign-bought articles. The competition from new lines is likely to be less for many years to come. Trade and industry will in a short time settle themselves according to the new order of things. Of course debtors will squirm, when compelled to repay in a better kind of currency than they received; but if this argument were allowable now, it would last for ever; we should never be ready, for there always will be debtors; and there is no temptation to men to run in debt so great as the notion that money will be more plentiful when the debts have to be repaid. The

utmost that can be done for this class is to provide for gradual, not abrupt, change. Fix, approximately, the time for redemption, and then let all earnestly prepare for it.

Virginia and Her Bondholders.

On the 27th of March Gov. Kemper, of Virginia, sent a message to the General Assembly in relation to the State debt, in which he dwells at considerable length upon and earnestly expresses his objections to the existing funding act, and asserts that it is the cause of great present embarrassment to the State finances, and that relief from the obligation compelling the State officers to receive the coupons of those bonds in payment of taxes is absolutely necessary to the inauguration of an efficient system for reviving the public credit and ultimately redeeming the public faith, and then adds:

"The principal sum of the debt intended to be assumed by the funding act, the interest pledged upon which is now overdue, is $30,478,741 49, excluding the amount assigned for settlement with West Virginia. The evidences of debt proper belong to many and multiform classes, including coupon, registered and sterling bonds, and divers forms of old certificates."

The Governor then shows, by comparison, the resources and situation of the State. In 1860 the value of assessed real and personal property was $748,655,482 77, and in 1873 and now is $336,686,433 23 and no more. He shows also by contrast the falling off of the tobacco crop and of every other kind of agricultural products, which distresses the people and strains their utmost resources and energies. He continues:

"The present revenues of the State are large when compared with her resources. The State revenue for the fiscal year, excluding costs of collection, amounted to $2,421,945 41, while for the same year the additional sum of $2,217,538 49, besides the cost of collection, was drawn from the people in the shape of county, township, and local school taxes, making the net aggregate of $4,689,488 90 paid yearly in public taxes, while the aggregate of taxable values stands at $336,686,433 23. This amount of taxation is exclusive of the very considerable taxes paid to corporations, while a sum far larger than the amount of all other taxes combined is actually drawn from the State by federal taxation. If full interest should now be paid upon this debt, assumed by the funding act, the amount of State and local taxes, excluding costs of collection, also federal and corporation taxes, would necessarily be increased to the net sum of $5,964,425 77, for the revenues of the fiscal year were less than enough to support the Government and pay such full interest by the sum of $1,824,941 87."

In referring to his plans to henceforth pay four per cent per annum on the entire debt assumed by the funding act, the Governor says the State might guarantee with certainty the regular and punctual payment in semi-annual installments and at convenient places, of two thirds of the accruing interest for the present—giving proper certificates for the deferred interest, and providing for the payment of full interest, together with all arrearages on interest account, as soon as the steadily increasing resources shall permit, and adds:

"In such adjustment it ought to be stipulated that all our outstanding obligations included in the numerous and confused classes and grades before enumerated should be made first-class debts of uniform terms and character. They are all equally just, and it is not reputable that we should favor any of them with special advantages or make any distinction between them."

The memorial of the foreign bondholders, which suggested the Governor's message, refers to the fact that its signers had advanced large sums of money to Virginia, for which they received titles of security, and that the interest thereon was duly paid until calamitous occurences affecting the State, payments were suspended. They state that under the funding bill of 1871 they assented to reduced rates of payment. That in compliance with the conditions of the funding bill the coupons of interest should have been paid on the 1st of January, 1872, for which ample funds were lying in the treasury of the commonwealth, but that instead of such coupons being paid, in conformity with the obligations of the commonwealth, payment was suspended and the whole action of the funding bill stayed by resolutions of the two houses of the Legislature, passed in the session of 1871-'72. That subsequent legislation in the sessions of 1871 '72 and 1872 '73 has been felt by the bondholders to be most oppressive and unjust. The memorialists solicit that the General Assembly will, without delay, restore the funding bill to its full efficiency, or substitute such other measures as may tend to the restoration abroad of the credit and honor of the ancient commonwealth of Virginia.

Connecticut River Railroad.

The earnings of this road for the years ending September 30, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$323,247 06	$348,738 12
" freight	375,536 08	365,963 49
" mails	6,059 56	11,127 93
" express	13,065 99	18,125 40
" rents, etc	15,459 78	12,348 80
	$733,368 47	$751,303 74
Expenses, viz:		
Repairs of road	$128,390 95	$139,523 01
" bridges	3,896 10	3,728 49
" buildings	34,201 85	27,183 57
" locomotives	26,780 79	35,960 46
" cars	44,536 78	40,624 78
" tools, etc	1,154 69	2,384 22
Running trains	132,830 28	129,151 11
Station expenses	58,499 45	60,204 28
General expenses	16,682 63	17,405 46
Stationery, etc	8,044 34	6,723 08
Gratuities and damages	4,256 31	3,954 40
Removing snow and ice	1,074 54	6,563 34
Water works	5,886 51	2,068 83
Miscellaneous	11,918 60	11,645 34
	$478,153 82	$487,120 12
Net earnings	$255,214 65	$264,188 62
Surplus per last report	217,102 22	226,985 12
Total	$472,316 87	$491,168 74
Against which are charged—		
Interest paid	$27,598 62	$27,058 36
Payment to sinking fund	8,000 00	8,000 00
Taxes	37,023 18	37,683 49
Insurance	2,709 95	2,517 49
Dividends January	85,000 00	92,500 00
" July	85,000 00	95,000 00
Surplus September 30	226,985 12	228,409 40
Total, as above	$472,316 87	$491,168 74

The net result of the business differs but little from that of the preceding year. A comparison of the figures show a gain of $17,935 27 in the gross receipts and a corresponding increase of $8,966 80 in the operating expenses.

The dividend and interest items include payments of about $15,000 in amount, growing out of the new work now in progress on the second track, which expenditure might fairly have been carried to capital account as a portion of the legitimate cost of constructing the road, but we have chosen to set it against the current earnings.

The repairs and renewals in the locomotive and car department have been unusually extensive. A new locomotive, the "Orion," costing $18,400, has taken the place of the old machine of that name, and an additional locomotive, the "Brightwood," is in process of building, on which $4,700 has been expended at our shops. In addition to current repairs on the cars, three house freight cars, five platform cars and five gravel cars have taken the place of like numbers that have gone out of service, and two new passenger cars have been added to the former stock. The "Miller Platform" has been placed on most of the passenger cars, and a commencement has been made in providing the passenger trains with approved power brakes: all being charged to account of running expenses.

The department of road repairs has been supplied with two hundred tons of iron rails, five hundred and forty-eight tons of steel rails, two hundred and seventy kegs of spikes and about twenty-two thousand cross-ties; the difference in cost between iron and steel rails being carried to "construction account."

The engine house at South Vernon, destroyed by fire in November last, was rebuilt at a cost of $1,600. The engine house at Greenfield which for various reasons had become unsuited to the requirements of the business at that station, has been replaced by a building of modern construction with five stalls, and so located that future additions may easily be made when required. The new house, involving the removal of the turntable, has cost $6,500, and is of course a charge against the income of the year. As our trains are now run, two of the engines are kept over night at Greenfield; and the Vermont and Massachusetts R. R. Co., to whom we lease station accommodations at that point, now use the other three stalls of the new building.

A tract of land eligibly situated at Bernardston Station and including a beautiful grove has been purchased and fitted up for the accommodation of picnic and other social gatherings during the season of pleasure travel. The cost of this land, $1,890 00, was carried to construction account, but the fitting up of the grounds—say $2,000, forms a part of the stated annual expenses. Judging from the results of the past season there can be but little doubt that the enterprise will prove remunerative through increase of travel.

Since our last annual report the section of second track then in process of construction between Chicopee and Holyoke Stations has been completed. It was brought into use during the month of August. A further extension of eight and one half miles is now in progress, for which the grading, masonry and bridge superstructures will be well advanced at the close of the season. The rails are under contract for delivery in the spring and we anticipate the completion and opening of the second track as far as Northampton by September of next year. In laying out this new work it has been found practicable to improve the alignment and grades of the road at several points without adding unreasonably to the cost.

One thousand shares have been added to the capital stock of the company, making a total of $1,950,000. Of the amount so added one half was sold at auction in June with full rights from the time of the last preceding dividend; the other half was sold in August on the same terms, the entire proceeds being $138,396 or at the rate of 138½ per cent. The total expenditures charged to construction account during the year amount to $188,256 41, being $49,860 44 greater than the proceeds of the stock sales.

It will be seen from the accompanying report of the commissioners that the sinking fund, provided for our mortgage debt of $250,000, now amounts with its accretions to $148,931 94.

The company have 19 locomotives, 24 passenger, 2 sleeping, 6 smoking and baggage, 5 smoking and Post-office, 2 baggage and express, 182

house freight, 121 platform freight and 32 stone (platform) cars, and 1 steam car. Miles run with passenger trains, 193,065; with freight, etc., trains, 157,287—total 350,352. Number of passengers carried, 1,124,299; do., carried one mile, 12,336,298. Tons of freight carried, 405,801; do., carried, one mile, 9,782,187. Earnings per mile of road, $13,416 12. Earnings per mile run, $2 17.3; operating expenses per mile run, $1 39.1; net earnings per mile run, $0 75.4. Per centage of expenses to earnings, 64.2.

The James and Kanawha Canal Project.

The friends of this project in the South and West appear to be rallying for one more effort to commit the Government to the expense of this work. General Humphreys, chief of engineers U. S. A., has transmitted, with the expression of his full concurrence in its conclusions, the report of a board of engineers on the James and Kanawha Canal project. The board consisted of Colonel J. G. Barnard, Lieutenant-Colonel Q. A. Gillmore, Major W. P. Craighill, Major G. Weitzel and Lieutenant Thomas Turtle all of the army Engineer Corps, and Benjamin H. Latrobe, civil engineer. After thorough examination of the route from Richmond to the Ohio, at Point Pleasant, they have unanimously arrived at the following conclusions: First, that it is entirely practicable to connect the waters of the James and Ohio rivers by a water navigation of seven feet in depth. The tunnel that will be required would be about the length of the Mont Cenis tunnel, but it would go through rock very easily excavated, and could be driven from shafts of moderate height, and at distances seldom exceeding one mile. Secondly, that an ample water supply can be commanded. Thirdly, that the tunnel should be a single tunnel, with turnouts provided in sufficient number to admit of vessels passing. Fourthly, that the proposed water line can be completed in six years at a cost not exceeding $60,000,000, and that the cost may reasonably be expected to be within $55,000,000, and may possibly not exceed $50,000,000. Lastly, that, in the opinion of the board, this route presents extraordinary claims as a means of cheap transportation, and of developing immense mineral resources now neglected.

Railroad Coal, Wood, and Oil.

Every one who has traveled on any of the railroads of the Pacific slope has wondered at their enormous woodpiles and coal-bins. The former are especially noticeable on the Sierras, but both are found at all the various termini of the different divisions. Wood is usually burned in crossing the summits, on account of the intolerable inconvenience of coal smoke in the miles of snow-sheds and tunnels. All along the line of transit across the mountains are monster woodpiles.

Here the snowsheds are enlarged to receive thousands of cords; there immense buildings are erected for the especial purpose of holding fuel; and a little further on we come to level spots of two or three acres that are literally covered with carefully corded wood. The inquisitiveness of human nature prompts almost every one to wonder regarding the quantity and cost of this railroad fuel. What does the company pay for the fodder of these puffing, steaming, snorting, shrieking, iron horses?

The obliging officials are always ready to give exact information, and a little time and attention soon enables one to arrive at conclusions which are absolutely correct.

At the present time all classes of people are eagerly scanning the columns of the press for reliable figures and facts showing the cost of railroading. It, therefore, is, perhaps, apropos that we should give a few items, gleaned by patient inquiry, relative to this question of expense.

The Central Pacific had on hand, at the 1st of January, about 60,000 cords of wood, and many thousands more were stored near the track, ready to be received when required. During the year 1873, the Central Pacific purchased and received about 75,000 cords, at a cost of over $300,000; the California and Oregon, 9,000 cords, costing $40,000; the Western Pacific, 2,500 cords, at $15,000, and the Stockton, Copperopolis and Visalia 1,000 cords, costing $5,000.

These roads, therefore, purchased 87,500 cords, at an aggregate cost of $360,000.

The following table shows the number of engines employed upon each division, and the average monthly consumption of wood and coal:

	No engines.	No. tons coal.	No cords wood.
Salt Lake Division	27	1,900	80
Humboldt Division	23	1,600	75
Truckee Division	30	1,600	300
Western Division	49	2,400	125
Visalia Division	7	350	30
Oregon Division	6	.....	500
California Pacific	12	650	100
Sacramento Division	44	.....	3,500
Total	209	8,500	4,710

Many of these two hundred engines were shipped around Cape Horn, and were purchased at a time when engines were higher than at present. It is computed that they cost the company, on the average, $15,000 apiece, or, in the aggregate, $3,000,000. According to the above table they consume annually about 102,000 tons of coal, and 56,520 cords of wood.

At the lowest estimate the coal costs, delivered at the various points, $8 per ton, and the wood $4 50 per cord; hence we have annually the snug little sum of $816,000 paid for the former and sumed.

To this amount should be added the quantity accidentally destroyed by fire.

Last year the fires at four places within a distance of ninety miles on the Central Pacific, consumed the following amounts, viz:

	Cords.
Clipper Gap, two fires	500
New England Mills	800
Union Mills	2,000
Camp twenty-seven	1,500
Total	4,800

These iron horses require not only wood and coal, but oil, to lubricate their ponderous joints and sinews. This oil is known as machinery, sperm, tallow and kerosene, and the average quantity used monthly is as follows:

Division.	Machine oil, pts.	Kerosene, pts.	Tallow, lbs.	Cost.
Western	3,500	3,000	3,000	$1,300
Visalia	450	400	300	300
Oregon	300	310	330	350
Sacramento	2,622	1,400	2,050	720
Truckee	1,200	1,500	1,500	600
Humboldt	400	2,500	1,500	400
Salt Lake	1,150	1,500	1,700	520
California Pacific	400	490	720	210
	10,022	11,100	11,100	$4,300

Thus, annually, the oil bill amounts to $51,600 simply for lubricating locomotives.

To be sure, all this expense of running the engines is but a drop in the bucket, and is not to be mentioned in the same breath as the cost of battling snow, or of snow-sheds, tunnels, grades, buildings, track and employes; nevertheless it is an item worth considering. We earnestly commend it to any who are not quite thoroughly posted regarding the expensiveness of running railroads. For the benefit of such we recapitulate the cost:

200 engines, at $15,000	$3,000,000
102,000 tons of coal, at $8	816,000
56,520 cords of wood, at $4 50	264,340
4,800 " " (fires)	21,600
Oil and tallow	51,600
Total	$4,153,540

—*Cor. Sacramento Record.*

☞ The estimated earnings of the Illinois Central Railroad Company for March, 1874, are $567,554, against $660,759 in March, 1873—a decrease of $93,205. For the three months ending March 31, 1874, the earnings were $1,717,713, against $1,860,429 for the corresponding period of 1873—a decrease of $142,716. This large decrease in earnings is however more than counterbalanced by the diminution in expenses; the net earnings for the past three months having, as we learn from the most reliable authority, increased more than one hundred thousand dollars over the first three months of the previous year.

☞ A settlement has been completed in Philadelphia between the Northern Pacific Railroad Company and the estate of Jay Cooke & Co., whereby the advances made by the latter to the former are discharged by acceptance of the company's first mortgage bonds and other securities. This settlement leaves the railroad company with only a nominal floating debt to be provided for.

☞ The Senate bill, granting an extension of time for the completion of the Wisconsin Central Railroad to the 31st of December, 1876, passed the House of Representatives on the 6th inst. Besides extending the time, the bill gives the company 342,000 acres of land.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of March, were:

ENTERED FOR CONSUMPTION.

	1873.	1874.
Manufactures of wool	$2,836,945	$2,885,158

New Railroad in New Jersey.

About a year since a charter was obtained for the building of a railroad along the Delaware river from Camden southward, to connect with the West Jersey road. In fact, it will be a feeder to that road, and as it is to run through a large extent of dairy country, it will afford advantages heretofore unenjoyed by farmers, for sending their milk and other produce to the Camden and Philadelphia markets. Engineers have been on the route for twenty six days, and as soon as the lines are established, grading will be commenced and the work pushed forward. The following have been elected officers of the road: President, Hon. Samuel Hopkins. Secretary and Treasurer, D. B. Gill. Directors, Samuel Hopkins, D. B. Gill, Wm. Summerill, Edward Vanneman, Samuel T. Miller, Matthew Gill, Henry Allen, Wm. Justice, Joseph W. Cooper, John B. Lawrence, Edward H. Green. Chief Engineer, James W. Allen, Bordentown. Assistant, J. G. Fell, Trenton. It is proposed to build this road by "paid-up capital," and not by bonds. The stock has been taken mostly by persons who reside along the route.

Naugatuck Railroad.

The receipts from operations of this road for the fiscal year ending September 30, 1873, were:

Secretary and Treasurer.—Horace Nichols.

Superintendent.—Geo. W. Beach.

Colfax and Nevada City Railroad.

The grantees of the Nevada and Colfax Railroad met at the Court-house yesterday afternoon. J. C. Coleman acted at President, and N. P. Brown, Secretary. The president announced that the railroad bill having been passed, and was now a law, the meeting was called for the purpose of suggesting plans for organization. There was considerable discussion as to the best mode of procedure, which was engaged in by Messrs. Watt, Searls, Dibble, Leech, Coleman, Sigourney and others.

On motion of A. B. Dibble, a committee of four from Grass Valley and three from Nevada was appointed to solicit subscriptions and to prepare all necessary papers for the purpose of carrying out the provisions of the bill, with full powers. The Nevada delegation selected M. L. Marsh, N. P. Brown and W. R. Tully. The Grass Valley delegation selected John C. Coleman, A. B. Dibble, R. Leech and J. M. Laknean.

Edward Coleman made a motion, and it was carried, that a first class steam narrow gauge railroad be built, and that the capital stock be fixed at $400,000; the number of shares to be 40,000, at $100 each, and 15 per cent of the amount subscribed to be paid in on or before Saturday next. The Nevada committee was requested to pay the 15 per cent subscribed into the Bank of Nevada City, and the amounts subscribed in Grass Valley to be paid to John C. Coleman.—*Nevada City Transcript March* 12.

☞ The earnings of the Atlantic and Pacific Railroad for the year ending December 31, 1873, were $3,604,182 78, the expenses $2,147,107 59, and the net earnings $1,457,075 19. For the year ending December 31, 1872, the earnings were $3,707,941 69, the expenses $2,258,897 05, and the net earnings $1,449,044 64—showing a decrease in earnings of $103,758 91, with a decrease in expenses of $111,789 46—making the increase in net earnings $8,030 55.

New York and New England Railroad.

At an adjourned meeting of this corporation, held in Boston on the 7th inst., on motion of Dr. J. C. Ayer, it was voted that a committee of five be chosen and requested to confer with the trustees in possession, and after investigating the present condition and wants of the company, to report at an adjourned meeting of the corporation, with such recommendations as may seem to them proper with a view to securing the immediate possession and completion of its entire property. In accordance with the above vote, the following persons were chosen: Hon. Charles R. Train, Dr. J. C. Ayer, Henry Saltonstall, Eben B. Phillips and George M. Rice. The Chairman was authorized to fill any vacancies which may occur in the above committee, and the meeting adjourned to Tuesday the 21st inst., at 11 o'clock.

Statement of the Public Debt of the United States April 1, 1874.

Interest paid by United States, $22,386,601 62; interest repaid by transportation of mails, &c., $5,051,367 72; balance of interest paid by United States, $17,335,323 89.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, March 31, 1874.

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

A New Canal in Canada.

The Rochester *Union* says that Messrs. Belden, Denison & Co., of Syracuse, have recently been awarded contracts for making, at an estimated cost of about $1,500,000, three miles of canal and six locks, beginning at Port Dalhousie, on Lake Ontario, a ship canal to be made by the Canadian Government from that place to Thorold. The locks on the whole distance will be eighteen in number, having an average lift of some fourteen feet. They are to be forty-five feet wide and two hundred and seventy feet long, and built of cut stone. The competition for the contract was sharp. One of the conditions of the letting was that the lowest bidder should deposit $600,000 with the Government, in cash or bonds, before the contract was executed. Many of the leading capitalists of Canada took part in the competition.

☞ Consolidated Virginia mining stock is quoted at $85; Hale & Norcross, $56 50; Savage, $84 50; California, $45 50; Kentuck, $25 25; Yellow Jacket, $84 50; Crown Point, $94 25; Belcher, $84 75; Chollar-Potosi, $69; Ophir, $25 12½; Raymond & Ely, $31 50; Golden Chariot, $15 12½; Eureka Consolidated, $14; Meadow Valley, $12 87½.

The Self-Lighting Kerosene Lamp!

LIGHTS YOUR LAMP IN AN INSTANT!

No Removing the Chimney!

NO ELECTRICITY!

No Lucifer Matches!

Thousands View it with Perfect Admiration.

No more Houses, Stores or Railway Trains set afire by the Carelessness of Matches.

There are few inventions which spring into such sudden and universal popularity upon the first introduction as was achieved at once by this

Self-Lighting Lamp.

This valuable patent has nearly 17 years to run. You can at once see the advantage of owning and controlling the

EXCLUSIVE RIGHT OF MANUFACTURE

and sale of these goods in a single County in this densely populated State, or indeed any other State.

A SELF-LIGHTING KEROSENE LAMP!
A SELF-LIGHTING GAS ATTACHMENT!!
A SELF-LIGHTING HAND LANTERN!!!
A SELF-LIGHTING TORCH!!!!

We feel confident in our ability to offer to enterprising men of moderate capital, in the purchase of Territory, such inducements that they will have no cause to doubt the results.

IT SELLS AT SIGHT EVERYWHERE.

Just the thing long needed for **Railroad Cars** and Officials, **Depots, Stores, Dwelling Houses** and **Factories.** Every such place will have them at once.

Thousands of these Self-Lighting Burners have been sold during the past season in the New England States alone. What better proof need we ask for its merit and growing popularity?

WE ASSERT WITHOUT HESITATION

They are the best selling and most money-making inventions ever put on this or any other market for sale.

The price is within the reach of all. We have goods now ready for delivery, and any man can commence to-day to make a small fortune in the sale of these goods alone.

Call and see it in practical operation.

Or enclose one dollar for a sample Burner.

One dollar for Gas Attachment.

Two dollars for a Torch, two dollars and a half for a Self-Lighting Lamp, and they will be sent with our terms for territory to any part of the country.

OFFICE AND SALESROOM OF

"The Universal Self-Lighting Lamp Co."

No. 563 Broadway, New York.

The Finance Bill.

The following is a copy of the bill which passed the U. S. Senate on the 6th inst. It is entitled: "A bill to fix the amount of United States notes and the circulation of National banks and for other purposes." It reads as follows:

Be it enacted, etc., That the maximum amount of United States notes is hereby fixed at $400,000,000.

Section 2. That $46,000,000 in notes for circulation, in addition to such circulation now allowed by law, shall be issued to national banking associations, now organized, and which may be organized hereafter; and such increased circulation shall be distributed among the several States as provided in section 1 of the act entitled "An act to provide for the redemption of the three per centum temporary loan certificates, and for an increase of national bank notes," approved July 12, 1870.

Section 3. That each national banking association now organized or hereafter to be organized, shall keep and maintain, as a part of its reserve required by law, one-fourth part of the coin received by it, as interest on bonds of the United States deposited as security for circulating notes or Government deposits; and that hereafter only one-fourth of the reserve now prescribed by law for national banking associations shall consist of balances due to an association, available for the redemption of its circulating notes from associations in cities of redemption, and upon which balances no interest shall be paid.

☞ The following gentlemen were elected directors of the Second Avenue Railroad Company on the 2nd inst: Thomas Crane, Waldo Hutchins, Julius Wadsworth, Joseph Richardson, Charles Stanford, Augustus E. Masters, Frederick De Billier, Christian Schwarzwaelder, James D. Fish, William S. Thorn, George Bell, Solomon Mehrbach, Thompson W. Decker. Solomon Mehrbach was elected President; Julius Wadsworth, Vice President; William S. Thorn, Treasurer; Harvey H. Woods, Secretary, and John W. Smith, Superintendent.

☞ According to the report of the Michigan Railroad Commissioners that State is one of the foremost in the country in the number and value of its railroads, in proportion to its population. On the 1st of January there were 3,300 miles of completed railroad in the State, valued at $115,000,000, whose running expenses were last year more than $20,250,000, and whose earnings where $32,000,000. The rates of freight on the State roads are lower than in most of the other States, and are but a little over one-third of what they were in 1864. All the roads, except four, are supplied with air brakes.

☞ D. R. Garrison, of St. Louis, had been elected President, Andrew Pierce, Jr., of New York, Vice President, and John L. Dearborn, of St. Louis, Secretary of the Pacific Railroad of Missouri. The directors are: D. R. Garrison, Oliver A. Hart, C. P. Chouteau, T. B. Edgar, D. K. Ferguson, M. E. Lipman, John J. Taussig, John B. Henderson, all of St. Louis; James H. Baker, Wm. H. Coffin, A. Pierce, Jr., C. B. Taussig, of New York, and Francis B. Hayes, of Boston.

☞ The Philadelphia *Ledger* says that the examining committee of the affairs of the Pennsylvania Railroad Company have commenced their work, and have proceeded far enough already to discover the folly and uselessness of their appointment.

Memphis and Charleston Railroad.

It was stated recently that the "Southern Security Company" desired to get rid of its lease of this railroad, as it had of its Richmond and Atlanta Air line. The Memphis *Appeal* of the 1st inst. says:

The Charleston Railroad goes back to the stockholders. We hear that the final arrangement was extremely satisfactory. Something like $160,000 was claimed as coming to the stockholders if they took the road back. We hear that they get $70,000 in money, 3,500 acres of real estate, and other property to the amount of $120,000. The road is restored with a portion new ironed, the rolling stock increased and improved, buildings in better condition, and sewers and bridges improved. This leaves no loss by the new arrangement. The stockholders meet on the 19th to vote on the ratification of the settlement.

☞ An abstract from the books of the Treasurer of the Cary Improvement Company, of Boston, shows the immediate personal assets of the company to be $165,552 46, consisting mostly of interest bearing first mortgage notes, and its total liabilities—nearly all of which are founded on a term of years—to be $155,454 20, thus leaving a surplus of $10,008 17 over all liabilities, together with the hotel estate, its furniture and fixtures, the manufacturing property and its entire landed estate practically free from debt.

☞ It is stated that the contract for the railway from Buenos Ayres to Chili has been signed by the Minister of the Interior. The length of the line is 840 miles, and is estimated to cost six millions sterling.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

FOUNDRY FACINGS & SUPPLIES
OF ALL KINDS.
Bituminous Coal, Sea Coal, Lehigh, Mineral, Charcoal, Black Lead, &c., &c.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, April 11, 1874.

Stock Exchange and Money Market.

The Money market has shown more animation and rather more firmness, with call loans generally quoted at 4@5, and the best mercantile discounts at 6@7 per cent per annum. The demand has been more urgent, chiefly from speculative sources, though, in good part also, for commercial purposes. The banks, as well as private lenders, have enlarged their advances, to correspond with the growing inquiry for accommodation; and as a rule, now find no difficulty in placing balances at the current quotations. Washington reports, relative to the progress of the currency discussion in Congress, have tended to disturb confidence to some extent, and to place other than the most responsible borrowers at a disadvantage. The U. S. Sub Treasury in this city closed the week with a currency balance of $37,246,080 or $1,147,772 less than the preceding week; and a coin board of $56,005,589, or $1,916,807 more than on the previous return. The City banks, in their last weekly exhibit, indicated a further reduction in their specie and deposit averages. The City bank exchanges, during the week, were $431,823,812, or a daily average of $71,887,218. The customs revenue of the port, during the week, was $2,516,787, of which $2,388,786 were in coin certificates. The deposits of the City banks show a decrease of $2,239,500; the legal tender notes of $3,602,000, and the specie reserve of $1,393,700. The banks enlarged their loan and discount average $4,936,200, and their circulation $78,200. The City banks reported their average of gold last week at $24,045,600, and their greenback average at $56,983,100. Their deposits stood at $237,491,400. The loan item was about 291⅛ millions The circulation was about 26⅞ millions.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349 millions.

Government has received about 75¼ millions from internal revenue, thus far in the current fiscal year.

The cash balances under the control of the Treasury Department at Washington, on Wednesday, were as follows: Currency, $8,841,889; special deposits of legal tender for redemption of certificates of deposit, $52,215,000; coin balance, $87,800,917; including coin certificates, $37,268,700.

Gold has been more actively sought after, chiefly on speculative account, the various Washington reports, relative to the currency question, tending to stimulated speculative purchases. The customs call has been moderate, and the export drain somewhat heavier. The extremes of the price have been 113⅛@113¾, closing at 113⅜ as against 113⅜ on Wednesday of the preceding week. The specie outflow, last week, was $918,092. The imports of specie at this port since Jan. 1, have been $1,165,626, against $1,030,506 same time last year. The customs demand for Gold last week averaged $428,000 a day. Foreign Exchange has been in more demand, closing more firmly, with Bankers' sixty day bills on London quoted on Wednesday at $4 84¼@$4 85⅛; sight bills on London, at $4 87¾@$4 88⅛. The week's exports of Domestic Produce have been to the currency value of $4,742,056.

Government securities have been in more request, for investment purposes, and have been generally quoted firmer as to price. The last public debt exhibit indicated a net liquidation of $2,183,388 in March. U. S. sixes of 1881 closed on Wednesday of this week at 121@121¼; U. S. Five-Twenties of 1862, 117¾@118; U. S. Five-Twenties of 1864, at 119¾@120; U. S. Five-Twenties of 1865, 120⅛@120¾; U. S. Five-Twenties of 1865 consolidated, 119⅛@119⅜; U. S. Five-Twenties of 1867, 120⅛@120⅜; U. S. Five-Twenties of 1868, 119⅞@120⅛; U. S. Ten-forties at 114⅜@115¼; U. S. Fives of 1881, (Funding Loan) 115¼@115½; Six per cent. currency Sixes from 117@117⅜.

State and Railway bonds have been comparatively quiet since our last, but held with confidence. Central Pacific first mortgage six per cents have been in exceptionally good demand, closing at 94⅞@95. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been selling at 55½@56. Railway and miscellaneous share property has been moderately active, but without buoyancy as to values.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,851,827, against $7,576,073 same week last year. The exports of domestic produce are $4,742,056, as against $5,010,645, last year. The exports of Gold and Silver, $918,092, as against $1,246,187 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,249,042, as against $2,970,295, same week last year.

General business has been less active; the observance of Good Friday as a partial holiday operating against free dealings. The leading kinds of domestic produce have been in fair request, and at the close, somewhat stronger in price. Foreign merchandise has been comparatively tame and unsettled in values. Metals slow of sale, as a rule. We now quote: Eglinton Pig Iron at $38@$39; Glengarnock, $39@$41; Coltness, $41; Gartsherrie, $46; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $40@42 50. Ingot Copper has been exceptionally brisk for forward delivery. Ocean freights moderately active, closing, with rates generally quoted firmer.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Albany and Susquehanna R R., 94⅞; do. 1st mort., 103; Atlantic and Pacific R. R. pref., 15⅜; Pacific R. R. of Mo., 39½; do. 1st mort., 78¾; St. Louis and Iron Mt. R. Central Pacific Railroad.

The earnings of the Central Pacific Railroad for the month of March, 1874, were $867,666, against $939,778 in March, 1873, and $875,763 in March, 1872. For the first three months of 1874 the earnings have been $2,510,224, against $2,521,061 for the first three months of 1873, and $2,089,882 for the first three months of 1872.

In explanation of the above earnings a letter from the superintendent to the vice president says:

During the month of March there were seventeen days of stormy weather, which for a part of the time almost entirely suspended local traffic. Yet at no time were any passenger trains delayed more than twenty-four hours, although the fall of snow on the Sierra Nevada Mountains was heavier than ever known before since the road has been running.

☞ The stockholders of the Eastern (Mass.) Railroad Company, at a special meeting held on the 8th inst., voted to ratify the issue of bonds for £200,000, heretofore made by the directors, and also authorized the issue of an additional amount not exceeding £400,000, to be made payable within a time not exceeding twenty years from their date, interest at six per cent per annum, semi-annually.

☞ The Baltimore and Ohio Railroad Company have declared a dividend of five per cent on the stock of the main stem for the half-year ended 31st March, payable on and after the 1st May, and a like dividend on the Washington branch, payable on and after the 17th inst.

BANKING-HOUSE OF FISK & HATCH.
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest, secured by first mortgage on nearly 12,000,000 acres of the company's lands in California, Nevada, and Utah.

FISK & HATCH.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for February, 1874, were $607,990 28, the expenses $374,956 13, and the net earnings $233,034 15. In February, 1873, the earnings were $491,783 55, the expenses, $289,028 42, and the net earnings $202,755 13—showing an increase in earnings of $116,206 73, with an increase in expenses of $85,927 71, making an increase in net earnings of $30,279 02. For the two months ending February 28, 1874, the earnings were $1,228,705 49, the expenses $684,914 81, and the net earnings $543,790 68—showing an increase in earnings, as compared with the corresponding period of the previous year, of $212,947 08, in expenses of $44,319 19, and in net earnings of $168,627 89. The expenses for February, 1874, include $70,000 for the renewals of rails.

☞ The earnings of the Chicago and Northwestern Railroad Company for the fourth week in March, 1874, were $355,270, against $305,909 for the fourth week in March 1873—an increase of $49,361. For the month of March, 1874, the earnings were $1,039,985 against $967,258 in March, 1873—an increase of $72,727. From June 1, 1873, (the commencement of the fiscal year) to March 31, 1874, the earnings have been $11,996,659, against $10,446,512, for the corresponding period of the previous year—an increase of $1,550,147.

☞ At a meeting of the stockholders of the Atlantic and Pacific Railroad Company in St. Louis on the 30th ult., Andrew Pierce, Jr., of New York, D. K. Ferguson, of St. Louis, James H. Baker, of New York, and Oliver A. Hart, of St. Louis, were elected directors to serve for three years—the following directors holding over: John B. Henderson, D. R. Garrison, John J. Taussig, M. E. Lipman and C. B. Fisk, of St. Louis; and Francis B. Hayes and C. J. Morrill, of Boston; and Wm. H. Coffin of New York.

☞ The earnings of the Pacific Railroad of Missouri and Branches for the year ending December 31, 1873, were $1,924,918 92, the expenses $1,163,118 02, and the net earnings $761,800 90.

☞ The mineral products of Nova Scotia the past year were 1,051,467 tons of coal, worth $2,659,347; 11,852 ounces of gold, worth $219,290; 3,500 tons of iron, 120,000 tons of plaster and 2,820 tons of freestone.

Projected Maine Railroads.

A newly chartered company styled the St. Croix and Mattawumkeag, intends to build a railroad from the European and North American at Danforth, Me., southward to a connection with the St. Croix and Penobscot in Princeton, about 30 miles.

The recently chartered company of the Missalonskee and Kennebec, proposes building a rail road from Augusta, Maine, northward about twenty miles to West Waterville, to be a southern extension of the Somerset Railroad.

The Maine Legislature has granted a charter to the Sagadahoc and Cumberland Company to build a railroad from Portland, Maine, northeast through Yarmouth, Freeport and Brunswick to Bath, about 35 miles, parallel and close to one of the Maine Central's lines.

☞ The Hoosac Tunnel is certainly approaching completion, the operations of the contractors now being practically confined to the western end and section. Between the east end and the central shaft only twenty men are now employed in clearing out the loose rock remaining in the bottom. In this section the work remaining to be done is to construct the central drain and to lay the permanent track. Between the tunnel portal and the railroad station, a distance of about two thirds of a mile, the road bed is substantially ready to receive the ballast.

☞ Isaac H. Sturgeon, of St. Louis, commissioner to examine the Texas and Pacific Railway, reports that he examined 169.12 miles from the boundary between Louisiana and Texas, west via Marshall to Dallas; 74 miles from Marshall, north east to Texarkana, and 56.18 miles from Sherman east to Brookston. He reports that the road is well built and equipped, and recommends its acceptance.

☞ The Portland and Ogdensburg Railroad Company are busily at work pushing their way through the Notch at the White Mountains. Another section of the road will be completed as far as the old Crawford House by June, and cars will be running to that point by the 1st of July next.

☞ The gross earnings of the Quicksilver Mining Company, of New Almaden, Cal., for the year 1873 are reported at $827,169, the expenses $398,666, leaving a net profit of $428,503.

☞ A party of engineers has been placed in the field to finish the location of the line of the Chicago and Illinois River Railroad from Chicago to Streator, via Joliet and Wilmington.

☞ The earnings of the Gilman, Clinton and Springfield Railroad for the three months ending February 28, 1874, were $55,000 02, the expenses $35,333 24, and net earnings $19,666 78.

☞ Fourteen locomotives were recently shipped from Philadelphia to Odessa, on the Black sea.

☞ The Michigan Legislature has extended the time of the completion of the Marquette and Mackinaw Railroad till December 31, 1877.

☞ The Central Railroad Company of New Jersey have declared a quarterly dividend of 2½ per cent, payable on the 20th of April.

Frederick and Pennsylvania Line Railroad.

The Finance Committee of the Frederick and Pennsylvania Line Railroad Company, composed of Messrs. John Loats, President; Charles E. Trail and D. C. Winebrener, have issued a circular to the holders of the company's first mortgage bonds, announcing their inability to pay the interest coupons due on the 1st instant. The committee state the cause of non-payment was first the very heavy outlay for construction and the want of aid from the city and county of Frederick, the latter occasioned by adverse legislation at Annapolis. They further state that the business of the road is increasing, and express a conviction that they will soon be in a condition to pay all indebtedness, and they ask that the coupons due on first instant, and those maturing on 1st October next, may be created into a preferred debt, bearing six per cent interest from date of maturity. This road is thirty miles long, connecting Frederick city with Littlestown, Pennsylvania, and the first mortgage bonds amount to $250,000, bearing six per cent interest, payable semi annually.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 27, at 328,029 tons, and for the coal year 3,161,051 tons, against 3,585,416 tons to corresponding time last year, being a decrease of 424,365 tons. The bituminous tonnage for the week is 43,488 tons, and for the year 482,060 tons, giving a total of all kinds for the week of 372,517 tons, and for the year of 3,643,111 tons, against 4,088,405 tons to same time last year, being a decrease of 445,294 tons.

T. F. WURTS, Practical Railroad Engineer,
NORTHAMPTON, MASS.
Desires an engagement. Has been employed on R. R location and construction since 1863. References furnished.

WANTED.—A young married man, who is not afraid to work, would like a situation in a R. R. Depot as baggage master or to make himself generally useful. A steady job required. No objections to going any distance. Address, stating amount of wages and kind of work to be done,
O. W. BISHOP, Ludlow, Vt.

PHILIP G. SCHOFIELD,
(Successor to PETER SCHOFIELD,)
MANUFACTURER OF
STEAM VACUUM & HYDRAULIC
GAUGES,
AND
LOCOMOTIVE SPRING BALANCES,
Frankford Road & Seargeant St.
PHILADELPHIA.

The American Wood Carbolizing Co.
Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. The Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.
Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.
67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.
The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.
This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.
Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.
Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.
It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.
The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.
The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.
It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.
Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Direct-Acting Steam Hammers.
Communications by letter will receive prompt attention.
Jacks for Pressing on Car Wheels or Crank Pins made to order.

THE ROGERS
Locomotive & Machine
WORKS,
PATERSON, N. J.,
HAVING extensive facilities, are now prepared to furnish promptly of the best and most approved description, either
COAL OR WOOD BURNING
LOCOMOTIVE ENGINES,
AND OTHER VARIETIES OF
RAILROAD MACHINERY.
J. S. ROGERS, *Pres't.*
R. S. HUGHES, *Sec'y.* } Paterson, N. J.
WM. S. HUDSON, *Sup't.*
THOMAS ROGERS, Treasurer,
44 Exchange Place, New York.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:
F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
F. L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
C. A. JOY, Ph. D., General Chemistry.
W. G. PECK, LL. D., Mechanics.
J. H. VAN AMRINGE, A. M., Mathematics.
O. N. ROOD, A. M., Physics.
J. S. NEWBERRY, M. D., LL. D., Geology and Paleontology.
Regular courses for Mining and Civil Engineering, Metallurgy, Geology and Natural History, Analytical and Applied Chemistry.
Special students received for any of the branches taught. Particular attention paid to assaying.
For further information and catalogues, apply to
DR. C. F. CHANDLER,
Dean of the Faculty.

THE
PHŒNIX IRON CO.,
410 Walnut St., Philadelphia,
MANUFACTURERS OF
CURVED, STRAIGHT AND HIPPED
Wrought Iron Roof Trusses
BEAMS, GIRDERS and JOISTS,
and all kinds of Iron Framing used in the construction of iron roof buildings.
DECK BEAMS, CHANNEL, ANGLE AND T BARS
curved to template, largely used in the construction of Iron Vessels.
Patent Wrought Iron Columns,
Weldless Eye Bars,
for top and bottom chords of bridges.
Railroad Iron, Street Rails, Rail Joints and Wrought Iron Chairs.
Refined Bar, Shoeing, and every variety of Shipping Iron Made to Order.
Plans and Specifications furnished. Address
SAMUEL J. REEVES, President

☞ The following gentlemen have been elected directors of the Panama Railroad Company: Russell Sage, George S. Scott, H. H. Baxter, John M. Burk, Frank Work, George J. Forrest, A. B. Stockwell, S. L. M. Barlow, R. P. Kissam, C. K. Garrison, Charles J. Osborn, T. W. Park and Rufus Hatch. President, Russell Sage.

New York, Saturday, April 18, 1874.

The Agrarian Conflict.

The agrarian wave runs its natural course in the western states. One legislature after another, in the hope of currying favor with the mass of the voters, passes laws hostile to the operation of railroads, all framed in the same dishonest spirit, namely: that they can by enactment take away from the possessor a part of his property without his consent, and divide it among those less prudent or frugal; and, by shaping the action into the semblance of a law, give it a color of right. Iowa has followed Illinois in an attempt to "regulate" the rates of fare on her railroads, the main provisions of the enactments of the two States being almost identical. And now Wisconsin, as will be seen by the particulars in another column, follows the same lead, with a bill more exacting and dishonest than either of the others. We notice by the Report of the Chicago and Alton Railroad Company, that the managers intend to ignore the new bill, and to continue as before as if there were no such thing; and to defend the company before the courts until this attempted legislation is decided to be void and worthless. Although nothing is said on the subject, we doubt not that it will be sustained in the conflict, by other lines, some of whom are trying to conform to the law, and others who are defying it; and in like manner it will no doubt share the burdens if another company should be the first to maintain a defense. Nothing could be more proper; and the shareholders in Illinois roads should be glad of the opportunity.

In Wisconsin, on the other hand, the railroad companies have resolved to carry such passengers and freights as they can profitably under the bill, and to close up such stations where the patrons insist on the provisions of the bill. This will be a bitter experience to both sides, but it will be a very effective one. The issue of the struggle, so far as the courts are concerned, is not doubtful, and is a necessary part of the remedy; but to be effective the minds of the people should be enlightened on the course they are pursuing. This they are likely to be, in a short time. The people of Wisconsin, by this action of their legislature, have given notice to all concerned not to put another dollar into any improvement in that State; and to get what they have already invested out of it as soon as possible. But few of the Wisconsin lines are profitable to the stock or bondholders, many of them depending for their prosperity on future growth or enlargements. If the people had intended to arrest her development, and stop the inflow of foreign capital to her territory, they could not have done it more effectually. The same remarks may apply to Illinois and Iowa also.

It is a consolation to have to report evidences of returning sense and honor elsewhere, at the same time as the above breaches of both. The State of Michigan appointed a commission to examine into the question of railroad accommodation. The Report is an able and manly document. It takes strong ground against the meditated action of the legislature, and shows conclusively that it is rather for the interest of the State to invite capital than to frighten it off by hostile legislation; that the welfare of the State has been promoted and built up by the railroads, scarcely any of which could have been built without foreign aid; and finally, it shows that if the disposition to cheat the creditors of the State could be gratified, it would only result in great and irrecoverable losses to themselves.

The State of California, too, which was one of the most rabid of the communities on the railroad question, having carried an election mainly on what was styled "anti-monopoly" avowments, after discussing a variety of bills threatening the railroads of that State, the Legislature has finally adjourned without taking action on them. It is to be hoped that before it re-convenes, two years hence, the epidemic of popular agrarianism will have run its course, and the people, as well as their candidates, will have their eyes opened to the fact that in attacking industrial corporations they are injuring themselves most.

As we showed lately the operation of Mr. Mc Crary's Transportation Bill, (which has already passed the National House of Representatives, but which probably lies dead in the Senate) though wrong in principle, and containing the seeds of further grievances, is regarded by the many railroad men, as comparatively harmless—the least of the twin evils—because even if it should become law, it would be easier to handle and convince such a Commission as it contemplates, than Congress itself; and moreover it would interpose the shield of the assumed authority of the general government between the railroads and the numerous local legislatures. It would substitute one supervisory body for a great number; and in this way leave the issue to be fought out by the general government, on one side, and the States, on the other.

The Railroad Postal Car Controversy.

Ordinarily it appears to be easy enough for false claimants and jobbers to get their hands into the public Treasury; but it by no means follows that it is easy for just claimants to get their proper dues from the government. Any one who will take the trouble to read the correspondence between Mr. Isaac Hinckley—acting on behalf of himself and others, as officers of corporations employed to carry the United States mails in "postal" cars, or special cars set apart for the carriage and assorting of the mails while in transit—on the one side, and the Post Office Department and certain committees on Post roads, on the other side, will, we think, come to the conclusion that it is a very hard matter to get a just claim satisfied. It appears therefrom that, in the opinion of the Postmaster General, Congress has the right to order the mails sent over the various routes of travel, in

such manner and at such times as it may think proper, and that the compensation for such services is to be settled by the mere dictum of that body, or the executive agents of the government, without any consultation or bargain with the carriers, and without even an attempt to ascertain what the service might be worth to other parties. There appears, indeed, to be a total misconception of the relations of the two parties; the railroad companies are compelled to perform the service, but are also compelled to take whatever Congress chooses to allow them for doing it.

It is a maxim of our fundamental law that "private property shall not be taken for public use without just compensation." Yet there is a class of cases where private property is daily taken for public use, without "just compensation;" or to put the proposition in its positive form, the Government is continually forcing on certain railroad companies losses of their property, and their appeals for redress of grievances are unnoticed. The ordinary rates for carrying common freights by slow trains—cut down as we may properly suppose them to be by competition—are from 50 to 400 per cent greater than the rates allowed for carrying the United States mails by the express trains. Even if there were no other injuries and abuses connected with the system, this fact alone would be sufficient to entitle the complaining railroads to the relief they seek. Mr. Hinckley's own statement of the facts, as they affect the Philadelphia, Wilmington and Baltimore Company, is explicit and conclusive:

"You are aware that the postal cars are very much more costly than ordinary express cars or freight cars, and in this respect closely approximate passenger cars. They are lighted and warmed at our cost, and are run at high speed on passenger trains. As a rule, the New York and Washington postal cars carry five clerks each, whose fares, if paid, would amount to 15.75 cents per mile, while our whole mail pay has been but 13.28 cents per thirty-foot car per mile.

"We are, moreover, furnished with a list of ninety-three persons styled special agents, whom we are required at all times to transport free in our passenger cars; and if we collect fares from any of them, the amount thereof is deducted from our mail pay. We are also required, at our own cost, to have the mails transported between our stations and all post offices within one-quarter of one mile of our stations.

"And we are required to receive much of our pay in orders of the Department upon post offices more or less distant from our line, and bear the cost and risk of collection.

"While paid at the low rate of 13.28 cents per thirty-foot car per mile—which rate may be raised to 16 cents—we are paid by our other customers as follows, viz:—

For express freight on mail trains, per car per mile.....	55 to 65 cents.
For cars of fruit (of which we move 4000 to 5000 per annum) on fast freight trains, per car per mile...	55 to 65 "
For open cars loaded with bricks, and for pig iron and similar freight on slow freight trains, when loaded and unloaded free of cost to this company, on open platform cars, per car per mile.....	20 to 25 "
For new freight cars from car manufacturers per car per mile.....	15 "

"Comment upon such discrepancies as exist in the rates paid respectively by your department and by the public is needless.

"Our mail pay falls short of the actual cost of the service by from $60,000 to $80,000 per annum."

Now it turns out (though this is not mentioned in the correspondence before us) that on some roads, the mail agents not only take their friends along in the cars, but also undertake the carriage of articles of freight and baggage as well. In some instances we learn of kegs of beer being carried in the mail cars; thus obliging the company to run a car, at one end of the train, at a loss, which shall compete with the cars behind it for public patronage. Besides, there is an increasing swarm of passengers carried gratis over the various roads holding commissions from the Post Office Department who have no legitimate connection therewith.

Another constitutional guarantee is to the effect that "neither slavery, nor involuntary servitude, except as a punishment for crime, shall exist within the United States." Yet here, we submit, are cases of "involuntary servitude" in contravention of this provision. These railroad companies have protested, and still protest, against this injustice. They complain that the contract does not provide such a just, reasonable, and equitable compensation as the fundamental law and common dealing requires. With as much color of right, might the authorities compel the roads to carry for nothing, as for less than it is worth—the principle of invaded rights is the same. All the companies ask is the right to be treated with; the right to make a bargain; and that there may be no mistake of their disposition to deal fairly with the Government, they have offered to leave the disputed points to disinterested, suitable arbitrations.

Some persons may ask: why this reluctance on the part of the authorities? The answer is not easy to give. Either in the head or the heart of somebody there is an obstacle. The railroad companies very wisely refuse to purchase their remedy by bribery; but insist upon securing their rights openly and by the force of their justice. Nor does the injustice end here; other companies besides those carrying the mails in special cars, have other like causes of complaint. The Pacific Railroad Companies, for example, are allowed only such rates for carrying the mails across an uninhabited desert and lofty mountains, as are common in the more densely settled territory—although the Acts of Congress, on which their construction was undertaken, specially provide that the compensation should be the "ordinary" and "reasonable rates" paid for similar service to other parties. But they are allowed far less, and are nevertheless compelled to perform the service.

Of course, it is proper that the mails should be carried regularly and with despatch; the railroad companies do not resist this; nor do they (as is sometimes asserted) propose to discontinue carrying the mails, but only to cease carrying them in special cars.—The Executive may compel them to take the mails; it cannot, however, compel them to do it for nothing; nor at a loss, except as an act of usurpation and tyranny. Now, the Post Office Department is not self-sustaining, and as long as the people's representatives insist on sending such quantities of free printed matter, and in carrying such masses of material, long distances, at rates that cannot possibly be remunerative, so long must this deficit be made good out of taxation. But we submit that certain railroad companies aught not to be called on to pay fifty times their proportion. If their complaints are left unheeded, there seems to be no consistent or dignified course left for the complaining companies to take, but to carry the mails in the baggage cars as before.

Northern Central Railway.

At a general meeting of the stockholders of the Northern Central Railway Company, held in Baltimore on the 9th inst., to discuss the question of leasing the road to the Pennsylvania Railroad Company, Mr. J. D. Cameron, President of the company, presented the following written statement:

"Gentlemen: I am instructed by the directors of your company to say that in a letter received by them yesterday from Mr. Thomson, President of the Pennsylvania Railroad, that it was his intention and desire to have your lines of road critically examined by a railroad expert, and to have laid before you the result of his negotiations in all detail, but owing to a serious and unfortunate illness, which prostrated him at the beginning of his labors, this desire has been frustrated. Feeling great anxiety to have an offer made to you to-day, the members of the board urged Mr. Thomson to make a proposition for a lease. He declined, as at present advised, to make one exceeding six per cent on your stock. Such a proposition he did make, and we report it to you without comment for your acceptance or rejection.

"It has been their desire, and the efforts of the directors have been constant to induce the Pennsylvania road to make a higher offer, but as their views have been criticised and commented upon they prefer to be relieved from all further negotiation in the matter, and if it is the desire of the stockholders to continue the negotiations in view of the fact that Mr. Thomson has not been able to get for his or your information the report of the expert, we would suggest that a committee of stockholders be appointed at this meeting to meet a committee of the board of the Pennsylvania road."

The proposition to lease the Northern Central Railway to the Pennsylvania Railroad Company at six per cent, was, on motion of Mr. L. S. Gittings, almost unanimously rejected.

At the suggestion of Mr. Cameron, Mr. John Hulme offered a resolution that a committee of five stockholders, entirely disconnected with the management of either road, be appointed to examine into the affairs of the Northern Central, and to confer with the Pennsylvania Railroad Company in regard to a lease or a guaranty of dividends that will prove satisfactory to the stockholders of the Northern Central, and that said committee report the result of their labors at an adjourned meeting; also that the committee have power to fill vacancies that may occur in their body by resignation or death.

This resolution was adopted, and the following committee appointed: John Hulme, chairman; Lambert S. Gittings, M. B. Greensfelder, H. C. Borie, and J. H. Williams.

The following resolution, offered by Mr. Cameron, was adopted:

Resolved, That for the purpose of providing for the existing floating debt of this company, and for such terminal and other facilities and improvements and equipments as may be necessary to properly conduct its business, as well as to provide for existing mortgage debts on its property and franchise, the board of directors are hereby authorized to create a consolidated mortgage of $10,000,000, to secure bonds of that amount; said bonds to be issued in such sum or sums, either in sterling or dollar bonds, and at

such time, and to mature respectively at such dates and bearing such rate of interest as the board of directors may from time to time deem for the best interests of the company, of which six millions shall be set aside and retained by the trustees to be applied by the board to provide for the payment of the existing mortgage bonds now issued as the same may from time to time mature, and so much of the residue thereof as may be required shall be applied to the extinguishment of the floating debt, and the balance of said residue shall be appliable, at the discretion of the board, to such further construction and equipment as the interest of the company may require.

Mr. Hulme offered a resolution that an expert be employed to prepare a correct statement of the affairs of the Northern Central Railway Company, and report his statement at an adjourned meeting of the stockholders, and that the committee appointed to confer with the Pennsylvania Railroad Company, be directed to call a meeting, and report the result of their conference at as early a day as possible. The resolution was adopted, after which the meeting adjourned.

Providence and Springfield Railroad.

The road of this company was put in operation August 11, 1873. It is 22 miles in length, extending from the general passenger depot in the city of Providence to the village of Pascoag, in the town of Russillville, Rhode Island. The capital stock of the company is $500,000, all paid in, with a right to extend to $1,000,000. Bonds to the amount of $500,000 have been issued, guaranteed by the city of Providence, 20 years to run, with interest at 7 per cent per annum. The receipts thus far have exceeded the current expenses and interest on the bonds, although the freight department has not been in full operation nearly all the time. This road, as its name indicates, is intended to be constructed through to Springfield, Mass., a distance of 71 miles; making a saving of 25 miles between Providence and Springfield and the West. The office of the company is at Providence, R. I. The officers are: William Tinkham, President; L. M. E. Stone, Treasurer and Superintendent; and Jabez C. Knight, Clerk.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey, present to the Stockholders their Report for the year 1873, including the general balance sheet at the close of the year.

The comparison made of the receipts, expenses, &c., of the past year with those of the year preceding it, includs those of its branches, as well as those of the Lehigh and Susquehanna Railroad and branches run under lease, the whole 180 miles of main line and 112¼ miles of branches having been operated as one concern.

The Lehigh equipment is included in the general statement of equipment, which also includes that of all the branches; and the repairs of the same are included in the general expense accounts.

SERVICE OF THE ROAD.

The service of the whole road, as compared with that of the previous year, has been as follows:

	1873.	1872.
Miles run by passenger trains.	1,439 117	1,398,147
" merchandise "	.1,116,760	1,060,742
" coal trains	.2,445,611	2,142,348
Total by transportation trains.	5,001,478	4,601,237
Miles run by wood gravel and construction trains	265,247	288,654
Total miles run by trains	5,266,725	4,889,891

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1873, with the previous year, gives the following results:

	1873.	1872.
Number of passengers	4,401,326	4,478,518
Miles traveled by passeng'rs.	48,448,769	49,272,020

No account is here taken of the commuters, 2,500 in number, or the free passengers. The falling off in the number and mileage of passengers, while the receipts have increased, is owing to the fact that monthly tickets have been introduced, of which large numbers have availed themselves.

A similar comparison of merchandise business gives as follows:

	1873.	1872.
Number of tons carried	1,440,580	1,490,580
Tons carried one mile	85,725,870	88,560,282

In this case also, though there is a reduction in tonnage and mileage, there is an increase in receipts. This is explained by a large falling off in freight on which little was made, which was more than counterbalanced by an increase in more profitable freight.

A similar comparison of the coal business gives the following results:

	1873.	1872.
Number of tons carried	3,906,315	3,619,540
Tons carried one mile	335,717,780	294,376,287

Of this coal an ever-increasing proportion is from the coal properties in which this company holds a large interest.

The coal tonnage over the Central Division, since the transportation of coal was commenced, has been as follows:

	Lehigh. Tons.	Lackawanna. Tons.	Total. Tons.
1856	33,325	98,670	131,995
1857	84,841	209,950	294,791
1858	122,923	417,726	540,649
1859	182,277	455,681	638,958
1860	268,906	590,863	854,769
1861	254,845	568,869	823,214
1862	314,195	502,375	816,570
1863	435,927	613,954	1,049 881
1864	474,221	675,743	1,149,964
1865	509 819	494,687	1,004,506
1866	511 076	778 173	1,289,249
1867	513,425	855,620	1,369,045
1868	765,657	853.188	1,618,845
1869	733,485	822,567	1.556,052
1870	997,504	1,054,680	2,052.184
1871	1,244,998	632.066	1,877,064
1872	1,638,591	689 626	2,228,217
1873	1,996,872	485,460	2,482,332
Total	10,978,387	10,799,898	21,778,285

There was an increase in Lehigh Coal of 458,281 tons, and a decrease in Lackawanna Coal, of 204,166 tons, on the Central Division.

EQUIPMENT.

The company now own 241 engines, of which 233 burn hard coal and 8 wood. The condition of these engines is reported as follows: 178 in first-class order; 27 in good working order; 17 require general repairs, and 28 are now in shops repairing. During the year 2 new passenger engines, 12 new freight and 2 new shifting engines have been added to the equipment. One engine has been condemned as unfit for service.

The equipment of cars is as follows: 114 first-class and 12 second class passenger, 36 baggage and smoking, 10 baggage and mail, 8 express, 401 8-wheel and 7 4 wheel house freight, 82 8-wheel stock, 18 8-wheel and 71 4-wheel caboose, 413 8 wheel platform, 312 8-wheel gondola, 1 8-wheel pavilion, 191 6 wheel and 14 4-wheel iron and lime, 609 8-wheel, and 14,231 4-wheel coal, 367 4-wheel gravel, 18 6-wheel and 5 4 wheel wood rack, 4 8-wheel derrick, 4 8-wheel tool, 48 8 wheel work (flat) and 1 4-wheel scale cars.

During the year the following additions have been made to the car equipment. There have been purchased 2 passengers cars, 270 4 wheel coal cars and 50 6 wheel iron cars. There have been built in the company's shops, 50 box cars, 12 work train flat cars and 1 iron car, all 8 wheeled; and 2 4-wheel coal cars. The following changes were made: 2 first class passenger cars were changed to combination cars; 1 first-class passenger car, 1 second-class passenger car, 6 6-wheel iron and lime cars, 142 8 wheel coal cars, 1 6-wheel wood rack car, and 1 8 wheel flat car have been broken up or destroyed.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses of both roads for the year 1873, compared with 1872.

Receipts:	1873.	1872.
Passengers	$1,409,044 21	$1,391,209 29
Merchandise	1,920,102 76	1,894,640 84
Coal	5,462,863 05	3,718,286 90
Mail	23,015 00	19,499 95
Express	26,114 50	26,417 16
Rents	21,927 99	19,618 90
Miscellaneous	18,298 47	17,771 70
Car service	....	33,323 25
Total receipts	$8,881,365 98	$7,120,717 99
Expenses:		
Running expenses	$1,773,496 22	$1,594 286 09
Fuel consumed	397,348 09	346,360 21
Repairs of road	704.421 60	884,084 11
Repairs of engines	323,892 46	324 817 17
Repairs pass'ger cars.	86,788 61	72 978 98
Repairs freight cars.	58,883 96	80.618 98
Repairs coal cars	285,085 07	306,909 80
Repairs of buildings, bridges, docks, &c.	131,071 74	164,186 34
Repairs of tools and machinery	34,871 78	41,440 67
Exp. Ashley Plains	81,752 00	73 711 57
Expense account	180,153 14	182 240 62
Miscellaneous exp	72,475 07	96,027 92
Ferry running exp	77,414 69	90,032 00
Ferry boat repairs	20,473 82	29,662 85
Car service	87,956 45	....
	$4 215,584 20	$4,236 806 31
Balance net earnings.	$4,665,781 78	$2,883,911 68

The gross receipts per mile run have been as follows: From passenger trains, 98 cents against $1 00 in 1872; from merchandise trains, $1 72 against $1 79; from coal trains, $2 23 against $1 74. The average receipts per mile run from all trains, have been $1 69 against $1 46 the previous year.

The gross expenses per mile run have been 80 cents, against 87 cents the previous year, showing a steady increase in the economy with which the road is operated.

The following table shows the receipts, expenses and net earnings, from the beginning of 1853 to the present time, including, since 1870, those of the Lehigh and Susquehanna Division.

	Receipts.	Expenses.	Net Earnings.
1853	$349,018	$197,629	$151,389 cr 43 p. c.
1854.	378,145	197,349	180,796 or 48 "
1855.	393,729	208,856	184,873 or 47 "
1856.	553,479	258,308	295,171 or 53 "
1857.	682,314	350,502	341,812 or 51 "
1858.	836 934	345,614	491,320 or 58 "
1859.	971,702	385 716	585,986 or 61 "

FINANCIAL CONDITION.

The balance sheet will be found at the end of the report. The following is a statement of the financial operations during the year:

Credits:

Balance cash January 1	$218,685 71
Gross earnings Central Division	5,369,013 09
" L. & S. Division	3,512,352 89
Convertible bonds of 1902, issued	1,887,700 00
Newark Branch bonds assumed	600,000 00
	$11,587,751 69

Debits:

Ordinary expenses, both Divisions	$4,215,584 20
Railroad Car Trust of Philadelphia, paid off	52,735 59
Grading	61,314 10
Masonry	17,337 60
Railway superstructure	160,902 95
Bridge superstructure	34,350 77
Land damage	11,616 97
Engineering	7,207 71
Newark Branch	571,567 16
Perth Amboy Branch	222,600 18
Lehigh Division, construction	362,000 00
Jersey City station	250,000 00
Station houses	113,573 22
Engines	231 100 58
Passenger cars	10,783 30
Freight cars	86,681 49
Coal cars	57,368 53
Coal stocks	804,225 59
Lands, material, &c., increase	24,810 22
Interest account for year, balance	868,658 71
State taxes for year	69,496 03
Rent of Lehigh and Susquehanna Railroad	1,150,303 63
Dividends for year, 8 per cent	1,600,000 00
Accounts receivable, increase	887,976 98
Balance cash, December 31	262,806 18
	$11,587,751 69

The profit and loss account stands as follows:

Gross earnings during the year		$8,881,365 98
It has been debited as follows:		
Ordinary expenses	$4,215,584 20	
Rent of Lehigh and Susquehanna R. R.	1,150,303 63	
Interest account	868,658 71	
State taxes	69,496 03	
Dividend account	1,600,000 00	
		7,904,042 57
Balance to credit of account		$977,323 41

Of this surplus $270,895 21 has been applied to the reduction of the valuations of equipment and other accounts, and $34 917 75 to making good the deficiency of last year, leaving $671,510 45 remaining as undivided profits.

BUSINESS OF THE YEAR.

The gross receipts for the year 1873 show a handsome increase over those of 1872, while the expenses of operation and maintenance show a slight decrease. These results are due to the increased tonnage at increased tolls, the higher prices received for coal, the more steady and regular movement of tonnage, the largely improved condition of our tracks, engines and cars, the general freedom from serious accidents, and to the interest manifested by all the officers and employees in maintaining the discipline of the road, and in watching and protecting the interests of the company.

These results would have been still better, had not the panic in September intervened to reduce and derange the general business of the country. In common with other transporters, this company felt its effects, but not seriously, as our statements prove.

For the current year the company are better prepared to do a large business economically than ever before. With a steady, regular trade, they can, if desirable, move 5,000,000 tons of coal to tide and local points. They have all the engines and cars required for this year's business, and the equipment generally was never in a better condition.

The prices for coal and for coal transportation for the current year have been arranged on a basis slightly advanced over 1873, and matters are working harmoniously in the coal trade, with every reason to expect a favorable and steady trade, though not an active one until there is a general revival of business.

The expenses of maintenance and operation for 1873 have been 47 per cent of the receipts, or 3 per cent less than the Superintendent's estimate. If the calculations for the business of the current year are correct, this can be reduced to 45 per cent and continue the improvement of the tracks and equipment.

CONSTRUCTION.

No new work has been commenced on the main line. The straightening of tracks and general improvement of same, and relaying with steel have continued.

The tangent line between Westfield and Plainfield is ready for the tracks; they were not laid last fall, owing partly to the panic, and partly to the lateness of the season when the embankments were completed. The plan of the elevation through Plainfield has been settled, and will now be pushed through as rapidly as possible.

LEHIGH AND SUSQUEHANNA DIVISION.

The second track on this division has been considerably advanced during the year. There are now in the division 105.40 miles of main line, 27.63 miles of second track, 72.49 miles of branches and 85.29 miles of sidings, making a total of 290.81 miles of single track.

During the present year the grading for extensions of the second track will be continued at the most important points, and the tracks will be extended from time to time as sections are ready for the rails.

A handsome brick passenger station-house has been erected at Bethlehem.

STEEL RAILS.

During the current year the laying of steel rails will be continued, and 5,000 tons are already contracted for this purpose. During the past three years 105 1/10 miles of steel rails have been laid in the main tracks of the Central Division, and 41 miles in the main tracks of the Lehigh and Susquehanna Division, a total of 146 1/10 miles. Added to this is the 45 1/4 miles between Easton and Mauch Chunk, laid by the old company before that road was leased, or a total of 191 6/10 miles of steel in the main line. Within the same period the cross ties of the main line have been entirely renewed; hence the expenditure for new ties and iron rails must be comparatively light for the next four to six years. From this source will come the largest reduction of the expense of operation and maintenance.

The steel rails are wearing well, and there have been very few broken or defective ones. The failures have been caused by hidden defects, with very few exceptions.

No company doing a large business can afford, much longer, to continue the use of iron rails.

BRANCHES.

Authority having been given by the stock holders, the branch road extending from Jersey City to Newark 6.22 miles in length has been consolidated with the main line, under the provisions of the charter of the company.

The branch from the main line at Elizabethport to Perth Amboy, 11.81 miles in length, has also been consolidated by the same authority and in the same way.

As the stock of these two roads was already held almost entirely by the company, the change made by these consolidations was really nominal, but simplifies the keeping of accounts.

NEW YORK AND LONG BRANCH RAILROAD.

The long controversy with the lessees of the Delaware and Raritan Canal, in relation to the bridge over the Raritan River at Perth Amboy, has been at last amicably settled; the New York and Long Branch Railroad Company agreeing to enlarge the swing draw to clear openings of 200 feet, and receiving from the Pennsylvania Railroad Company $100,000 toward the expense of the alteration, but without giving them any interest in the bridge.

Work has been commenced on several parts of the Long Branch Railroad, under the stimulus of an agreement by this company to lease the road when completed, and will be pushed forward as rapidly as the money comes in; but there is little prospect of the road being completed the present season. The rails have been laid on the Perth Amboy Branch, from Elizabethport to within a short distance of the place, but no attempt was made to open the branch for the same reasons that kept back the Plainfield tangent.

RIPARIAN RIGHTS.

Another long controversy has been practically settled. The rights claimed by and for this company to the lands under water south of Jersey City, extend in an unbroken body from the Morris Canal property, two miles and a half, to Cavan Point. The title was founded part on the chartered rights of the company, partly on the riparian ownership acquired by purchase for the whole distance, and partly on the charter of The American Dock and Improvement Company.

After long negotiations, an agreement was made in the fall with the Riparian Commissioners of the State of New Jersey for a full settlement of all controversies and suits by the payment of $300,000. For that sum this company and The American Dock and Improvement Company settled the title to this extensive and valuable domain, as also to all other lands under water. A difficulty which arose in the carrying out of this agreement has, it is hoped, been removed by action of the Legislature, and that the arrangement will now be perfected as speedily as possible. This result will be very favorable to the company, as it removes all the doubts about title which have heretofore interfered with improvements at Communipaw, and will insure a much earlier utilization of the property, while it relieves the State from the risk of a decision in the United States Courts adverse to their claims.

LEHIGH AND WILKES-BARRE COAL COMPANY.

During the year various consolidations of coal interests were effected, by which all the properties of the Wilkes-Barre Coal and Iron Company and of the Honey Brook Coal Company were vested in the Broad Top Mining Company, under a very favorable charter, the new organization taking the name of the Lehigh and Wilkes-Barre Coal Company. The coal properties of the Lehigh Coal and Navigation Company also passed entirely, by purchase or perpetual lease, into the possession of the new company, which became thereby one of the largest coal owners and producers in the anthracite region. All the coal interests of the Central Railroad are now united in the Lehigh and Wilkes Barre Coal Stock, of which they hold a controlling interest.

The lands united as above in the hands of the Lehigh and Wilkes Barre Coal Company form perhaps the finest body of coal lands under one control in the anthracite region. They have been carefully selected with a view to compactness and lie together in solid bodies, requiring the least amount of lateral roads and the minimum of transportation to reach a market. Care has also been taken to select first-class properties for purchase in preference to lower priced lands with a smaller body of coal to the acre, or of inferior grades. In variety of qualities they are also unrivalled, varying from the free burning anthracite of the Wyoming Valley, to the dense coal of the Summit mines of the Lehigh Company, which has no rival it its advantages for blast furnaces, &c., where intense heat is required.

The properties are mostly well opened and equipped, and will require but moderate expenditures. At the Summit mines of the Lehigh Company there is a necessity for additional openings and breakers to supply the increasing demand for that coal, which improvements will be started

forthwith. In the Wyoming Valley the Newport purchase will be held somewhat in reserve.

The following is a statement of the coal properties of this company:

	Coal lands. Acres.	Total area. Acres.
Wilkes-Barre lands.....owned	2,320	2,900
Newport & Hanover lands. "	5,600	6,773
Plymouth lands..... "	600	800
Wilkes-Barre lands.....leased	1,325	1,825
Plymouth lands..... "	1,030	1,030
Honey Brook lands .....owned	3,925	12,000
Lehigh & Greenwood lands leased	6,925	9,000
Timber lands..... .....owned	.....	8,000
Total.....	21,725	42,328

There are on these properties 37 slopes and 18 shafts, making 50 openings in all, which supply 26 breakers. The present capacity of production is 3,100,000 tons. By October this capacity will be increased to 4,000,000 tons, which can be readily augmented to 5,000,000 tons whenever the market will take the additional amount.

In 1873 these mines sent to market 2,613,0000 tons, of which 1,640,000 tons went to tide water. The estimated production for 1874 is 3,000,000 tons, of which 1,700,000 are expected to go to tide.

The cost of this valuable property is as follows:

Real estate.....	$13,446 002 19
Coal improvements.....	2,873,640 65
Houses, &.....	163,300 00
Personal property.....	1,183,469 26
Total.....	$17,666,412 10

LEHIGH AND DELAWARE DIVISION CANALS.

The Lehigh Coal and Navigation Company having leased their railroads in 1871 to this company, and having now by the sale or lease of their coal lands to the Lehigh and Wilkes-Barre Coal Company ceased to be coal producers, it became a desirable matter for all concerned that their canals also should be controlled in the interests of the railroad and the new coal company. An arrangement was therefore made by which the Central assumed the management of the canals, agreeing to pay $200,000 for the revenue of the Lehigh Canal, and also to assume the obligations of the lease of the Delaware Division Canal to the Lehigh Company amounting to $188,701 40 per annum. By this agreement all the difficulties arising from a divided ownership of the railroads and the canals are obviated. It being the interest of the Coal Company to send as much coal to market over both routes as the market will take profitably, it now becomes the interest of the Railroad Company also to fill both avenues as full as possible. No great profit is expected from the canals, but no loss is anticipated, and the incidental advantages will be very great. A large reduction has been made in the working organization of the canals, and while at least equal efficiency will be maintained, the reduction in expenses will be considerable. Whatever direct profit is to be derived from the canals will mainly result from the success of these economies.

DIVIDENDS.

Owing to a concurrence of events which made it undesirable to declare dividends in April and October, the system of quarterly dividends has been suspended during the past year.

Semi annual dividends of four per cent each were made in July and January, and a surplus of $671,510 45 carried down as undivided profits. It would have been easy to have divided ten per cent instead of eight, had it not been thought better to accumulate a surplus the past year, and then return to dividends at the old rate of ten per cent per annum the present year, payable quarterly as heretofore.

CONCLUSION.

The lease of the Lehigh Railroad has proved eminently successful. Not a jar has occurred in the relations of the two companies, and it is believed to have worked as well for the lessors as for the lessees. This is shown by the willingness of both parties to enter into the new arrangement, extending the control of the Central over the canals. The best possible results are expected to follow also from the coal investments now consolidated into the Lehigh and Wilkes-Barre Coal Company, fully equal, if not superior to those of the above measures. The stock is thought to be a profitable investment in itself, apart from the advantage of controlling the transportation of its vast tonnage.

The present year begins quietly. After the first three months business is expected to improve. The estimates of the company are for a remunerative coal business, and for the passenger and freight business to remain without particular change. Efficiency and order have been maintained in all departments, and success has followed all their movements.

The total length of road operated is as follows:

Main Line, double track, 74 miles	146 80 miles.
" " 3 and 4 tracks and sidings	86.21 "
Newark Branch, double track.....	11 20 "
Perth Amboy Branch, single track...	17.61 "
Other branches, sidings, &c.....	5.18 "
Total single track.....	267 miles.

BALANCE SHEET, JANUARY 1, 1874.

President.—JOHN TAYLOR JOHNSTON.

Directors.—John Taylor Johnston, John C. Green, Adam Norrie, Sidney Dillon, James Boorman Johnston, New York; Benjamin Williamson, John Kean, Elizabeth; F. T. Frelinghuysen, Newark; Henry D. Maxwell, Easton, Pa.

Secretary and Treasurer.—SAMUEL KNOX.

Superintendent and Engineer.—R. E. RICKER.

Consulting Engineer.—JAMES MOORE.

☞ The officers of the Montreal, Chambly and Sorel Railway, recently elected, are: Felix Geoffrion, M. P. President; Samuel T. Villett, Esq., Vice President; N. A. Smith, M. D. Secretary; James Baylis, Esq., Treasurer.

Baltimore, Pittsburg and Chicago Railroad.

The annual meeting of the stockholders of the Baltimore, Pittsburg and Chicago Railroad Company (Indiana division) was held at Auburn, Indiana, on the 10th instant. The following named gentlemen were elected directors for the ensuing year: William Keyser, John K. Cowen, T. Harrison Garrett Baltimore; George R. Dennis, Frederick, Md.; W. C. Quincy, Columbus, Ohio; John Gorden, Norwalk, Ohio; A. P. Edgerton, Fort Wayne. The board of directors then elected W. C. Quincy, president; W. H. James, Baltimore, vice-president; and J. L. Randolph, Martinsburg, Va., chief engineer. The stockholders ratified the lease of the Illinois division to the Indiana division. The whole line of road from Centerton, on the Mansfield and Sandusky Railroad, to Chicago, a distance 269 miles, will be completed this season. The line will be finished to Defiance within a month, the iron being laid west of Defiance to the crossing of the Maumee river, and east of the junction of the Fort Wayne, Jackson and Saginaw, and the Detroit, Eel river and Illinois roads, at Auburn, to the St. Joseph river. Bridges of iron and wood will be built across the Maumee and St. Joseph rivers. The grading is nearly done, ties being delivered along the whole line.

Steel Rails.

Since the manufacture of steel rails was commenced, experiments have been repeatedly made for the purpose of rolling the flange and neck of the rail of iron, and the head of steel. The trouble has been that the steel, which requires less heat than the iron, would scorch in rolling, but an experiment at the Rensselaer Iron Works at Troy, New York, a few days ago, appears to have entirely overcome this. The *Times*, of that city, states that the success of the rolling depends greatly upon the skill of the heater, and the judicious use of the "clamper." The trial was witnessed by a number of leading ironmasters, and the new rail was cut into small pieces and sent to different manufacturers about the country. The wear on a rail comes on the head alone, and if that is of steel, it answers just as well as a rail made entirely of steel. By this method the cost of a rail will also, it is claimed, be materially reduced.

Asbestos.

The use of abeston as a piston-rod packing appears to be still gaining in favor with engineers, friction having no appreciable effect upon the substance, and however great the pressure of steam, or however high the temperature may be, such packing is said to be unaffected. Recently the statement has been made that this packing in ocean-going steamers, put in more than sixteen months since, is still apparently as perfect as ever. The Anglia, one of the regular trans-atlantic steamers, has, it is stated, made fourteen round trips, having steamed on the same packing over ninety-eight thousand miles. Another device has been proposed in this connection, namely, to place in a ventilating shaft a bag of abestos. This, like cotton, will arrest any solid particles floating in the air, and when much soiled, the abestos can be removed and made white hot, by which all organic matters will be destroyed, and it may then be put back in the shaft.

☞ In the House of Representatives, at Washington, on the 13th inst., a bill for the free exchange of newspapers between publishers and the free transmission by mail of newspapers within the county of publication, was taken up and passed. Yeas, 178; nays, 41.

Wisconsin's Warning to Capitalists.

The Wisconsin Railroad Law passed at the last Legislature is to go into effect on May 1. The railroad managers assert that the regulations might work well enough for a line not exceeding 50 miles in length, but beyond that distance it is ruinous in its requirements. The rates of freight imposed, it is alleged, are under the actual cost of transportation. Section 5 provides that the distance for freight shall be computed from the point where it is received, thus working very injuriously against roads carrying freight contributed by other lines. This provision alone, it is urged, will entirely destroy the great lumber market of Milwaukee. A single fact will show the effect of the law on the railroads of the State. The earnings of the Milwaukee and St. Paul Railway Company last year would have been $500,000 less than they were had the law been in existence in 1873. Its present rates will be reduced from 15 to 45 per cent, while on the other hand the taxes will be increased one-third. At this rate it would be easy to legislate even the most prosperous road out of existence. The Chicago *Tribune* of the 7th, on the same topic, says:

"The first real collision between the people on one side and the railroads on the other, promises to take place in Wisconsin soon after the 1st of May, when the railroad laws passed by the State Legislature take effect. These laws establish specific rates to each class of merchandise on each class of railroads. The rates of transportation by the car load are arranged by stretches of twenty-five miles—that is, there is one rate for hauling a car load twenty-five miles, another rate for the next twenty-five miles, and so on—a different rate for each twenty-five miles up to two hundred miles. The law provides for the summary punishment of any railroad agent or officer refusing to sell tickets, or to receive and deliver freights at the rates prescribed by the act.

"We understand that the Chicago and Northwestern and the Milwaukee and St. Paul companies have been taking legal advice in New York, and that, after a full conference of the directors, a determination has been reached. This is to the effect that it requires 70 per cent of the receipts of those roads to operate them in Wisconsin; that the recent legislation will have the effect of reducing the receipts 30 per cent—that is, to the cost of operating the roads; that if the value of the property is to be destroyed, it might as well be destroyed by defying the law as by obeying it; and therefore, that the officers of the roads shall be directed to disregard the law. This will produce a conflict at once. If a ticket agent, refusing to accept the fare fixed by law, is arrested and punished, they propose to close the ticket office; and if a freight agent is punished, to close the freight office. The trains will run by the offending stations without stopping."

☞ The report of the bureau of statistics show that the total imports for the year 1873 amounted to $624,993,362, against $677,144,579 the previous year, while the domestic exports for 1873 were $606,366,531, against $544,438,789 in 1872, and the foreign exports for 1873 were $24,968,204 against $25,086,083 in 1872. Specie is included in both imports and domestic exports, being $29,749,438 of the former, and $56,263,496 of the latter in 1873, against respectively in 1872 $21,182,004 and $92,295,236. Allowing for the difference in warehouse accounts, the exports for the calendar year are in excess of the imports by $289,831, while for the corresponding period of 1872 the imports exceeded the exports by $108,478,718.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 4, at 328,046 tons, and for the coal year 3,490,005 tons, against 3,913,830 tons to corresponding time last year, being a decrease of 423,825 tons. The bituminous tonnage for the week is 49,069 tons, and for the year 532,062 tons, giving a total of all kinds for the week of 877,115 tons, and for the year of 4,922,007 tons, against 4,022,007 tons to same time last year, being a decrease of 451,848 tons.

☞ The Newtown (Pa.) *Enterprise* says: "The officers of the railroad company once known as the State Line and Juniata, now the Baltimore, Philadelphia and New York, seem to be pushing their projects this spring. Lines are now being surveyed southwest from West Chester toward Baltimore. We understand the president and other officers of the company intend shortly to visit this region, looking toward their connections across Bucks county and New Jersey."

☞ A convention of Southern Railroad officials, Boards of Trade and others, is to be held at Atlanta, Ga., on the 5th of May, to take into consideration the question of direct trade with Europe through what is to be known as the "Liverpool, Savannah and Great Western Transportation Line."

☞ The Highland Street Railway Company (Boston) has declared a semi annual dividend of 4 per cent out of the earnings of the past six months, payable May 1.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

FOUNDRY FACINGS & SUPPLIES
OF ALL KINDS.
Bituminous Coal, Sea Coal, Lehigh, Mineral, Charcoal, Black Lead, &c., &c.
Also Seives, Brushes, Molders' Tools, and all articles required for foundry use.

Trade of the Dominion.

We are supplied with full information respecting the trade of the Dominion for the last fiscal year in the official returns which have been received.

In order to exhibit the growth of our trade during a period of six years, we present the subjoined statement showing our exports, imports, and goods entered for consumption during that period:

Year ending June 30.	Total Exports.	Total Imports.	Entered for Consumption.
1868	$57,767,888	$73,459,644	$71,985,306
1869	60,474,781	70,415,165	67,402,170
1870	78,578,490	74,814,389	71,287,603
1871	74,178,618	96,092,971	86,947,482
1872	82,639,663	111,480,527	107,709,116
1873	89,789,922	128,011,281	127,514,594

It will be seen that our exports rose more than thirty millions and our imports more than fifty millions in six years.

The countries with which we trade and the amount of our transactions with each in the last fiscal year are shown thus:

Countries.	Exports.	Entered for Consumption.
Great Britain.	$38,743,848	$68,522,776
United States.....	42,072,526	47,785,678
France	31,907	2,023,288
Germany	76 553	1,099,925
Spain.....	25,080	477,886
Portugal.....	191,156	75,032
Italy.....	177,282	52,425
Holland	13.142	216,628
Belgium	17,754	346,702
British North American Provinces	2,800,555	1,808,997
British West Indies.....	1,969,543	964,005
Spanish West Indies...	1,624,191	1,143,241
French West Indies...	299,809	43,412
Other West Indian Islands.....	94,950	27,274
South America.....	1,285,334	416,199
China and Japan..... ...	46,466	1,663,390
Switzerland.....	.....	120,514
Australia.....	41,822	388,352
South Africa.....	4,978	97,999
Other countries..... ...	272,976	293,871
Total	89 789,922	127,514,595

Of the exports $9,405 10 were not the produce of Canada; and $56,316,418 of the goods entered for consumption were free goods of which $31,056,873 came from the United States, $21,025,742 from Great Britain: The British American Provinces and China and Japan ranking next in importance. Tea to the value of $1,662,337 was received from the two latter countries, this article being now in the free list. Comparing the goods entered for consumption by Provinces we have the following comparison for two fiscal years:

	Entered for Consumption. 1872.	1873.
Ontario	$36,878,137	$48 245,440
Quebec	47,738,687	54,281,158
Nova Scotia	11,158,591	11,032,717
New Brunswick	9,146,461	10,849,673
Manitoba	1,020,172	1,029,180
British Columbia	1,767,068	2,076,476
Total.....	$107,709,116	$127,514,594

The foregoing figures embrace both dutiable and free goods. Taking the former separately we find the total imports of the Dominion to be made up as follows:

	Dutiable Imports. 1872.	1873.
Goods paying specific duties	$3,061,675	$3,455,566
do. sp. & ad val..... ..	7,467 825	6,047,579
do. 25 p. c. do..... ...	834,393	899,942
do. 15 p. c. do..... ...	49,111,574	52,616,682
do. 10 p. c. do..... ...	1,061,113	1,511,261
do. 5 p. c. do.....	4,121,898	5,816,328
Total.....	$65,758,478	$70,847,358
Add entered for consumption in:		
British Columbia	$1,767,058	....
Manitoba	1,020,172	1,029,180
Moose Factory.....	....	82,708
	$68,545,718	$71,409,196

Although the total value of the 15 per cent list is greater by about three and a half millions, we note a decrease in nearly all articles coming under the head of dry goods:

	Dry Goods. 1872.	1873.
Clothing	$549,239	$876,865
Cottons.	10,182,154	10,076,214
Hats, caps and bonnets...	861,896	788,110
Hosiery	404,404	435,376
Linen	1,149,062	967,888
Parasols and umbrellas...	128 765	102 658
Shawls.....	90,584	87,959
Silks, satins and velvets..	2,598 884	2,266,511
Woollens.....	11.785,351	11,194,927
Total.....	$27,690,289	$26,796,008
Decrease.....		894,286

In order to appreciate the change that has occurred in our dry goods trade it is only necessary to call to mind the fact that the two preceding years showed an increase in these articles of over 60 per cent instead of the moderate decline of about 3¼ per cent last year.—*Toronto Monetary Times.*

Railways in South America.

From Buenos Ayres we learn that the Minister of the Interior had signed the contract with Mr. Clark for the railway from Buenos Ayers to Chile; the estimated cost is nearly six millions sterling; the length 840 miles, mostly over level pampas; and the Argentine guarantee amounts to £300,000 per annum, besides an unconditional bonus of £20,000 yearly from the Chilian Government; the maximum elevation in the Andes is about 16 000ft., and no gradient exceeds 1 in 30, whereas the Oroya line in Peru is 15,000ft. at the highest, and has gradients of 1 in 22; the term for concluding the line to Chiloe is seven years—that is, by February 1881; but Mr. Clark hopes to complete it sooner, being only 39¼in. gauge, and a premium of £2 000 per month is offered if ready before that time. A contract for another railway had been signed in favor of Mr. William Furness, from Mercedes to Corrientes, 150 miles at £8,160 per mile, 39¼in. gauge, crossing a level country somewhat broken by water-courses. This line will be a kind of continuation of the East Argentine, though of different gauge, connecting Corrientes on the Parana with Concordia on the Uruguay. The Government had also called for tenders for a railway from Tucuman to Jujuy, 220 miles, at or under £8,700 per mile, with 7 per cent guarantee, tenders to be opened at the Government House on August 8 thus allowing time for English competitors. This line will have to cross hilly country, and will form a prolongation of the Central Argentine system, the total length from Rosario to Jujuy being little short of 900 miles, or forty-eight hours by train. The line from Cordoba to Tucuman was advancing steadily, and 100 miles were expected to be shortly opened to traffic. The Dolores extension works were also progressing rapidly.—*London Railway Times.*

☞ Advices of the 27th March from Seattle, Washington Territory, say that the Seattle and Walla Walla Railroad Company are prepared to build the first section of their road. Work will be commenced about the 1st of May, or as soon as the route is definitely located by the engineers, who are now surveying the line.

☞ An election for officers of the Nevada County Railroad Company was held on the 31st ult., and John C. Coleman was elected President, F. G. Beaty, Vice President, and George Fletcher, Secretary.

The Self-Lighting Kerosene Lamp!

LIGHTS YOUR LAMP IN AN INSTANT!

No Removing the Chimney!

NO ELECTRICITY!

No Lucifer Matches!

Thousands View it with Perfect Admiration.

No more Houses, Stores or Railway Trains set afire by the Carelessness of Matches.

There are few inventions which spring into such sudden and universal popularity upon the first introduction as was achieved at once by this

Self-Lighting Lamp.

This valuable patent has nearly 17 years to run. You can at once see the advantage of owning and controlling the

EXCLUSIVE RIGHT OF MANUFACTURE

and sale of these goods in a single County in this densely populated State, or indeed any other State.

A SELF-LIGHTING KEROSENE LAMP!
A SELF-LIGHTING GAS ATTACHMENT!!
A SELF-LIGHTING HAND LANTERN!!!
A SELF-LIGHTING TORCH!!!!

We feel confident in our ability to offer to enterprising men of moderate capital, in the purchase of Territory, such inducements that they will have no cause to doubt the results.

IT SELLS AT SIGHT EVERYWHERE.

Just the thing long needed for **Railroad Cars** and Officials, **Depots, Stores, Dwelling Houses** and **Factories.** Every such place will have them at once.

Thousands of these Self-Lighting Burners have been sold during the past season in the New England States alone. What better proof need we ask for its merit and growing popularity?

WE ASSERT WITHOUT HESITATION

They are the best selling and most money-making inventions ever put on this or any other market for sale.

The price is within the reach of all. We have goods now ready for delivery, and any man can commence today to make a small fortune in the sale of these goods alone.

Call and see it in practical operation.

Or enclose one dollar for a sample Burner.

One dollar for Gas Attachment.

Two dollars for a Torch, two dollars and a half for a Self-Lighting Lamp, and they will be sent with our terms for territory to any part of the country.

OFFICE AND SALESROOM OF

"The Universal Self-Lighting Lamp Co."

No. 563 Broadway, New York.

AMERICAN RAILROAD BOND LIST.

American Railroad Journal.

Saturday, April 18, 1874.

Stock Exchange and Money Market.

Pending definite legislative and executive action on the currency and banking questions at the National Capital, business in the financial and commercial lines has been more or less embarrassed and depressed; operators in most instances evincing decided reluctance to make very free ventures while the uncertainty, which has so long been damaging the industrial interests, continues to prevail. There has been less activity noted in the Money market, with rates quoted easier for all responsible borrowers, the range having been from 3@5 per cent on call, and 5½@7 per cent per annum, in the discount form. The demand for accommodation, from all sources, has been less urgent, and lenders have been quite prompt in responding to the calls of their customers, for aid. The City banks have been gainers in the deposit line, and have enlarged their loan and discount averages, while the U. S. Sub-Treasury at this port has lost slightly in both forms of specie and currency. The U. S. Sub Treasury in this city closed the week with a currency balance of $37,021,688 or $314,397 less than the preceding week; and a coin hoard of $55,487,920, or $517,669 less than on the previous return. The City banks, in their last weekly exhibit, indicated a further reduction in their specie and legal tender averages. The City bank exchanges, during the week, were $427,751,038, or a daily average of $71,291,839. The customs revenue of the port, during the week, was $2,293,018, of which $2,177,018 were in coin certificates. The deposits of the City banks show an increase of $1,200 300; the legal tender notes a reduction of $1,409,300, and the specie reserve of $210,200. The banks enlarged their loan and discount average $2,552,600, and their circulation $6,800. The City banks reported their average of gold last week at $23,835,400, and their greenback average at $55 573,800. Their deposits stood at $238,691,700. The loan item was about 293⅝ millions. The circulation was about 26¾ millions.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349 millions.

Government has received about 77 millions from internal revenue, thus far in the current fiscal year.

Gold has advanced slightly, on a livelier inquiry, chiefly speculative, stimulated by the various reports and rumors from Washington. The extremes of the price have been 113⅜@114⅜ closing at 113¾ as against 113⅝ on Wednesday of the preceding week. The specie outflow, last week, was $596,914. The imports of specie at this port since Jan. 1, have been $1,188,066, against $1,055,631 same time last year. The customs demand for Gold last week ave aged $388,000 a day. Foreign Exchange has been in moderately active demand, closing steadily, with Bankers' sixty day bills on London quoted on Wednesday at $4 85@$4 85⅝; sight bills on London, at $4 88@$4 88½. The week's exports of Domestic Produce have been to the currency value of $5,199,462.

Government securities have met with a comparatively prompt sale, chiefly to investment buyers, at full and buoyant prices. The offerings of most issues have been limited. U. S. sixes of 1881 closed on Wednesday of this week at 121½@121¾; U. S. Five-Twenties of 1862, 118½@118¾; U. S. Five-Twenties of 1864 at 120@120¼; U. S. Five-Twenties of 1865, 121⅜@121⅝; U. S. Five-Twenties of 1865 consolidated, 119⅜@119⅝; U. S. Five-Twenties of 1867, 120⅜@120¾; U. S. Five-Twenties of 1868, 120⅛@120⅜; U. S. Ten-forties at 115⅛@115⅜; U. S. Fives of 1881, (Funding Loan) 116⅛@116⅜; Six per cent. currency Sixes from 117@117¼.

State and Railway bonds have been moderately sought after since our last, at generally steady rates. Central Pacific first mortgage six per cents have been in fair investment demand closing firmly at 95@95½. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been in request at 55@56. Railway and miscellaneous share property has been less freely dealt in, with values quoted irregular though closing more firmly.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $11,278,078, against $6,251,858 same week last year. The exports of domestic produce are $5,199,462, as against $5,421,753, last year. The exports of Gold and Silver, $596,914, as against $912,814 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,331,000, as against $2,433,968, same week last year.

General business has been less active, since our last. The Metal trade has been very slow. We now quote: Eglinton Pig Iron at $36@$37. Glengarnock $39; Coltness, $44; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $40@42 50. Some 500 tons American Rails sold on p. t. Ingot Copper has been quiet, but steady. The Breadstuff business has been moderately active with prices generally quoted firmer toward the close. Provisions have been less freely dealt in, as have likewise been Tobacco, Seeds, Hides, Leather, Naval Stores, Petroleum, and Groceries, with values quoted irregular. Cotton has been more sought after and quoted at the close dearer. Wool, quiet but steady. Ocean freights more active, with rates generally higher.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns;—

New York.—Atlantic and Pacific R. R. pref., 15½; St. Louis, Kansas City and Northern pref., 25; Rensselaer and Saratoga R. R., 109; Mo., Kansas and Texas R. R., 10; St. Louis and Iron Mt. R. R., 15¾@16; George's Creek Coal, 126@140.

Erie Railway.

At a meeting of the directors of this company held on the 15th inst., Mr. Watson stated that he had executed a contract with the London Banking Association for the issue of $15,000,000 of the bonds of the company, which was approved by the board. He also reported that $25,000,000 were subscribed for the bonds, being an excess of $10,000,000 on the bonds offered. The subscription price is to be paid before the 1st of July. Alluding to the charges made by Mr. Dunan, he denounced them as baseless and fraudulent. He was engaged in an examination of the accounts, and he hoped soon to be able to refute Dunan's allegations. He asked that Messrs. Raphael, Morgan, and other stockholders in London, should unite in appointing a public auditor to come to this country for the purpose of examining the company's accounts to date, which was also approved by the board. It is understood that the auditors will be Messrs. Turquand, Young and Co., and Messrs. Quilter, Ball & Co., of London.

☞ The St. Louis and Iron Mountain Railroad Company, the Arkansas Branch and the Cairo, Arkansas and Texas Railroad Company have been consolidated under the title of the St. Louis and Iron Mountain Railway Company, Thomas Allen president. A proposition to include the Cairo and Fulton Railroad in the consolidation is shortly to be voted on by the stockholders.

BANKING-HOUSE OF FISK & HATCH.
No. 5 NASSAU ST.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which, at present prices, are very desirable for investment.

We are also selling the CENTRAL PACIFIC GOLD SIX PER CENT. LAND BONDS at 85 and accrued interest, secured by first mortgage on nearly 12,000,000 acres of the company's lands in California, Nevada, and Utah.

FISK & HATCH.

Illinois Central Railroad.

The statement of this Company for the month of March, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,597.91 for	$18,686 18
Acres Free Lands Sold	160.00 for	2,240 00
Total sales during the m'th of March, 1874	2,757.91 for	$20,926 18
Total of all	2,757.91 for	$20,926 18
Cash collected in Mar., 1874		$38,745 67

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$275,040 00	$70,712 00	$345 752 00
Passengers	102,884 12	42,177 85	145 061 97
Mails	6,375 00	3,059 24	9,434 24
Other sources	64,625 00	2,680 76	67,305 76
Tot'l Mar.'74.	$448,924 12	$118,629 85	$567,553 97
Total actual earn'gs, Mar., 1873	$532,937 95	$127,821 44	$660,759 39

EARNINGS AND EXPENSES, FIRST QUARTER.

Earnings whole line 3 months	$1,860,428 89	$1,685.558 96
Operation expenses	1,157,117 09	880,468 59
	$703,311 80	$805,090 37
Increase in net earnings, 1874		$101,778 57

☞ The Rochester *Union* says that the New York Central and Hudson River Railroad have awarded additional contracts for ballasting and laying the new double tracks from Buffalo to Albany. The work from Oneida to Albany has been awarded, but it is not certain that the parties will enter into the contract. The work of grading for the new tracks through the Mohawk Valley is progressing rapidly. It has been nearly completed between Utica and Schenectady, except at Little Falls and Palantine Bridge.

☞ Both houses of Congress have passed the bill providing that the act of 1793 for enrolling and licensing ships or vessels employed in the coasting trade shall not be construed as extending to canal boats or boats employed on the internal waters or canals of any State. This bill removes the cause of much complaint in New York, Pennsylvania, New Jersey, Maryland, and Delaware, where last year many canal boats were seized for alleged violation of the license and enrollment acts.

Eastern (Mass.) Railroad.

A special meeting of the stockholders of this company was held in Boston on the 8th inst. for the purpose, as stated in the call for the meeting, "of ratifying the bonds of the corporation to the amount of two hundred thousand pounds sterling and interest, issued under vote of the Directors of March 31, 1873. Also for the purpose of authorizing an issue of bonds to the additional amount of four hundred thousand pounds sterling and interest, in pursuance of an Act of Massachusetts of March 23, 1874, entitled an 'Act to authorize the Eastern Railroad Company to confirm its bonds already issued and for other purposes.'"

The meeting was called to order by John W. Wooldredge, the President of the company, who read the call, after which the minutes of the last meeting were read.

Mr. William G. Russell offered the following resolutions, which were unanimously adopted:

Voted, That the Eastern Railroad Company ratify the issue of bonds of the Corporation to the amount of two hundred thousand pounds sterling and interest, heretofore made under the authority of its directors by vote of March 31, 1873, and adopt and acknowledge the same as the valid and binding obligations of the Corporation.

Voted, That the Corporation authorize the further issue by its directors of its bonds to an additional amount, not exceeding four hundred thousand pounds sterling, said bonds to be made payable in not exceeding twenty years from their date, with interest at six per cent per annum, payable semi-annually.

☞ At a legal town meeting held at Exeter, N. H., on the 13th inst., to see what action the town would take in relation to aiding the construction of the Exeter and Salisbury Railroad, it was voted, that the town exchange their bonds for a like amount of the bonds of the road, properly secured by mortgages, etc., and that the whole subject be referred to a committee of five, to report at an adjournment. After the committee was appointed, the meeting adjourned to the 21st inst.

☞ The Nevada, Grass Valley and Colfax Narrow Gauge Railroad Company was organized at Nevada City on the 28th of March, and the following directors elected: T. W. Sigourney, R. W. Tully, Niles Searls, John C. Coleman, Edward Coleman, William Watt and J. N. Lakeman. Fifteen per cent of the amount subscribed has been paid in, and work is to be commenced on the road immediately.

☞ The contract for the completion of the New Castle and Pittsburgh Railroad has been made, the track to be in running order by August 1st. This opens up a new route from Pittsburgh to the oil country, intersecting large coal fields.

☞ H. F. Barrows has been elected President, H. N. Duggett Treasurer, and W. J. R. Bronson, Clerk of the Attleboro' Branch Railroad Company. The directors are: H. F. Barrows, H. N. Duggett, W. J. R. Bronson, Stephen Richardson, and A. A. Folsom.

☞ Mr. D. H. Conklin, has been appointed Superintendent of the Gilman, Clinton and Springfield Railroad. Address, Springfield, Ills.

☞ John G. Thompson has been appointed Commissioner of Railroads for Ohio.

☞ The Oil City *Derrick* says that "a pleasant flutter has recently been excited in the community by a report that the Shenango branch of the Atlantic and Great Western Railway would be extended through to Brady, taking in Petrolia and Martinsburg on its course. The road is already graded to North Washington, whence is the most feasible route by the line indicated in the above report. Surveys have been made and the chances for passing through this place are very favorable."

☞ The receipts of the Province of New Brunswick from all sources, including Dominion subsidies, were $568,549 66, which with a balance from 1872 of $123,337 gave a total disposable sum of $691,886 71. The amount actually expended was $540,486 33, leaving a balance of $151,400 38. The estimated revenue for the current year to 31st October, 1874, is $572,175 20.

☞ The sections of the Western Counties (Ca.) Railway, northwards from Yarmouth, amounting to upwards of 18 miles, are under contract and in a fair state of forwardness; respectable subsidies from both the Dominion and the Local Governments have been guaranteed, and negotiations for the balance of capital which may be needed have been set on foot.

☞ The Wilmington *Every Evening* says: 'The preliminary survey of the Delaware Shore Railroad (between Pennsgrove and the West Jersey Railroad) is now being made, under the provisions of a special charter. When the line is completed and the ferry boats between Wilmington and Pennsgrove are running, a new route to Cape May will be opened, which will be fifty miles shorter for Southern people than by way of Philadelphia."

T. F. WURTS, Practical Railroad Engineer,
NORTHAMPTON, MASS.,
Desires an engagement. Has been employed on R. R location and construction since 1863. References furnished.

PHILADELPHIA.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Overtrading and Healthy Growth.

Complaint is made by the merchants that trade is dull; sales have fallen short of former years; competition is keen, and profits smaller than usual; the Spring season is already half gone, and it is called a very poor trade. There have been no conspicuous failures so far; but it is hardwork to keep going. There must be failure among our merchants, or else improvement in trade. Stores are "to let" by hundreds, and offices by thousands. Even Broadway, which is usually packed to repletion, has many vacant spaces to let. Dullness reigns, both in the haunts of trade and in the real estate markets. Rents are lower, and the returns from city landed property will be light, at the same time that taxes are high.

The case stands differently, however, with those whose trade is in the necessaries of life, and the transporters of field-produce. We are told that the dealers in exportable produce were never so busy; and in like manner, the manufacturers of home staples, such as sheetings, flannels and coarse goods, boots and shoes, are doing a very fair business.

It has occurred to us that there is such a thing as overtrading. For the whole people, it would seem, it is necessary that there should be a limit to their purchases of articles not strictly necesaries. It is only by a reference to the detailed statements of the importations that we can realize what a vast quantity of trinkets, frippery, and useless stuff is purchased abroad; and for which we as a nation, must pay in the products of labor drawn from our mines or from our fields. The importations at this port alone amount to 350 millions per annum, declared value; and are probably to be paid for at the rate of five hundred millions, gold value, in cotton, breadstuffs, meats, or in precious metals. When we come to analyze the list of articles which we purchase we find a very large per centage of them to be either articles of luxury or indulgence, and in some cases noxious also. Champagne, brandy, silks, laces, jewelry, broadcloths, ornaments and knick-nacks, all of which, if we must use them, we ought to make for ourselves, or postpone until we had paid our debts, improved our homes and sheltered our domestic animals. It is a long standing anomaly that we should be sending our raw cotton to England and the food with it, to have it spun and woven into fabrics which are brought back to us, when we have the population the water-powers, the iron and coal in our own hills ready to be put to that service.

Of the five hundred millions of imported articles brought in, New York charges (and endeavors to collect) a thousand millions to the rest of the country; and this is thriving trade. Trade indeed may thrive at that rate; but whenever the goods are pushed upon the country faster than the earning power of the people can pay for them, then the country is the worse for the brisk trade. This is what has happened during the past ten years. The number of firms and persons engaged in splitting up and distributing these goods has multiplied; the ranks of manual labor have been largely drawn upon to assist in this wholesale and retail peddling of merchandize of various sorts. The country swarmed with drummers and agents with sample bags, urging the dealers to buy more. If cash sales could be made all right, but the goods must be shouldered upon somebody else, even if mere paper promises were taken as pay. The business was overdone. The country had over-bought. We have now the reaction and it is a healthy one, besides being inevitable.

The railroads report full lines of produce moving to the usual centres of consumption, with but a very light return traffic in merchandise. The country banks are becoming creditors of the city banks, and the city banks creditors of the New York banks, or more exactly speaking their debits are less. The country is getting out of debt, to its own capitalists and also to Europe. To be effective this process should continue for some time longer. We should not liquidate one set of merchandize indebtedness by another. It is time we ceased mortgaging the best of our railroads and lands for the balance against us, which has been run up for extravagance, and over-consumption. If allowed to continue in this state we shall have a more steady and more healthy business. The over-crowded markets must return some of their numbers to productive industry. Our whole powers should be devoted to the accumulation of the actual wealth of the world, in the products of our soils, our mines, our forests, our waters; and not so large a portion of our energies given to chasing about the world in search of something to buy in order to sell again. It is inherently a bad state of things when the wares seek the customers; the rule should be the other way, the customers should hunt the wares—especially is this true of articles of luxury.

On the whole then we regard the cry of dull trade as not an unmixed evil. We shall all be the better for it one day. The currents and channels will be set to the altered state of things. Our country is young and blessed with an ingenious people, and unsurpassed natural facilities. It is a mistake to suppose that it can be made or unmade by a legislative enactment; or that this bill, or that veto, can ruin it. The United States can stand a good deal of ruining of that kind and still be a pretty good country to live in.

☞ Olympia (Washington Territory) advices of the 7th instant announce that work on the Olympia and Tenino Railroad commenced that day in good earnest. Citizens turned out en masse, closing up every place of business, and devoting the day to hard work on the grade.

How the Railroad War Ended.

THE BALTIMORE AND OHIO AND PENNSYLVANIA IN AMITY—HISTORY OF THE DIFFICULTY—TERMS OF THE ADJUSTMENT.

As was briefly indicated in the *Sun* of Wednesday, the war which has been waging between the Pennsylvania and Baltimore and Ohio Railroad Companies for four months past is now ended, the terms of adjustment, which have been amicably agreed upon, to go into effect on Monday next. The history of the causes which led to the very serious quarrel between these great companies, and the basis upon which it was finally settled, are interesting. Upon the opening of the Baltimore and Potomac road, in July last, the Pennsylvania Company, controlling the line between New York and Washington, via York, Pa., opened that route for through travel, ignoring the Philadelphia, Wilmington and Baltimore and Baltimore and Ohio roads. This line was much longer than that via Philadelphia, and it was understood was resorted to only with a view of obtaining favorable terms through the Union tunnel, (passing through Baltimore,) and effecting satisfactory arrangements with the Philadelphia, Wilmington and Baltimore Company for a connection at Bayview, on the eastern border of this city. Upon accomplishing these results the Pennsylvania Company abandoned the York route, and then began its efforts to divert to the new route via Bayview and Union and Potomac tunnels the entire passenger business between New York, Philadelphia and Washington. This scheme was temporarily interrupted by the freshet in August, which did great damage to the Baltimore and Potomac road, but did not injure materially the old and substantial road of the Baltimore and Ohio between this city and Washington.

In September, however, the Pennsylvania Company, controlling the New York end of the route, (the road through New Jersey,) by persistent efforts managed to get into their cars nearly all the passengers South bound, and carried them through by the Baltimore and Potomac line. From Washington, however, where the old established route was better known, passengers preferred the double track road of the Baltimore and Ohio Company, and the singular feature was presented of almost the entire South bound business going via the Baltimore and Potomac, and that North bound via the Baltimore and Ohio route, obliging the roads between Baltimore and New York to haul in reverse directions many passenger cars almost empty. This continued during the autumn, with numerous embarrassments to the passengers seeking the Baltimore and Ohio road, such as requiring them to change cars at points upon the route, sending baggage to the wrong depot in Washington; but still it seemed impossible, so long as the cars of the Baltimore and Ohio Company were permitted to run upon the New Jersey road, for the Pennsylvania Company to secure the absolute control of the coveted business between New York and Washington. In view of this the Pennsylvania Company adopted a summary plan, and inflicted a blow upon its rival which it was hoped would settle the difficulty. The Baltimore and Ohio Company was accordingly notified that from and after the following day the cars of that road would not be run upon the New Jersey roads, and a few days subsequently this notice was followed by the issue of a circular to railroad companies throughout the United States that the tickets of the Baltimore and Ohio Company would not be recognized nor baggage by that road checked over the line between New York and Philadelphia.

The war was then begun in earnest. The Baltimore and Ohio Company notified the Pennsylvania Company that unless these objectionable orders were withdrawn and arrangements substituted by which the Baltimore and Ohio Company could obtain a fair share of the travel, and the contract be respected which required six months' notice before through arrangements could be abrogated, retailiatory measures would be adopted. This threat not having the desired effect the Baltimore and Ohio Company, in December last, reduced the rates on western through travel about one half, the theory being that as this route did comparatively little through passenger business, and the Pennsylvania Company four times as much as the Baltimore and Ohio, as a war measure the result would be to cripple the former and attract to the route of the latter company a large number of passengers from the Pennsylvania route, who could be carried at a very small additional cost. The traveling public, always anxious for low rates of transportation, seemed to have taken sides with the Baltimore and Ohio Company. The officers of that company claim that the result exceeded their expectations—the through travel having doubled—and the really excellent facilities of fine cars and first class hotels were availed of by many passengers who otherwise would not have traveled over the line, and the road became all the better and more favorably known for through travel.

The effect upon the Pennsylvania Company can only be conjectured, but as that company very soon began to make efforts to settle the controversy, it would appear to have been serious. Shortly after the commencement of hostilities Vice President Pratt, of the Philadelphia, Wilmington and Baltimore Company, Mr. S. M. Felton, and other friends of both companies endeavored to bring about a settlement, and with that object had an interview with the officers of the Baltimore and Ohio Company. At this meeting it was proposed that a correct basis would be an equitable division of the passenger business, which could only be satisfactorily effected by arranging that trains between New York and Philadelphia and Washington, be run alternately over the Baltimore and Potomac and Baltimore and Ohio routes, thus preventing any confusion with travelers, and securing to each of the rival lines about an equal amount of business. This plan was promptly acceded to by the Baltimore and Ohio Company, but declined by President Thomson, of the Pennsylvania Company. Upon this failure the war went on with renewed vigor, and negotiations were suspended until the recent visit of Vice Presidents Scott and Roberts of the Pennsylvania, and Mr. Felton, to Baltimore for conference. It is understood that at this interview the Pennsylvania Company expressed a willingness to divide the business as suggested, with the proviso, which the Baltimore and Ohio Company would not entertain, namely, that a connection be made at the crossing of the Baltimore and Potomac and Baltimore and Ohio roads near the Relay House, (Washington Branch,) and that all New York and Philadelphia trains be run through the Baltimore and Potomac tunnel, to connect with the Philadelphia, Wilmington and Baltimore Railroad, with a fair compensation for use of track and tunnels between the Relay House and Bayview, thus making the Washington Branch of the Baltimore and Ohio road terminate for through business at the point named instead of at Baltimore. When this difficulty was encountered the officers of the Pennsylvania Company stated that it would be necessary to have a further consultation with President Thomson. Upon their return to Philadelphia we learn that an invitation was extended to the officers of the Baltimore and Ohio Company to meet them in Philadelphia in what it was hoped would be a final conference.

This was declined until the Pennsylvania Company agreed that before negotiations were renewed the right of the Baltimore and Ohio Company to run its trains over the entire line between Baltimore and Washington, transferring them to the Philadelphia, Wilmington and Baltimore Railroad at President street station or Locust Point, in Baltimore, should be acknowledged, and the scheme of the Baltimore and Potomac tunnel, as applied to the business of the Baltimore and Ohio Company, abandoned. Upon this basis the Philadelphia meeting was held, and it was then determined that of the daily trains between New York and Washington, and vice versa, each company should have an equal number—that is that two should be run by the Baltimore and Ohio Company, and one through train between Philadelphia and Washington in both directions by each route.

After this was agreed upon some delay was experienced by discussion between the Philadelphia, Wilmington and Baltimore and the Pennsylvania Companies as to the arrangements, but these have now been adjusted.

It has been agreed that the New Jersey lines controlled by the Pennsylvania Company, and the terminal facilities in New York for passengers and freight, are extended to the Baltimore and Potomac and two by the Baltimore and Ohio Company upon exactly the same terms as are enjoyed by the Pennsylvania Company itself.

The new arrangements go into effect on Monday next, and carry with them a restoration of through passenger and freight rates between all points with which the rival companies compete for business.—*Balt. Sun, April* 17.

Union Pacific Railroad.

The Land Department of the Union Pacific Railroad Company reports the sales of land for the month of March, 1874, at 31,712 acres, for $155,306, or an average price per acre of $4 90. The total sales to March 31, 1874, have been 906,359 acres, for $4,120,302, or an average price per acre of $4 55. The lands belonging to the company remaining unsold, now amount to 11,173,640 acres.

Land grant bonds issued		$10,400,000
Less bonds cancelled by land department	$1,495,000	
Less bonds cancelled by trustees	352,000	
		1,847,000
Leaving bonds outstanding March 31, 1874		$8,553,000
Land notes on hand, March 31, 1874—principal (interest not included)		$2,257,810
Cash in hands of trustees for the purchase of land grant bonds, March 31, 1874		$213,628

West Jersey Railroad.

The following is a comparative statement of the current receipts and disbursements of this company for the years ending December 31, 1872 and 1873:

Receipts:	1872.	1873.
From passengers	$416,040 13	$427,969 66
" freight	210,077 07	215,415 71
" express	24,137 91	25,246 19
" mails	13,244 80	10,765 00
" telegraph	1,091 45	1,018 63
" rents	136 28	441 04
	$664,777 14	$680,856 23
Disbursements:		
Operating road	$373,413 22	$405,129 43
Leases	42,779 11	36,194 31
Interest	125,239 66	129 888 22
Taxes	9,084 52	10,813 91
Sea Breeze House	3,483 64	1,111 53
	$554,000 15	$583,132 40
Net earnings	$110,776 99	$97,723 83
Add balance of previous years		97,219 01
Total		$194,942 84
Dividend No. 15, at four per cent		$54,388 00
Dividend No. 16, at four per cent		54,390 00
Tax on dividend No. 18		1,033 29
Balance of undividend earnings January 1, 1874		85,131 55
Total, as above		$194,942 84

Compared with the previous year, the receipts of 1873 show an increase of $16,079 09, with an increase in expenses of $29,132 25, making the decrease of profits, $13,053 16. The cost of

operating the road in 1873 was 59.53 per cent of gross earnings. The President, in his report, says:

Your Directors, in presenting their "Sixteenth Annual Report," are gratified that they are able, notwithstanding the depressing influences of the past year, to exhibit a healthy increase in the receipts from every source of revenue, and satisfactory improvement in each separate department, as you will find upon examination of the reports of the heads of the same hereunto annexed.

In our last report we stated that, being compelled to vacate the building then occupied as offices by your company, a lot of ground on Federal street, in the city of Camden, had been secured and contracts were being made for the erection of a suitable building for office purposes. The building was completed about the 1st of October and immediately occupied by us, and proves to be well adapted for the business of the company, which it will accommodate for many years to come. The unoccupied portion of the building is rented to the Pennsylvania Railroad Company, which will reduce our actual rent to very little, if any, beyond the amount we formerly paid.

Your Board, through a joint committee of this Board and the Board of Directors of the Cape May and Millville Railroad Company, have effected a settlement of the claim your company held against the Cape May and Millville Railroad Company at the date of the lease of the railroad of the latter company by you, and your treasurer has received in payment of said claim certificates for one thousand and sixty shares of the capital stock of the Cape May and Millville Railroad Company, amounting at par to fifty-three thousand dollars also four hundred bonds of a second mortgage on said railroad of $1000 each, bearing interest at seven per cent per annum, payable semi-annually, on the first days of April and October of each year.

At a meeting of the Board of Directors, held on the thirtieth day of January, 1874, your President and Treasurer were directed to endorse upon each of said bonds the guaranty of this company for their payment.

In compliance with an order of the committee, the stock and bonds stand registered in the name of your treasurer, and cannot be disposed of except by order of the Board.

Your Board refer with pleasure to the uniform courtesy and attention to the interest of the company extended by the various employees as contributing largely to the satisfactory results of the past year.

We submit the statements hereunto annexed as a complete detail of the operations of the company for the past year.

The company had at the close of the year 18 locomotives, 47 passenger, 6 mail, 58 platform, 30 box, 2 stock, 110 four-wheel and 21 eight-wheel dump, 21 lever hand, 17 push and 3 baggage cars. Miles run by engines with passenger trains, 264,617; with freight trains, 93,963, other trains, 17,363—total, 375,942. Mileage of West Jersey engines on foreign roads, 6,220. Mileage of foreign engines on West Jersey Railroad, 4,594. Av. cost per mile run for repairs, fuel, wages, etc., 31.99 cents. Number of passengers carried, 710,485; do. carried one mile, 19,107,460. Av. number of miles traveled per passenger, 26.89. Total net receipts from passengers, $427,969 66. Av. receipts per passenger, 60.24 cents; do. per passenger per mile, 2.23 cents. Cost per passenger, 38.62 cents. Cost per passenger per mile, 1.43 cents. Number of tons of freight carried, 130,115; do. carried one mile, 4,053,772; av. distance each ton was carried, 31.15 miles. Total net receipts, $202,995 01. Av. receipts per ton, $1 56; do. per ton per mile, 5 cents. Av. cost per ton, 91 cents. Av. cost per ton per mile, 2.92 cents. Proportion of current expenditures chargeable to passenger transportation, $274,366 44; do. freight, $118,437 15. Number of miles of road operated, 126.18, viz: West Jersey, 59.48; Cape May and Millville, 41.35; Salem, 16.58; Swedesboro, 10.80. Miles of turnouts, 14.56. Total, 142.72.

GENERAL BALANCE SHEET, Dec. 31, 1873.

West Jersey Railroad Company:		
Capital stock		$1,859,750 00

President.—T. JONES YORKE.

Directors.—Thomas Jones Yorke, Samuel A. Whitney, Horatio J. Mulford, Charles E. Elmer, Coleman F. Leaming, Lewis Mulford, John M. Moore, Strickland Kneass, Josiah Bacon, George B. Roberts, Samuel T. Bodine, George Wood, Thomas H. Dudley.

Secretary & Treasurer.—GEORGE J. ROBBINS.

Superintendent.—WILLIAM J. SEWELL.

Engineer.—WILLIAM N. BANNARD.

The Climax Electro-Plating Company.

This company, which has been carrying on busine s for some years in this city, has recently been wholly reorganized, and their place of business removed from the old, well-known stand in Vesey street to their new and more commodious quarters, No. 25 Beekman street, the entire second and third floors of which building are being rapidly fitted up by carpenters, machinists, &c., to accommodate their largely increasing business, which has entirely outgrown their old quarters.

The company propose, as heretofore, to carry on the work of bronzing, lacquering, dipping, copper, nickel, silver and gold plating, burnishing, replating, &c., and will also make a specialty of the manufacture and plating of ladies' dress ornaments. All kinds of metal articles, such as clocks, medals, gas fixtures, skates, chandeliers, water urns, and similar household articles will be treated by this company in a most superior manner by Wilder's new secret process, which is used by this company only. Articles plated by this process are cheaper, handsomer, and more durable than those treated by any other processes now in vogue; and certain it is, Mr. Wilder's process is far superior in finish to anything we have ever before seen. Some specimens of nickel plating recently shown us, so closely resembled silverware that we at first thought the proprietor was mistaken in saying it was only the ordinary nickel-plating, improved by this company. They will also pay particular attention to the replating and polishing of all kinds of ladies' metal ornaments, such as buckles, clasps, &c., which may have become tarnished by time and usage, and we predict for them a lively business in this line alone.

Mr. W. J. Wilder, the inventor of the above named important process, has the sole superintendence of the chemical and mechanical departments, No. 25 Beekman street, while A. W. Ladd, Esq., as Managing Director, has general charge of the company's affairs at their office, No. 5 Dey street.

☞ An adjourned meeting of the stockholders of the New York and New England Railroad Company was held at the office of the trustees of the Boston, Hartford and Erie Company on the 21st. President Hart presided. The committee appointed to confer with the trustees in possession made a partial report, and asked for further time, which was granted. The committee recommend the passage of a vote authorizing them to negotiate for a loan to pay the debt of the trustees, the receiver's certificates of indebtedness, and the amount contributed by certain of the bondholders, the amount of the loan not to exceed $800,000. The vote was passed and the meeting adjourned to the 5th of May.

☞ Mr. A. S. Hewitt has been appointed Receiver of the Montclair Railroad. The foreclosure sale of the second mortgage bondholders will not now take place, as Chancellor Runyon has decided that the sale of the road by the former Receiver to Wm. A. Guest was invalid.

☞ The Keystone Bridge Company, having completed the iron work on the bridge crossing the Mississippi at St. Louis, two weeks inside the contract time, receive a bonus of a thousand dollars per day till the time expires.

Baltimore, Philadelphia and New York R.R.

The Legislature passed a bill consolidating under one charter certain railroad companies, two of which were the Maryland and Pennsylvania, and State Line and Juniata, which are hereafter to bear the name of the Baltimore, Philadelphia and New York Railroad. Work has been going on upon the line of the Maryland and Pennsylvania road near Towsontown for some time past. The consolidated company only desired the privilege of running their railroad and telegraph lines through this State. This has been granted them coupled with certain conditions intended to protect individual rights. Strenuous efforts were made against the passage of the bill by the friends of other corporations, with whose interests the new line was supposed to conflict; but by the exertions of the Hartford delegation the bill finally passed. We have the gratifying assurance, from those in a position to know, that now the road will certainly be built. A large amount of capital, it is stated, is ready for investment in it, and the most liberal encouragement should be given by Hartford and Baltimore counties.—*Belair, Md., Int.*

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING DEC., 31, 1873.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines have been	£1,061,197
Deduct—	
The ordinary working expenses (being at the rate of 65.77 per cent, against 64.95 of the corresponding half of last year)	£697,929
The renewals, &c., of the permanent way and works in the half year debited to revenue	165,177
	863,106
Leaving an available balance earned in the half-year of	£198,091
Deduct loss on American currency	24,593
	£173,498
To this sum of £173,498 has to be added the balance from the net revenue account of last half-year of	1,610
Making a total balance of	£175,108
From this, however, has to be deducted the amount of postal military revenue due for the half-year to the postal bondholders of	16,117
Leaving a balance of	£158,991
Applicable for the following payments, viz:	
Interest on hired cars	£10,007
Interest &c., paid on lands	2,217
Interest on mortgage to Bank of Upper Canada	4,424
Interest on temporary loans, bankers' balances, promissory notes, European exchange, &c	1,155
Interest on British American Land Company's debentures	617
Interest on Montreal Seminary debentures	616
Interest on Island Pond debentures	2,700
Half-yearly instalment on Portland sinking fund	2,568
Atlantic and St. Lawrence lease (in full)	48,615
Detroit line lease (in full)	11,250
Montreal and Champlain bond interest	12,081
Buffalo and Lake Huron rent	32,500
1st equipment bond interest	15,000
2d equipment bond interest	15,000
Balance carried forward	241
	£158,991

Of the sum of £200,000 appropriated out of the proceeds of the new issue of ordinary stock towards the payment of dividends, the sum of £80,454 was reserved in trust to meet the dividend on the first preference stock, payable on 1st March, which has been paid.

Comparing this half-year with the corresponding period of 1872, the gross receipts show an increase of £94,518, or 9.77 per cent. There was an increase in the passenger receipts of £22,890, or 6.45 per cent, and in the freight receipts of £71,685, or 11.78 per cent. The total number of passengers carried was 1,073,204 against 984,525; and the quantity of freight was 836,012 against 797,935 tons. The average receipt per passenger was 6s. 4d. against 6s. 6d., and per ton of freight 16s. 3d. against 15s. 4d. The increase in the freight department of 38,077 tons and £71,685 receipts shows an average of 43s. 4d. per ton against the general average of 16s. 3d. per ton, establishing conclusively that the increase in this branch of business has been in the "through" or long distance traffic. The following is the usual comparative statement:

		Average per passenger.			Average per ton.	
Half-year.	Passengers. Nos.	s.	d.	Freight. Tons.	s.	d.

The operation of changing the gauge in the middle of the half-year seriously affected the traffic receipts for two weeks, and during the fortnight there was a decrease of about £26,000. The monetary panic which occurred in the United States in September disastrously affected the whole commerce of America. The increase from the completion of the change of gauge to the close of the half-year has been 33,800 tons, and £79,135. Up to the beginning of September the rates for freight were maintained at about the same figures as in 1872, but almost immediately after the panic they fell. The expenses for the half-year amounted, including the renewals as charged in the ordinary revenue accounts, to £863,106, or 81.33 per cent of the gross receipts; as against £793,293, or 82.07 per cent for the corresponding six months of 1872. Excluding the renewals, the ordinary working expenses were 65.77 per cent against 64.95 per cent. There was a total increase of expenditure for the half-year of £69,813—at the rate of 8.80 per cent against an increase of 9.77 per cent in the receipts. This additional expenditure was almost entirely due to the greater amount of work done, the increased cost of fuel and other materials used in the working of the railway, and to the continuation of a higher rate of wages than existed in 1872.

The number of miles of permanent way relaid during the year was 261, of which 230½ were laid with steel, showing an increase in the number of miles relaid with steel of 48, as compared with the year 1872, when 236 miles of permanent way were relaid, of which 182½ were laid with steel. The total length of steel rails laid up to 31st December last was 526½ miles. The charges for maintenance and renewals in the past half-year were, for maintenance £74,059, and for renewals £297,917. In the previous half-year these were for maintenance £74,833, and for renewals £77,055; making a total charge for 1873 of £523,862, of which £18,856 was charged in the June half year to a supplementary account, and £132,739 has been charged in the past half year to capital account; leaving the charge against the gross revenue for 1873 £377,769. Of this sum of £377,769 charged against revenue for 1873, the cost of more than 17,000 tons of rails, mostly steel, is included. It will be remembered that the act of last session directs that 82,000 tons of steel rails shall be provided out of the new capital to be raised. In 1873 about 8,800 tons of this quantity have been supplied, at the cost of £132,739, which is charged to capital account in the accounts for the past half year. This leaves about 23,000 tons still to be provided, which it is proposed to do in 1874 and 1875 in such quantities, within certain limits, as the actual necessities of the line may require. It is intended in the accounts for 1874 to include all charges in this department under the head of maintenance of way, excepting only the cost of the steel rails to be provided and charged to capital in 1874 and 1875. The separate charge under the head of renewals of way will therefore from the end of 1873 be entirely given up. The total train miles run were 3,795,848 against 3,474,208, showing an increase of 321,640 miles. The cost per train mile in the locomotive department was 84.51 cents against 82.14 cents.

The narrow gauge engines supplied to replace the broad gauge engines on the line west of Montreal are of the most modern and improved as well as of an uniform pattern, and they are found to have an increased capacity of at least 25 per cent over those which they have replaced. As the whole number of the new engines was only supplied towards the close of the last half year, which has been exceptionally high in respect of the cost of wages, and materials, their effect upon the reduction of expenditure can hardly be estimated; but although only running for the lesser portion of the half year, the result has been to increase the average loads of freight trains for the whole half year by 7 per cent. This cannot fail to have an effect upon the expenditure, both in this and the traffic department during the present year, as an increase in the train loads means a proportionately larger business done for the same haulage and handling. During the last year 12 narrow gauge engines have been built at the cost of revenue to replace the same number of old engines broken up as against 10 in 1872.

The cost of fuel has been greater than in any previous half year, arising partly from the larger quantity used, but still more to the enhanced price of coal and wood. The continued rise in the price of wood caused by the greater consumption of it throughout the country, and the gradual clearing away of the forests contiguous to the line, forced upon the company the necessity of looking to coal as a substitute, at any rate in the central district of the line, where wood had risen to the highest price, and accordingly the new engines built in connection with the narrowing of the gauge have been adapted for burning coal.

A very important proposition has, however, been made, which if is highly probable will be carried out. It is to obtain a supply of coal for the western portion of the line from the Alleghany Valley, about 200 miles from Buffalo by railway, via the International bridge. If this arrangement is carried out, the price paid for a considerable portion of the coal supply would be decreased from 15 to 20 per cent, and, as it could be obtained in winter as readily as in summer, the necessity for absorbing capital in the storing so large a quantity as at present, would not exist.

The traffic expenses for the half year amounted to £224,338 against £200,423 in 1872, or an increase of £23,915. In 1874 this department will receive considerable relief from the reductions which have taken place in the cost of labor and materials, and from the greater capacity of the new engines requiring much less labor in proportion to the quantity of freight hauled, so that it is not unreasonable to anticipate a lower percentage of expenses than in the past year. The most complete results from this cause will, however, not be produced until the gauge of the line

east of Montreal has been changed. The item of rent of rolling stock has been increased by a sum about equal to the decrease in the tolls paid to other companies.

The total addition to capital during the six months is £1,014,884. The principal items of expenditure are: £771,132, which includes the cost of narrowing the gauge west of Montreal, providing 150 new engines, 800 new cars, and 2,500 new car trucks, and converting 64 broad gauge engines to the 4 feet 8½ inch gauge, and £132,739 which is the cost of the steel rails charged to capital for the year 1873. The remaining expenditures consists of various items, the details of which are fully given in the accounts, less a further issue of share capital received from the Atlantic and St. Lawrence Railway in repayment of capital expended on that company's undertaking. The balance of capital unexpended to 31st December last was £720,017, which consists of the calls then remaining to be paid on the recent issue of new ordinary stock, the value of old materials not yet disposed of, and the unsold securities, less the amounts owing by the company in connection with the capital expenditure. The principal portion of this amount is not available until the calls have been paid and the value of the old materials realised. There is also still unissued the balance of £2,500,000 out of the authorized issue of £10,000,000 of new ordinary stock, the proceeds of which will be available after the 1st January.

During 1874 and 1875 about 23,000 tons of steel rails have to be provided at the cost of capital, which, with certain absolutely necessary capital expenditure, will absorb a considerable portion of the unexpended balance at 31st December last.

To meet the wishes of many of the shareholders the directors have agreed to receive payment in full of the remaining calls of new ordinary stock, allowing discount at the rate of 5 per cent per annum.

A considerable number of cars still running upon the line are not the property of the company, but are hired from various companies, and it is thought that the time has come when an effort should be made to purchase these cars, and eventually to endeavour to consolidate all other charges, including the Buffalo Bridge bonds and stock, ranking before the first preference stock, into a single pre-preference or debenture stock.

The following is a list of the hired cars at the 31st December, 1873, viz:—National Car Company's, 500; North American Car Company's, 300; Canada Rolling Stock Company's, 1,000; Canada Railway Equipment Company's, 500; Berlin Falls and Norton Mills Company's, 50; C. S. Clarke's, 40; Schwelkopps, 12; making a total of 2,402 cars.

The cost payable out of working charges to these rolling stock companies for the above cars and for the rental of certain stations amounts to £40,000 per annum, and, as the mileage run by a large portion of these cars in 1873 was materially reduced by the loss of time involved in break of gauge at Stratford, and by the process of conversion itself, the mileage of the same cars running for 1874 will henceforth be larger and the cost to the railway company will be therefore greater.

The par value of the capital loaned by the rolling stock companies amounts to about £400,000. The whole of this £400,000 can be liquidated at early dates, and if replaced by capital issued at 6 per cent, there would be a saving in working charges to the railway of £16,000 annually.

The junction of the Erie Railway with the Buffalo Bridge is expected at an early date in the spring, after the season is sufficiently mild for grading and completing the connection.

The Canada Southern is practically unprovided with rolling stock for its through as well as local traffic, and does not therefore contribute to the tolls of the bridge to anything like the extent which it will do. It is believed that the saving of mileage, time and cost to the Great Western of Canada in exchanging their business with the Erie, at Buffalo, will make it the interest of the Great Western to pass all their Erie business over the International Bridge, instead of the Suspension Bridge as at present.

The latest advices of the foreign tolls taken in connection with the bridge show an average for six weeks of £1,376, or £282, per week, or at the rate of nearly £15,000 a year. With the completion of connection with the Erie, and with a more adequate equipment of the Canada Southern, the foreign tolls over the Buffalo Bridge must be largely augmented; but even at their present figures there would be, including the Grand Trunk annual contribution, in liquidation of Bridge capital of £5,000, out of working cost, fully £20,000 annually available for dividends, were the bridge capital liquidated by the substitution of 5 per cent debenture stock issued at the low figure of 80, which could either be effected by degrees as the foreign tolls accrue or at once by agreement with the Bridge bond and Shareholder.

Taking the above two items of annual saving in the substitution of capital raised at 6 per cent for the present capital invested in the rolling stock agreements and in the International Bridge, there is a total annual sum of £36,000, and to this must be added all additions to the foreign tolls received on the Buffalo Bridge, the whole of which tolls will be released for Grand Trunk revenue purposes.

To effect this object, amongst others, the directors seek to take powers in a bill now before the Dominion Parliament for the issue of a perpetual debenture stock at 5 per cent for the voluntary consolidation, liquidation or purchase of the rolling stock and bridge capitals, as well as of all the pre-preferential Grand Trunk capital, bonds, mortgages, liabilities, leased lines and rentals existing over the first preference stock of the company. Such perpetual 5 per cent debenture stock as issued to take the place of each description of pre-preference capital, as and when liquidated or purchased, and to retain all the rights and privileges that attached to such capital. The whole existing pre-preferences over the first preference stock, including the car and bridge capitals, may, it is calculated, in course of time be redeemed by the issue of £6,750,000 of 5 per cent debenture stock at an average of £90 per £100. In the first instance it may be necessary to accept a lower price than £30, but with the payment of cash dividends on the preference stocks, the value of a 5 per cent debenture stock, covering and mortgaging the entire *corpus* of the undertaking and its rolling stock and equipment, will rapidly appreciate and approach to par as cash dividends are paid on our preference stocks. The directors propose to add to this £6,750,000 £1,250,000, making a total of £8,000,000 5 per cent debenture stock. This £1,250,000 to be available for the general purposes of the company, and for the current year of 1874 not to be issued beyond an amount which shall represent, in the amount of interest payable, the actual annual saving of £36,000 to be realised by the liquidation of the car and bridge capitals. The bill is made subject to the following clause:

"This act shall not take effect unless and until submitted to a special general meeting of the company and accepted by a vote of two-thirds of the persons present or represented by proxy entitled to vote."

At the special general meeting to be called under this clause—probably in the month of May—detailed calculations and estimates will be laid before the proprietors in reference to the above, showing the purposes for which further expenditure is required for the current year and for 1875.

The directors have just received the results of the first five weeks' working of the current half year, that is, from the 1st of January to the 7th of February, and they have the satisfaction of stating that they show so important a reduction in the working expenses that the net revenue in that period has been increased by $129,000, or an average increased profit of about £5,000 per week.

The directors who retire by rotation are Mr. Newmarch, Mr. Gillespie, and Mr. Brydges. Mr. Newmarch and Mr. Gillespie offer themselves for re-election. Mr. Brydges has telegraphed to the board his resignation of the office of managing director, which the board have accepted with deep regret, remembering his long, arduous and devoted services to the company in times of extraordinary difficulty and danger. For the present it is not the wish or intention of the board to fill up the vacancies in the direction caused by the death of Mr. Thomas Baring and the resignation of Mr. Brydges. Two vacancies have occurred amongst the auditors by the acceptance by Mr. Newmarch of a seat at the board, and the retirement of Mr. Grant, though the latter gentlemen has very kindly, at the request of the directors, audited the accounts for the past half year. Mr. Albert Creak has signified his intention of seeking election to one of the vacancies, and, as was explained to the proprietors at the meeting in January last, the directors purpose, looking at the fact that the greater portion of the expenditure is in Canada, to suggest to the proprietors the advisability of filling up the remaining vacancy by the appointment of an additional auditor in Canada, and they accordingly submit the name of Mr. Ramsay, agent for the Standard Life Assurance Company, Montreal, who is duly qualified, and, in the judgment of the directors, in all respects a fitting and responsible candidate for the office. By order,

RICHARD POTTER, President.

The Pennsylvania Railroad Company's Improvements.

The elevator at Washington street wharf, on which extensive additions and repairs have just been made, is now ready for operation with increased facilities. Like all improvements made by the Pennsylvania Railroad Company these are of the most substantial character. The contract had been awarded to Messrs. I. P. Morris & Co., who with their usual skill and exactness in performing what they undertake, have not failed to give satisfaction.

The scales, a very important adjunct on all elevators, the greatest durability and accuracy being required of them, were made at the Philadelphia Scale and Testing Machine Works, Ninth near Fairmount Avenue.

The proprietors of these works, the Messrs. RIEHLE BROS., have made rapid strides in bringing the manufacture of scales and testing machines to a perfection not hitherto attained by the oldest and most experienced houses in this country or Europe. They hold very valuable patents, and we learn they have lately applied for three more of a very important character. They are very particular in sealing their scales up to government standard, and that together with their careful construction on the most approved principles, will insure the correct and reliable weighing of the immense quantities of grain shipped from this point.—*Philadelphia North American, April 6.*

☞ The Uniontown and West Virginia Railroad was sold at Sheriff's sale on the 4th of March to John Snyder, the contractor, to whom the company was indebted in about $40,000. A new corporation, entitled the "Uniontown and West Virginia Railroad Company," was organized on the 8th instant, who propose to complete the road at an early day.

☞ The coal tonnage of the Chesapeake and Ohio Canal for the month of March, 1874, was 6,140, against 5,685 in March, 1873, an increase of 455 tons. The accrued revenue in March, 1874, was $8,751 52, against $6,438 94 in March, 1873, an increase of $2,312 58. The expenses in March, 1874, were $21,900 81.

	1873.	1874.
Six months	$130,400,814	$160,757,524
January.....	20,050,550	23,455,638
February.....	21,139,002	20,725,611
March....	21,982,209	22,909,218
Total produce....	$193,572,575	$227,847,991
Add specie.	49,213,008	29,019,569
Total exports.....	$242,786,583	$256,867,560

☞ The meeting of the friends of the extension of the Chesapeake and Ohio Canal to the Ohio River, which was to have been held on the 21st instant in Washington, has been postponed until May 13.

☞ A trial of a fireless locomotive, made at the Grant Locomotive Works, Paterson, N. J., has proved an entire success. The boiler of this locomotive is charged with highly heated water before starting, from which steam sufficient is generated to move the engine without the use of fuel. On the trial referred to, with water heated to a pressure of 150 pounds to the square inch, the engine ran with an ordinary street passenger car, loaded, a distance of seven miles.

RIEHLE BROS.,
650 North Ninth St., Philadelphia,
New York Store, 93 Liberty Street,
Pittsburg Store, 50 Wood Street.
LATEST IMPROVED STANDARD.

Our Patented Double Beam Iron Lever Rail Road Track Scale acknowledged the BEST.
MAKERS of the NEW TESTING MACHINE.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & Co,
57 Broadway, New York

☞ The "Finance Bill" which passed the U. S. Senate on the 6th inst., and the House of Representations on the 16th, was *vetoed* by the President on the 22nd.

A Remarkable Record.

PHILADELPHIA AND READING RAILROAD CO., CRESSONA STATION, March 2d, 1874.

MESSRS. RIEHLE BROTHERS,
650 North Ninth street, Philadelphia:

GENTLEMEN—I take great pleasure in recommending your track scales, and consider them superior to any of the kind in the country for accuracy and durability. From July 1st, 1866, to Jan. 1st, 1874, we have weighed 11,880,645.11 tons of coal, which, added to the 8,000 000 tons previously weighed, will make in round numbers to date, 19,000,000 tons. Within the last 10 years the scale has been re timbered twice, and the bearings sharpened once, and they are good for at least 10 years more.

Yours respectfully,

(Signed,) A. ROBINSON, Weighmaster.

This make of scale having been thoroughly tried is daily gaining favor. Messrs. RIEHLE BROS. have just put in four new scales for the Pennsylvania Railroad Co., at their elevator, Washington street wharf, Philadelphia, and also two railroad track scales for the Philadelphia and Reading Railroad Company, and one at New Bedford, Mass. These works are a credit to Philadelphia, and are constantly increasing in size and influence.

To Washington in Seven Hours.

The Pennsylvania Railroad Company have commenced running a new through train from New York to Washington, consisting exclusively of parlor cars, to be known as the "Limited Express." It stops only at Newark, Trenton, Philadelphia and Baltimore, leaving Jersey City at 9.30 A. M., and goes through in seven hours. A dining-room car is to be added next week. An additional fare of $2 50 is added.

☞ The Walla Walla *Statesman* of 28th March says that "work on the railroad up to the crossing of the Touchet is completed, and on Thursday last the locomotive for the first time crossed that stream. This comprises fully half the distance to the landing, and overcomes all the bad part of the road. Cars are now ready to transport all the freight that may offer to the river, and when navigation is resumed on the Columbia river passengers will make the first sixteen miles of land travel by rail."

☞ We learn from the Salinas *Index* that the preliminary survey of the Monterey and Salinas Narrow-gauge Railroad has been completed, and the report of the engineers is highly favorable. The road will be about eighteen miles in length, and the contour of the country is such that there will be but little heavy grading and few deep cuts to be made.

☞ The Central Improvement Company of Pennsylvania have a contract for making the Shenandoah Valley Railroad, from Shepherdstown, West Virginia, to the Chesapeake and Ohio Railroad, in Augusta county, Va., a distance of one hundred and thirty-three miles, of which about sixty miles have been graded, and are now nearly ready for the cross ties and railing.

☞ The Portsmouth and Dover Railroad seems to be getting its full share of business. There are six passenger trains daily over the line, connecting with the Eastern Railroad at Portsmouth, and persons familiar with the travel say that the number of passengers carried is unusually large. There are also two freight trains daily, and these seem to be doing a paying business.

AMERICAN RAILROAD BOND LIST.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, April 25, 1874.

Stock Exchange and Money Market.

The Money market has been unusually active during the week, chiefly in the call loan line, and toward the close. The extraordinary depression and irregularity of values at the Stock Exchange, and the consequent urgent needs of the Stock brokers stimulated the demand for Money, and carried the price of temporary accommodation on Monday and Tuesday of the current week up to 7 per cent currency, and, in exceptional instances, however, the same figure in Gold. The latest negotiations indicated excitement and less stringency, with a partial return to 4@5 per cent, on advances to the more prominent firms. The banks were less liberal of aid to the speculative borrowers. The discount market has been comparatively steady, with the best grades of short rate commercial paper in demand within the range of 5½@7 per cent per annum. The City banks have again been gainers in the deposit line, while reducing their loan and discount averages; and the U. S. Sub-Treasury at this port has lost slightly in the line of its currency reserves, while gaining handsomely in the coin board. The U, S. Sub-Treasury in this city closed the week with a currency balance of $36,549,845 or $481,838 less than the preceding week; and a coin board of $57,040,504, or $1,552,583 more than on the previous return. The City banks, in their last weekly exhibit, indicated a further reduction in their specie and legal tender averages. The City bank exchanges, during the week, were $500,297,393, or a daily average of $83,382,899. The customs revenue of the port, during the week, was $2,292,289, of which $2,159,289 were in coin certificates. The deposits of the City banks show an increase of $147,200,; the legal tender notes a reduction of $409,800, and the specie reserve of $621,800. The banks contracted their loan and discount average $201,600, and enlarged their circulation $42,500. The City banks reported their average of gold last week at $23,213,600, and their greenback average at $55,163,900. Their deposits stood at $238,838,000. The loan item was about 293¼ millions. The circulation was about 26¼ millions.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349 millions.

Government has received about 78¼ millions from internal revenue, thus far in the current fiscal year.

Gold has been quoted firmer, on a moderately active movement, mainly speculative, the custom inquiry having been restricted, while the export drain has been light. The extremes of the price have been 113⅛@114⅜, closing at 113⅛ as against 113¾ on Wednesday of the preceding week. The specie outflow, last week, was $503,781. The imports of specie at this port since Jan. 1, have been $1,218,000, against $1,058,888 same time last year. The customs demand for Gold last week ave aged $394,333 a day. Foreign Exchange has been quoted higher on a limited offering of prime bills, but has not been active. Bankers' sixty day bills on London closed on Wednesday at $4 86; sight bills on London, at $4 89. The week's exports of Domestic Produce have been to the currency value of $4,309,253.

Government securities have been quoted a trifle stronger in price, on a fair business, chiefly on investment account, checked, in part, by the very meague offerings of the favorite issues. U. S sixes of 1881 closed on Wednesday of this week at 121⅝@121⅞; U. S. Five-Twenties of 1862, 118½@118¾; U. S. Five-Twenties of 1864 at 120¼@120½; U. S. Five-Twenties of 1865, 121½@121¾; U. S. Five-Twenties of 1865 consolidated, 119⅛@119¾; U. S. Five-Twenties of 1867, 120⅜@120⅝; U. S. Five-Twenties of 1868, 120⅛@120⅜; U. S. Ten-forties at 115⅛@115⅜; U. S. Fives of 1881, (Funding Loan) 116⅛@116¾; Six per cent. currency Sixes from 116¾@117.

State and Railway bonds have been rather more inquired for since our last, but at variable rates. Central Pacific first mortgage six per cents have been in fair request, closing firmly at 95@95½. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been moderately sought after, closing at 55. Railway and miscellaneous share property has been unusually active, but the speculation has been very severely against values, the decline on Monday having been full 5@10 per cent in prominent instances, followed by a very feverish market on Tuesday and Wednesday. The depression on Monday was most notable in the instances of the Columbus, Chicago, and Indiana Central Shares, which fell from 30½@30¾, to 20, on the reported failure of the clique said to have been engaged in the manipulation of this stock for higher figures, and the suspension of the brokerage house, represented as acting for the clique. The heavy fall in the stock weakened and deranged the course of the whole market.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,269,815, against $12,246,613 same week last year. The exports of domestic produce are $4,309,253, as against $6,947,560, last year. The exports of Gold and Silver, $503,781, as against $842,603 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,370,000, as against $2,307,931, same week last year.

General business has shown more animation in the produce line, with Cotton, Breadstuffs, Provisions, Naval Stores and Petroleum generally quoted stronger. The trade in foreign merchandise also shows some increased activity, with more firmness in Groceries and Hides. The Metal trade rules about steady as to values, but is devoid of spirit. The Iron trade is extremely tame, with Eglinton Pig Iron quoted at $36@$37. Glengarnock $39; Coltness, $44; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $40@42 50. The Ocean freight market has been quoted stronger, on a lighter offering of room on berth and charter, checking operation.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The bill passed in the lower house of the Virginia Legislature "to provide for the interest on the public debt" passed the Senate on the 17th, and awaits the Governor's signature. It directs the board, consisting of the Governor, the two auditors, and the treasurer, to pay the interest in certain proportions at such times as they may deem proper, not exceeding four per cent., and having regard to the condition of the treasury. It is very cautious in its provisions, and keeps entirely out of the question all danger of draining the treasury.

☞ The receipts of the Eastern Railroad Company for freight during the month of March exceed that of the month of February by $18,000. The receipts for February were largely in excess of those for the month of January.

BANKING-HOUSE OF FISK & HATCH.
No. 5 Nassau st.

We buy and sell Government Bonds and Gold at current market rates; buy Gold Coupons; buy and sell Stocks and Bonds at the Stock Exchange on Commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the Central Pacific and Western Pacific Gold Bonds, which, at present prices, are very desirable for investment.

We are also selling the Central Pacific Gold Six Per Cent. Land Bonds at 85 and accrued interest, secured by first mortgage on nearly 12,000,000 acres of the company's lands in California, Nevada, and Utah.

FISK & HATCH.

Southern Connections.

The Baltimore *American* says in regard to the through route crossing Virginia:

There is a report that some negotiations in regard to arrangements as to southern connections are a foot. The Baltimore and Ohio Railroad controls the Orange and Alexandria Railroad, extending to Lynchburg, Va. The same road is building a road from Lynchburg to Danville, where it will strike the Richmond and Danville road, controlled by the Pennsylvania road. By a change of gauge on a short extent of road a magnificent through connection to Atlanta, Mobile and New Orleans may be effected. The line is, however, largely controlled by the Pennsylvania Company, and it was rumored that some proposition as to a connection with it was made by the Baltimore and Ohio at the late conference, but from a careful inquiry it cannot be discovered that anything more than an intimation that it would be desirable to effect some arrangement was made.

☞ The Boston and Lowell Railroad began, last Thursday, weighing at Framingham the cars from the West loaded with grain and lumber destined for Lowell and Taunton, and found an excess of 15,000 pounds in one car over the weight billed, of 20,000 pounds, a full car load, which makes a difference of $77 in freight.

The above was a Fairbanks 50 ton 34-ft. Track Scale, sold to Boston and Albany R. R. Co.—*Boston paper.*

☞ At a meeting of the stockholders of the Columbus and Hocking Valley Railroad Company, at Columbus, Ohio, on the 14th inst., the following gentlemen were elected directors for the ensuing year: B. E. Smith, M. M. Greene, W. G. Deshler, William Dennison, Theodore Comstock, W. B. Brooks, Isaac Eberly, C. P. L. Butler, John Greenleaf, John L. Gill, J. D. Martin, S. H. Rippey and S. W. Pickering. At a subsequent meeting of the board, the following officers were elected: B. E. Smith, President; M. M. Greene, Vice President; J. J. Janney, Secretary and Treasurer; John W. Doherty, Superintendent.

☞ Articles of incorporation of the Nevada County Narrow Gauge Railroad Company were filed on the 11th inst. Object, to construct, put in operation and operate a railroad from Colfax to Nevada City, by the way of Grass Valley. Principal place of business, Grass Valley. Capital stock, $400,000, in shares, of $100 each. Directors, J. C. Coleman, Wm. Watt, Edmund Coleman, J. M. Sakeman, Niles Searles, R. W. Tulley and T. W. Sigourney.

The Indestructible Material Co.

It seems to us that the operation of this company deserve something more than a mere passing notice. It is not usual with us, to take special notice of the doings of individuals or private companies, but the nature, and probable extent of business that is likely to be transacted by these people fully justify all that we may say.

In a word, that business is to render all sorts of buildings, public or private, absolutely fire proof; while every kind of structure, whether ships, docks, bridges, &c., &c., and whether constructed in part or whole of wood or iron, are made not only proof against fire, but as against water and weather as well.

The material used in all these operations is Asbestos, which, previous to being applied, is treated and prepared by a certain method and process secured, of course, by Letters Patent belonging to this company, and which are the invention of Gen. Bartlett, the president.

The system is strongly endorsed by the building department of the city, and we are not surprised to learn that Barnum contracted with the Company to make the whole interior of his great Roman Hippodrome, perfectly fire proof. This contract has been completed, and that building may now be considered safe from fire.

Among numerous other contracts taken by this company, we may mention that the magnificent building of the Union Club on Fifth Avenue is now undergoing a process of internal reconstruction by them, and will be rendered absolutely fire proof.

We congratulate the company on its great success, and also the public in having at last found a material that will render our dwellings safe, and a repetition of the disasters at Chicago and Boston utterly impossible.

Railroad Meeting at Marysville.

A letter, dated Marysville, Cal., April 4th, says: A meeting of the citizens of Yuba and Sutter counties was held here to-day, for the purpose of taking steps toward organizing a company to build the proposed railroad from Marysville to a point on the Sacramento river at or near Knight's Landing. The meeting was well attended by the principal men of the two counties. A committee was appointed to solicit subscriptions to the capital stock and prepare for incorporation. A committee will confer with the managers of the proposed narrow gauge railroad from Grass Valley to Colfax, with a view to developing the route of that road by making connection with the Marysville and Knight's Landing road at this place, instead of the Central Pacific road at Colfax. A disposition is shown to push the work with vigor.

☞ The affairs of the iron masters of Pennsylvania are not so gloomy after all. The *Times* has taken pains to send a special correspondent into the iron districts to get at the truth of the matter, and reports that although the iron trade is suffering and depressed, the prospects are mending, and, in fact, quite hopeful. The temporary dullness, caused by the dilatory action of Congress on the currency question, is a drawback to this industry; but the revival cannot be far distant, and there will be a good time in the iron trade again.

Tax on Certified Checks.

The bill which was introduced in the House of Representatives, on the 20th inst., by Mr. Beck, of Kentucky, and on motion of Mr. Maynard, referred to the Committee on Banking and Chrrency, s in these words:

"That from and after the 1st day of July, A. D. 1874, there shall be levied, collected and paid a tax of one-fourth of one per centum, for each month, upon the average amount of circulation issued by any bank, association, corporation, company, or person, including as circulation any certified checks, and all matured other obligations calculated or intended to circulate or to be used as money; and all acts or parts of acts inconsistent with the provisions of this act are hereby repealed."

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 11, at 403,635 tons, and for the coal year 3,908,067 tons, against 4,233,092 tons to corresponding time last year, being a decrease of 345,025 tons. The bituminous tonnage for the week is 61,416 tons, and for the year 598,478 tons, giving a total of all kinds for the week of 465,051 tons, and for the year of 4,506,545 tons, against 4,871,441 tons to same time last year, being a decrease of 364,896 tons.

☞ In response to a resolution of the Virginia Senate, General Asa Rogers, second auditor, has prepared an elaborate statement of the public debt, with the amount and character of the bonds outstanding. The aggregate of the debt of Virginia on the 10th of April was $30,478,741 49, and the amount recognized as portion to be settled by West Virginia, $15,239,370 74.

Genuine Chester Emery.

REDUCTION IN PRICE.

The great increase in the production of the Chester Emery Mine enables us to reduce the price to seven cents for grain and four cents for flours, **with important discounts** to dealers, manufacturers and larger purchasers. The genuine Chester Emery is made from the purest and hardest crystals, and its cutting and polishing qualities are superior to any emery used in this market.

PHILADELPHIA.

The American Wood Carbolizing, Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, May 2, 1874.

The Granger's Road, and the Government Canals.

The Committee on Transportation of the House of Representatives, of which Mr. McCrary is chairman, has made a lengthy report, recommending the construction of a great freight line between Omaha and New York, and suggesting that the United States might advantageously endorse the bonds of such private corporation, to the extent of sixty millions. We give a synopsis of the Bill elsewhere; but there is no need of cumbering our columns with the report, for several reasons. (1.) It is not made in good faith. The committee do not expect to see any such measure pass; nor have they the temerity to ask outright that the government should lend its credit to the scheme; they only hint at it. (2.) The report is not made in the interests of transportation so much as in the behalf of the members of Congress themselves. It is, in other words, a stump speech designed to flatter the farmers of the West and to win the granger's vote. There are interesting facts in it, showing either, that the markets are too far from the grain producers, or the producers too far from market; and that the products cannot be carried from one to the other and leave much profit. (3.) But the intimation that this state of things may be remedied by taxing the whole people, in order to remove this disability from a portion, is unfair; as the act itself would be unconstitutional and intolerable. (4.) Moreover, if all other objections could be swept away, the one fatal objection to such a measure is that there is no stopping place. If the government is to come to the relief of a portion of the population in one locality, all others will presently put in the same claims. The principle of government indorsements must be carried much further, or stop short where it is. (5.) It is not the business of the government to be either building railroads, or advancing money to build them, unless, indeed (as in the case of the first line to the Pacific) they can be shown to be necessary for military and postal purposes, and cannot otherwise be built. (6.) The public treasury is in no condition to justify any drafts on it for this or any similar purposes. (7.) It would be a gross injustice to the three or four great lines which have been built entirely by private capital, extending between the same points, for the government to help build another to compete against them. (8.) The company as now organized claims to have all the legislation they need, and the requisite access to the waters of New York harbor, together with some tremendous advantages in distance and grades; why, then, is this not a proper occasion for the grangers and their allies to put in their own capital, and build and own a road of their own in which there will be no large bonded debt, no watered-stock capital, and hence one from which they may draw immense profits. These are the complaints they make against the existing roads, and yet the chance to reap those still larger profits somehow goes a begging.

The Report of the Senate Transportation Committee, of which Senator Windom is chairman, is a very different document. It has the appearance of a candid, pains-taking and conscientious effort to do something which government may do, for cheap freights. This committee, like the other, push the argument on the constitutional power of Congress to interfere in inter-State commerce to an absurd degree; but at the same time admit that the proposition to meddle with railroads is surrounded with difficulties. Their recommendation that government should undertake the improvement of four or five water ways between the seaboard and the West, although liable to some of the objections above noted as applicable to the Continental Railroad scheme, are more in unison with the existing practice and theory of governmental functions, and are besides judiciously distributed and forcibly urged. Government now provides light houses, deepens channels, and "regulates" the movement of vessels. The distinction between internal and external commerce, river and seaboard waters, inter-State and foreign traffic is so blended and interwoven that it forms an entirely separate and distinct department.

The improvements which the Committee recommend are:

First—Improvement of the Mississippi River.

Second—A continuous water line of adequate capacity from the Mississippi River to the city of New York, *via* the northern lakes.

Third—A route adequate to the wants of commerce, through the central tier of States, from the Mississippi River, *via* the Ohio and Kanawha Rivers, to a point in West Virginia, and thence by canal and slack-water, or by a freight railway, to tide-water.

Fourth—A route from the Mississippi River, *via* the Ohio and Tennessee Rivers, to a point in Alabama, or Tennessee, and thence by canal and slack water, or by a freight railway, to the ocean.

From the fact that this committee have personally examined the routes of the canals and waterways they recommend; and have gathered a mass of valuable statistics in regard to the growth and dimensions of our commerce in farm products, a favorable hearing may be given their recommendations. They commit the government to a yearly expenditure of 25 or 30 millions for some years; which is a fresh departure in expenditures. Nevertheless the measure is judiciously distributed and will command a wide support in the South, the West and Northwest.

There is this permanent and fundamental objection to the spirit of both these Reports, that they teach citizens to look to the government for assistance instead of looking to themselves. Like the other measure emanating from the House Committee, and which now lies in the Senate, it assumes that the intervening finger of government may probably appear in every branch of industry

or occupation. Who is going to keep public officials to their trusts when government is interested with twenty times the number and many times the power they now have? If the government will confine itself strictly to the common defense, and to such other duties as are specially and unequivocally delegated to it by the Constitution, it will have enough to do, and quite as much power as it ought to have. The remainder may be left "to the people and the States respectively."

Chicago, Burlington and Quincy Railroad.

TWENTIETH ANNUAL REPORT.

To the Stockholders of the Chicago, Burlington and Quincy Railroad Company:

On the first day of January, 1873, your company took possession of the Railroad, Branches, and other property of the Burlington and Missouri River Railroad Company, and assumed its liabilities and the control of its affairs.

During the year that road has been managed and operated as a part of the road of this company.

No report was published of the results of the business of that road for the year 1872; and the last report of this company covered only the last eight months of that year. It will be necessary therefore, now to give such statements, not heretofore made, as will furnish to the stockholders the means of instituting a comparison of the results of the business on the entire line for the years 1872 and 1873.

The following is a statement of the entire gross receipts and expenditures of this company for the year ending December 31st, 1873:

From freight		$8 035,348 78
" passengers		2,576,061 25
" mail, and miscellaneous		598,814 68
" Burlington Bridge tolls		195,001 21
Total receipts		$11,405,225 92
Operating expenses, exclusive of taxes	$6,181,514 18	
Taxes paid, in all	253,253 64	
		6,434,767 82
Leaving net earnings for the year		$4,970,458 10
Interest accrued and paid on bonds during the year		1,966,300 22
Leaving a balance of		$3,004,157 88
Out of which has been paid—		
Dividend No. 25	$1,250,127 38	
Dividend No. 26	1,826,642 75	
Rent of track & depot	57,487 44	
Interest and exchange	109,867 78	
		2,744,075 30
Leaving of net earnings for the year over every liability		$260,082 58
To which add surplus at commencement of the year		8,514 272 16
		$3,774,354 74
Deduct interest on bonds accrued but not called for prior to January 1, 1873, but since paid		253,755 74
And there stands to the credit of income account		$3,520,599 00
The amount credited to sinking fund taken from earnings of previous years is		1,179,744 88
And this, added to income credits, makes the amount of surplus earnings		$4,700,343 88

The capital stock of the Burlington and Missouri River Railroad Company on the first of January, inst., was $6 582,552 76.

The Chicago, Burlington and Quincy Railroad Company increased its capital during the year by the issue of certificates to the amount of $1,230,400 00, to take the place of the same amount of stock held by it in the Burlington and Missouri River Railroad Company, and which was canceled, and the outstanding certificates of stock in that company reduced by the like amount; and has also issued, in addition thereto, one hundred and thirty-seven shares, all which were used in the adjustment of dividend No. 25.

These additions carry the stock of this company to $19,897,000, and make the capital stock in the two companies an aggregate of $26,429,562 76.

The number of miles of Burlington and Missouri River Railroad operated in 1873 was the same as in the preceding year, and the gross earnings on that road for 1872 were $3,040,448 25, and on the road of your company, $7,630,408 78, making an aggregate of $10,670,857 03. The operating expenses on the former were $1,729,721 38, or 56.89 per cent of the gross earnings; and, including taxes, $1,975,824 75, or 58.04 per cent. On the latter, the operating expenses were $4 623,374 87, or 60.67 per cent of gross earnings; and, including taxes, $4,942,181 38, or 64.77 per cent of gross amount earned.

From the first above statements it will appear that the gross earnings for the year now closed were $11,405,225 92, as against $10,670,857 03 for the previous year.

The operating expenses were $6,181,514 18, exclusive of taxes, and, including taxes, $6,434,767 82; while for the previous year, aside from taxes, they were $6,359,096 25, and, including taxes, $6,718,166 14. In other words, an increase of gross earnings in the last year of $734,368 89, and a decrease in the amount of operating expenses, exclusive of taxes, of $177,582 07, and, including taxes, $283,398 31, and a clear net gain in the business of the year over that of the previous one, of $974,101 15.

The operating expenses for the two years will compare as follows:

For 1872 they were 59.50 per cent exclusive of taxes, and, including taxes, 62 96 per cent of the gross earnings; while for 1873 they were 54.19 per cent, without taxes, and 56.41 per cent with taxes.

Had it not been for the loss by fire herein subsequently mentioned, there would have been a still further reduction of operating expenses of about two per cent. It is hoped that if no considerable losses are met with in the succeeding year, the operating expenses may be reduced still further.

From the foregoing exhibit it will be seen that the net earnings of the road for the year above operating expenses, taxes, interest on all the bonds of the two companies and on bonds of all the branch roads of the two companies in Iowa and Illinois, have been 10.73 per cent on the combined capital stock of the two companies, as it stands at the date hereof.

In May a fire occurred at Aurora, in which the car shops, supply store, and other wooden structures of the company, were destroyed, together with a quantity of lumber for the manufacture and repair of cars, and a large amount of supplies for the use of the road. Aside from the Insurance received, this loss amounted to $224.231 07, and is included in the above statement of operating expenses. If we had not met with this loss, the net earnings over operating expenses and taxes would have reached $5,194,689 17, with a net gain of $1,198,382 22, and 11.58 per cent on the capital stock.

It will be seen that the interest paid on all branch bonds is charged out the same as the interest on the bond of this company. Attention is called to the matter of interest on these branch bonds, for the reason that in previous years some part of the interest on the bonds of these roads has been charged to construction, because of the unfinished condition they were in at the time the company took possession of them.

The gross earnings of the Burlington and Missouri River Railroad and its branches for the year have been $3,152,288 98, an increase over those of the preceding year of $111,785 73. The actual increase, however, is greater than is shown by this statement; for in the statement of earnings for 1872 is included an allowance in the division of joint earnings made by this company to the Burlington and Missouri River Railroad Company for business brought by it to this road.

The operating expenses of the Burlington and Missouri River Railroad and branches for the year were large by reason of the extensive renewals and repairs elsewhere mentioned, and were $1,916,398 02 exclusive of taxes, and 60.79 per cent of the gross earnings, leaving the amount of net earnings upon that road at $1,235,836 76.

BRANCH ROADS.

Attention is called to the branch roads. There has been a gradual and steady increase in the business of the branch roads, so-called, both in Iowa and Illinois.

In Illinois, for the year ending April 30th, 1872, the earnings on the branch roads then in operation amounted to $661,939 71; and the entire earnings of the company upon the branch road business, to $1,713,633 35. On the same branches for the year now closed, the earnings have been $905,166 40; and the entire earnings upon this branch business in Illinois, $2,049,988 27.

The earnings on the branches of the Burlington and Missouri River Railroad in Iowa, for the year, have been $157,248 24. The entire earnings of the company on the business of all the branch roads, both in Iowa and Illinois, including those local to the branches themselves and on the main line, have amounted to $3,487,277 70, and 88 per cent of the entire gross earnings of the company on freight and passengers. The miscellaneous earnings are not included or apportioned to the branches in the above statement; but if included, it would not materially vary the comparative results.

The proportion of operating expenses chargeable to those branches in Illinois, has been $751,529 79; in Iowa (estimated) $122 129 61; in all, $873,659 48, being 77.05 per cent of the gross earnings thereon.

Again: The earnings, on the branches and main line to and from branches, in 1873, are $3,487,277 70; operating expenses on the branches are $873 659 48; operating expenses on main line on branch business, $1,280,108 35; total operating expenses on branch business, $2,153,767 78; net earnings on branch business in Illinois and Iowa, $1,333,509 92.

These statements will show to some extent the bearing these branches have upon the value of your property. When it is understood that these branches were built, or mainly so, by other parties, and in interests hostile to those of your road, and that they control so large an amount of business as these statements show, the stockholders can well appreciate the extent to which the business of the road would have been affected, had not this company come into the ownership or control of them.

It will be seen that these branches gather up and influence too large an amount of business to be lost, without seriously impairing the property of the company; and that it is certain that if these branches were not now in the ownership or control of this company, this business would have been lost to it, or it would have been received under such strong competition as to have been substantially valueless. Besides, if these branches, reaching your line at thirteen different points as they do, were now in other control, and competitors instead of contributors, the effect would be that nearly the entire business of the company, both that from the branches and that coming directly into the main line, would be under such strong competition as to leave but small profit, and at many points none at all, above the cost of transportation.

Some of these branches, both for their local business and for the amount contributed to the main line, as would be expected, are more valuable than others. But, taking them as a whole, the result shows that the policy of your company, in reference to their acquisition, has been a sound and judicious one.

There have been operated during the year, of

the Burlington and Missouri River Railroad and branches, 448 miles, and the gross earnings thereon have been at the rate of $7,115 65 per mile; and of the Chicago, Burlington and Quincy Road, 825 miles, on which the earnings have been at the rate of $10,003 82 per mile.

The entire earnings collected and distributed over the whole line and branches, show an average of $8,994 65 per mile.

The whole tonnage of the line for the year, amounted to 2,221,741 tons, of which there were of through freight:

Westward	196,314 tons.
Eastward	376,875 "
Local freight, East and West	1,619,552 "

The earnings upon through freight were 1.27 cents per ton per mile. Upon local freight, 2.45 cents per ton per mile.

Total number of passengers carried during the year, Eastward	847,389
Total number of passengers carried during the year, Westward	859,345
Total	1,706,784

The average amount per mile, exclusive of mileage and season tickets, was 3.023 cents.

New connections with Western Roads have been made during the year. The Missouri, Kansas and Texas Road, about 800 miles in length, has been completed to Hannibal, with which your road makes connection, presently, over the Quincy, Alton and St. Louis Road, between Quincy and Hannibal, a distance of about 18 miles. From this connection, though made late in the year, a very considerable business has already grown up, and, prospectively, this road is regarded as among the best of the Western connections of your line.

By an arrangement with the Kansas City, St. Joseph and Council Bluffs and the St. Joseph and Topeka Railroad Companies, your line is brought into connection with the Atchison, Topeka and Santa Fe Road, now about 500 miles in length, the Atchison and Nebraska Road, about 150 miles long, and the Central Branch of the Union Pacific, 100 miles in length, at Atchison, by which it is hoped that the business of your road will be largely increased.

The business interchanged with the Nebraska Roads, especially the Burlington and Missouri River Road in Nebraska, has grown rapidly during the year.

The quantity and quality of the wheat crop of Nebraska, and the great number of Texas and native cattle fed in that State, cannot fail to make this last-named road a valuable feeder, and perhaps the very best with which your road makes connection.

The detailed statement of the freight auditor, attached to this report, will give all needful information relative to the amount of freight transported, and the amount and character of the business with the various connections on the branches and upon the main line.

The construction account has been increased by the addition of $752,882 15; equipment account by $370,707 07. The principal items in the increase of these accounts are:

For cost of steel rail in excess of cost of iron, in Illinois	$168,520 89
For cost of steel rail in excess of cost of iron, in Iowa	86,340 82
Buildings in Illinois, principally on the new shops at Aurora	65,154 62
In Iowa	46,728 45
Locomotives	156,720 00
New freight cars	534,358 96
For new side tracks, of which there have been laid something over seventeen miles	68,443 43

As it is probable that no large additions will be made to the equipment during the ensuing year, or to the buildings upon the line, and as it is not expected that any unusual or new construction is to be undertaken, the construction account for the ensuing year will, in all probability, be less than it has been in any previous year.

At the commencement of the winter, the track of the road was, and still is, in excellent condition, better, perhaps, than ever before, owing, among other things, to the larger amount of steel rail in the track, and the absence of severely cold weather; and this, notwithstanding the expenditures for repairs have been much less during the year than in the previous one.

There have been laid of steel rail during the year, in Iowa, 21.39 miles, and in Illinois, 44.17 miles, making a total number of miles of steel rails now in the track, 199.71 miles.

As stated, there has also been constructed 17.87 miles of new side-track, much of which was in the Chicago yards.

There have been rebuilt 7,133 feet of wooden bridging; 5,686 feet of it in Illinois, on the main line between Peoria and Burlington, and 1,447 feet in Iowa, a large portion of which amount was carried away by the floods of the year.

One hundred wooden bridges and culverts have been filled or replaced with masonry on the Burlington and Missouri River Railroad in Iowa, making 1.08 miles of wooden bridges taken out during the year, the cost of all which has been charged to repairs, except the sum of $5,778 81, which is for the excess of the cost of masonry and iron over wood.

The total length of the main line and branches is 1,268 miles. Total amount of double or second track, 61.5 miles. Total amount of side track on the road, 215.40 miles. It is hoped that the cost of maintenance of track for the ensuing year will be still less than it has been during the one now closed.

There has been brought into the equipment of this company since the last report, the entire equipment of the Burlington and Missouri River Railroad. In addition thereto there have been constructed during the year, 2 passenger coaches, and 7 destroyed by fire; 5 baggage, mail and express cars, and 1 destroyed by fire; 564 freight cars, and 12 destroyed by fire; 4 new way cars, and 60 new platform and coal cars. Ten new engines have been purchased during the year.

The present equipment of the company is as follows: Engines 288; passenger cars 110, pay car 1, baggage, mail, and express cars 63, freight cars 4,132, platform and coal cars 1,697, way cars 115, refrigerator car 1, dump cars 40, wrecking and tool cars 4, pile driver, 1, hand cars 407, rubble cars 357.

The repairs upon cars and locomotives have been well kept up, and the end of the year finds the entire equipment in as good condition, and it is thought better than it was at the commencement of the year.

LAND DEPARTMENT.

It will be recollected that there were grants of land made by the general government to the Burlington and Missouri River Railroad Company, to aid in the construction of their road in Iowa.

Under the several Congressional and Legislative Acts making these grants, there has been a large amount of litigation occasioned by pre emption, homestead and swamp land claims so called, and it has required much time and considerable expenditure to settle the rights of different parties to the land supposed to be covered by these grants.

These disputes are not yet ended, nor is it possible at present to state with certainty what will be the result in some of the pending suits.

The total number of acres, however, which the company may expect to realize under these grants may be stated, with a near approach to accuracy, at 359,708.45 acres.

Of this amount there are affected by unsettled claims (but to which it is hoped the company will be successful in establishing its title) as follows:

By homestead settlers	600 acres.
" pre emption "	6,000 "
" Mills County	14,000 "
Leaving undisputed	339,108.45 acres.

There have been sold of these lands:

January 1st, 1874	220,584.22 acres.
Less cancelled entries	17,882.50 "
Leaving	202,707.72 acres.

at an average of $11 92.3 per acre, aggregating in amount, $2,416,556 78. There remains to be sold, if the title to all the lands shall be made good, 157,006.73 acres, which at the same rate per acre would realize the sum of $1,871,991 24. The price above named is not perhaps an over estimate of the value of the unsold lands, since the rates at which these lands have been sold have constantly appreciated.

For lands sold prior to and during the year 1870, an average of $11 44 per acre was realized, while for those sold in 1873, $12 81 per acre was obtained.

Should this estimated value be made good for the land yet unsold, there will be received from the entire grant the gross sum of $4,288,548 02.

The land has mainly been sold on a credit of ten years, under contracts bearing interest at the rate of six per cent per annum, and imposing upon the purchaser the payment of all taxes subsequent to the sale. In order that the company should be relieved of the burden of taxation on the lands as soon as practicable and the fund derivable from them be made to bear interest, it was deemed best for the company to secure the earliest possible sale. A land department was accordingly organized, and every effort made to bring the lands to the favorable notice of purchasers, both in this country and in Europe.

The rapidity and the price at which sales have been made have fully realized every reasonable expectation.

This result, however, has not been reached without very considerable expenditure. Prior to April 1st, 1870, at which time the lands were first brought into the market, there had been expended in examining, surveying, appraising the lands, &c., $97,586 32. Expenses of land department since that time, $193,149 04.

These expenses, apportioned upon the gross amount of lands sold, including canceled entries, (for the amounts forfeited under them more than make good the sums expended upon the lands covered thereby,) leaving the unsold lands free, makes the average expenses 87.56 cents per acre on lands sold during the four years, and 7.82 per cent upon the amount of sales.

There have been paid for taxes on the whole grant, $123,693 41, which apportioned on the lands sold, leaving balance of grant free, gives an average amount of 56.08 cents per acre, and 4.69 per cent on the amount of such sales.

The amount of expenses and taxes apportioned on the lands sold, leaving unsold lands free of charge, gives an average of $1 48 per acre for lands sold, and 12.01 per cent on the gross amount of sales.

The total expenses of the land grant to date, including preliminary expenses prior to April 1st, 1870, above mentioned, and all taxes paid, is $414,428 77, an average per acre upon the whole grant of $1 15, and upon lands sold, leaving balance of grant free, of $2 01 per acre. Since all the machinery necessary for the sale of these lands has been organized, and is now in operation, it is believed that the cost per acre for the sale of the balance of the land will be considerably reduced.

The gross amounts of receipts of this department have been as follows:

Principal	$299,339 51
Interest	347,041 47
Town lots and incidental receipts	2,793 63
Total	$649,174 61
From which deduct amount paid expenses and taxes as above	414,428 77
Leaving balance	$234,745 84
Amount paid over to sinking fund	$212,863 75
Bills receivable and cash	21,882 09
	$234,745 84

It will be observed that there has been expend-

ed in the sale of lands, payment of taxes, etc., only $67,887 80 of the amount received on account of principal of the purchase money of lands sold, the balance having been received on account of interest.

The net proceeds from this grant are pledged to the payment of principal and interest of $5,058,850, of what are designated in this report as Burlington and Missouri River Railroad seven per cent land grant and road mortgage bonds, by the terms of the mortgage securing the same, and are to be paid over to the trustees in that mortgage, who are also the custodians of the sinking fund for that purpose.

Attention is called to a portion of the report of the land commissioners herewith published, which will give you more in detail the transactions of the land department for each year since its organization.

The capital stock of the Burlington and Missouri River Railroad Company and branches has been increased during the year by the conversion of bonds, $357,000. By the issue of stock previously subscribed and fully paid up during the year, $8,280. In all, $365,280. This increase, however, has been counterbalanced, and a further reduction in the stock of that company made by the retirement and cancelation of $1,230,400, in certificates theretofore held by this company, and for which its own stock was substituted, as previously stated in this report.

The bonded indebtedness of that company has been reduced $357,000 by the conversion into stock as above stated.

The capital stock of the Chicago, Burlington and Quincy Railroad Company has been increased $1,244,100, by the substitution of its own for the stock of the Burlington and Missouri River Railroad Company, canceled as above, and the issue of 137 shares in addition used in the adjustment of dividend No. 25, as also hereinbefore stated.

The bonded indebtedness of this company has been increased $19,000 by the exchange of that amount of seven per cent mortgage bonds of July, 1873, for a like amount of Ottawa, Oswego and Fox River Valley Branch Bonds, and $27,650 by the issue of its plain seven per cent bonds in the adjustment of fractions under the distribution of bonds, made for the purpose of equalizing the stock of the two companies, as of the 31st of December, 1872.

A summary statement taken from the treasurer's report shows that the entire property, of whatsoever kind, and liabilities of the company, on December 31st, 1873, were as follows:

Permanent investment		$58,060,454 84
Capital stock	$26,429,562 26	
Bonded liability, bearing interest, including branch bonds	25,483,825 00	
Scrip issued to pay for Northern Cross Road, ot bearing interest	103,750 00	
Amount due bondholders Northern Cross Road, as per settlement with them	256 206 95	
Amount of bills and accounts payable, over bills and accounts receivable and cash	500,947 54	
		52,779,292 25
Leaving a surplus of		$5,281,162 07
SURPLUS ACCOUNTS.		
Sinking fund		$1 179,744 88
Income account		8,520,599 00
Total undivided earnings		$4,700,343 88
Profit and loss		321,870 98
Surplus fund		259,447 23
		$5,281,162 09

The treasurer's report, to which reference is had, will give details and additional information relative to the assets and liabilities of the company, its receipts and disbursements during the year.

Many of the stockholders have been apprehensive of injury to their property by reason of legislation in Illinois relating to the freight and passenger tariffs on the roads of that State. It is true that litigation has been occasioned by that act, but it is not thought that it will be of a seriously injurious character in its result. On principle, as well as by authority, it is now understood that the property of a stockholder in a railroad company is as much private property as though of a different kind, and entirely individual in its character; and that, equally with other and individual property, it is entitled to the protection and security thrown around it by the safeguards of the constitution. Your directors believe, that while it is true in reference to such corporate and private property that the State may regulate its use and the manner thereof, so far as the peace, good order, health, comfort, and safety of the public are concerned, it is none the less true that it cannot go beyond this and abridge or take away the right of the railroad company to operate its road, and to fix, adjust, and collect reasonable tolls and charges for transportation thereon. These rights and the money invested in order to their use and exercise, are private property, and not to be destroyed or impaired by legislation without the consent of the owner. So vital and fundamental is this principle under every just administration of law, that it cannot be supposed that it will ultimately be disregarded, either in State or Federal legislation.

The stockholders, therefore, may be assured, that beyond the expense and inconvenience arising from this legislation, there is and can be no ultimate danger to their property from the enactment of the laws referred to, or others of similar nature. On the other hand, good, doubtless, will result from the discussion of the relative rights of corporate and other individual property. Abuses which have grown up in the rapid development of the railroad systems of the country will be corrected; more economical management of railroad property will be had, which will be alike beneficial to the general public, the shipper and the stockholder; the intimate relation of railroad interest to the agricultural, commercial, and other great interests of the State, will be better understood, and it will be seen that the one cannot be interfered with without the others being in like manner affected; and that the former cannot be destroyed and the others maintained.

In concluding this review of the year's business, it is proper to call attention to the fact, that by reason of the financial crisis of September, and the consequent impossibility to obtain currency in the west to move business, the live stock traffic of the road was completely blocked, and so continued for a considerable time. The movement of grain, and the other business of the road was in like manner affected, but not to the same extent. The influence of this national calamity continued to weigh upon the business of your road to the end of the year. It diminished its volume, and to a corresponding extent limited the earnings of the company. It may also be stated, that in the country tributary to the line of your road the harvests of the last year were not as abundant as those of the previous one, though perhaps of an average yield. In consequence of low prices in the market and the scarcity of money, much of the crop of 1872 was still waiting shipment when the new crop of last year was being gathered, so that there is now in the country as much grain to be transported to market as there was last year at this time. For all this there is a demand, and at such remunerative prices as renders it certain that it will come out. Cattle, to come forward during the year, are in greater numbers than in the last; and there is no reason to suppose that the hog crop, which was large in the year now closed, will be less for the ensuing one.

As transportation into the country must and will increase with the amount carried out, there is every reason to expect that the business of your road will be as large and as profitable for the coming year as it has been for the past. Indeed it is confidently believed that the gross earnings will be greater and the expenditures less.

All of which is respectfully submitted.

J. M. WALKER, President.

Chicago, Jan. 1, 1874.

GENERAL ACCOUNT, DECEMBER 31, 1873.

Capital stock		$19,897,010 00
Amount of B. & M. R. R. R. stock outstanding Dec. 31, 1873		6,582,552 76
		$26,529,562 76
Funded debt, ($18,855,575) viz:		
Trust mortgage convertible sinking fund 8 per cent bonds, payable January 1, 1883		150,000 00
Trust mortgage inconvertible sinking fund 8 per cent bonds, payable January 1, 1883		2,592,000 00
Trust mortgage 7 per cent bonds, payable October 1, 1890		680,000 00
Seven per cent bonds, payable January 1, 1896		7,029,875 00
Second mortgage bonds issued on account of Northern Cross road, payable at Frankfort-on-the-Main, interest at 4½ per cent to July 1, 1875, and at 4 per cent from July 1, 1875, to July 1, 1890		941,000 00

President.—James M. Walker.

Directors.—Erastus Corning, Albany, N. Y.; John C. Green, New York; Sidney Bartlett, John W. Brooks, John A. Burnham, John N. Denison, John M. Forbes, Nathaniel Thayer, Boston, Mass.; John N. A. Griswold, Newport, R. I.; James F. Joy, Detroit, Mich.; Chauncey S. Colton, Galesburg, Ill.; James M. Walker, Chicago, Ill.

Chairman of Board.—John N. Denison.

General Superintendent.—Robert Harris.

Treasurer and Secretary.—Amos T. Hall.

Proposed New Railroad from Southingham to Boston.

A meeting of gentlemen interested in the building of a new railroad from Boston to South Framingham was held in Boston on the 27th ult.

The meeting was organized by the choice of William E. Baker, Esq., of Wellesley as Chairman, and Francis L. Hill as Clerk. Plans of the routes, which have been surveyed, were shown, and after considerable discussion the following one, surveyed by Mr. Ellis, was adopted: Commencing at South Framingham and passing through North and South Natick, Wellesley, Needham Centre, Newton Upper Falls and Highlands, Brookline, West Roxbury and Dorchester to Boston; connecting at South Framingham with the Boston and Albany, the Boston, Clinton and Fitchburg Railroads and the Hoosac Tunnel Routes; at Newton Upper Falls, by the Woonsocket Division, with the Boston and Albany Railroad; at Forest Hills, with the Boston and Providence Railroad; at Harvard street, Dorchester, with the New York and New England Railroad, thence connecting with the Old Colony Railroad.

The following gentlemen were chosen as preliminary directors: William E. Baker and Edward Atkinson of Boston; Jackson Bigelow and Joshua Parmenter of South Natick; James McIntosh of Needham, Riley Pebbles of Natick, Otis Pettee of Newton and Willard A. Humphrey of Brookline.

Mr. Baker stated that the cost of the road would be from $400,000 to $450,000, and he was of the opinion that the capital of the company should be $500,000 or more, in order to put the road in running order, provided they saw fit to operate it themselves. The amount of capital was, however, left with the directors, as also was any alterations in the route. After voting full powers to the directors to fill vacancies, the meeting adjourned subject to the call of the chairman of the board.

A Six-Acre Rolling Mill.

The Phœnix Iron Company, whose great works are at Phœnixville, Pa., about an hour's railway ride up the Schuylkill, have nearly completed a new rolling mill building, which is noteworthy in several respects. It is believed to be the largest single mill building, under one roof in this country. The ground plan covers about six and a quarter acres of ground. Its longest dimensions is nine hundred and thirty eight feet, and its breadth is two hundred and ninety feet. The principal material of the building is rolled or wrought iron, the roof being slate. Considering the heavy character of the principal material, is is difficult to conceive the light and airy appearance of the immense structure. The whole of the upper part of the building rests upon about two hundred and fifty wrought iron flange columns of three-eighths thickness of iron of the well known Phœnixville pattern. These rise about thirty feet to the eaves of the roof, and are but eight and a half inches in diameter through the cylinder, and about twelve inches in diameter from the tip of one flange to the tip of the flange on the opposite side of the column. At a short distance they look very slender, considering the great expanse and weight of the superstructure they have to support, but they have been proved to be capable of sustaining many times the greatest weight or force they are ever likely to have to resist. The roof rises to the height of sixty feet at the ridge, the framework being exclusively of wrought iron, firmly braced and tied with rods and links.

The building is erected simply for shelter for the engines, furnaces, rolls and other machinery found to be necessary for the enlarged business of the company, a great deal of which is iron for bridge building, to fill orders of Clark, Reeves & Co. The furnaces, engines and machinery will cost nearly a million of dollars. The cost of the six and a quarter acre building, when completed, will be about $280,000. It is light, airy, strong and economical. It seems to combine the maximum of strength with the minimum expenditure of materials, and may be considered a fine specimen of American progress in structures for iron mill purposes.—*Philadelphia Ledger.*

☞ A Lebanon Valley branch, eight miles long, is to be built from Hummelstown, southward to Middletown, on the Pennsylvania road, to serve as a short cut line for freight, mainly coal and lumber, now carried on through Harrisburg.

☞ The Great Western Railway Company of Canada have issued a letter stating that the dividend for the past half year can only be at the rate of 2½ per cent per annum, and not 3½, as was officially advised from Canada.

Debt of Milwaukee.

EXTRACT FROM THE ADDRESS OF THE MAYOR.

The outstanding indebtedness of the city is as follows:

Old dredging bonds	$1,000 00
Readjustment bonds and scrip	426,398 70
General city bonds	241,000 00
Water bonds	1,400,000 00
City scrip	189,588 04
	$2,264,986 74

To this must be added $100,000 bonds issued to the Beloit Railroad Company, and $100,000 issued to the Superior Railroad Company—making a total outstanding indebtedness of $2,464,986 74. The accrued interest on the last bonds, declared valid by judgment of the Supreme Court of the United States, has been settled by the issuance of—

General city bonds	$91,000 00
General city scrip	234,243 72
Total	$325,243 72

Of which scrip the amount of $47,655 68 due February 1, 1874, has been paid from the tax levied for that purpose. There are still outstanding, two judgments,

One of	$13,365 85
"	3,340 82
Total	$16,706 17

To meet which we hold—

General city bonds	$9,000 00	
" scrip	15,756 28	
		$24,756 28

The Beloit bonds mature June 1, 1876, and the Superior bonds Jan. 1, 1877, at which time provision should be made for their retirement.

Aside from the above there is still outstanding city bonds in aid of railroads, $514,000, as follows:

Green Bay, Milwaukee and Chicago Railroad	$200,000
La Crosse and Milwaukee Railroad	200,000
Milwaukee and Fond du Lac Railroad	114,000

These bonds have all matured, and are probably paid by the respective railway companies assuming them. It is the duty of the Common Council to see those bonds and coupons presented to the commissioners of the public debt for cancellation.

☞ An engine to be run on passenger railways by means of compressed air is now being built at the Baldwin Locomotive Works, Philadelphia, for a gentlemen of Louisville. It is direct acting, and has four large tanks, which are to be filled at the end of the route with compressed air, at a pressure of 200 pounds to the square inch.

☞ The Sunbury and Lewistown Railroad, which has been leased as a branch line by the Pennsylvania Railroad Company, is to be sold at auction on Tuesday, May 5, by order of the Supreme Court of Pennsylvania, in foreclosure of the mortgage to Edward P. Mitchell and James Pollock, Trustees.

☞ Work on the Baltimore, Chesapeake and Delaware Bay Railroad has commenced, and laborers are grading the bed of the road between Queenstown and Harrington, Del. Contracts have been made for the iron rails, three locomotives, and passenger and freight cars.

☞ A special meeting of the stockholders of the California and Texas Railway Construction Company is called for the 6th of May, at the office of the company, in Philadelphia, to consider a plan to be submitted by the directors for a re organization of the company.

Veto of the Twelve-Hour Law.

Below we give the veto message of the Governor of California of the Twelve-hour Law for Conductors and Drivers on Street Railroad Cars:

STATE OF CALIFORNIA, EXECUTIVE DEPARTMENT. }
SACRAMENTO, March 25th, 1874. }

To the Assembly of the State of California:

I respectfully return to your honorable body Assembly bill No. 111—"an act to amend the Political Code of the State of California, and to protect the health and regulate the hours of labor of street car conductors and drivers, and to amend Section 3,244 of said code"—without approval. Section 3,244 of the Political Code reads: "Eight hours of labor constitute a day's work, unless it is otherwise expressly stipulated by the parties to a contract." The bill under consideration provides: 1. That twelve hours shall constitute a day's work for the drivers and conductors of street cars for the carriage of passengers, and "that any contract for a greater number of hours of labor in one day shall be void; and every such person laboring over twelve hours in one day shall recover from his employer one dollar for each additional hour as a penalty."

2. That any corporation, owner, agent or Superintendent who shall knowingly employ any person as conductor or driver of a passenger-car upon a street railroad for more than twelve hours in any one day shall forfeit the sum of $50 as a penalty for such offense to the use of the person prosecuting any action therefor.

The bill as an amendment to existing laws is upon the theory that all men of lawful age, except insane persons and the drivers and conductors of cars upon street railroads, can make their own contracts for wages and hours of labor. It does not even exempt from the operations of the general law any other classes—as hostlers, ticket clerks, or mechanics—of the employees of the street railroads. It is special legislation in regard to two classes of persons, and can only be justified upon the assumption that their necessities are so extreme they are compelled to accept bargains so unconscionable that the law will interfere. I am clearly of opinion that under the operation of the inexorable law of supply and demand the wages of labor cannot be fixed by legislative enactment, and that the practical effect of this bill would be to reduce wages in the two instances specified, in the same proportion as the hours are reduced, and compel an additional reduction by the friction it creates. The laborer too often has to sell Monday's labor to buy Tuesday's bread, and every artificial obstruction in the sale of Monday's labor only tends to make the bread of Tuesday harder and scanter.

The bill, in effect, says to the man seeking employment as driver or conductor, "Whatever may be your necessities or hopes, you shall not labor for one employer more than twelve hours per day."

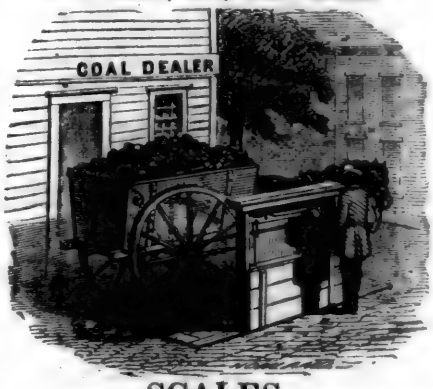
All occupations are equally open to drivers and conductors with all other men. Can the law make a better contract for them than they can make for themselves? If a man prefers to work in his vocation fifteen hours for $2 50 rather than twelve hours for $2, is the law which prevents him a substantial kindness to him? That the necessity which lies behind such a choice, or which induces him to make either contract, is a hardship, is too true. If the law could remove that, it would indeed be blessed. But, since it cannot, does not attempt it, cannot even judge of its extent in individual cases, is it wise to prevent the individual from making his own choice in his own individual case?

No man will accept employment for more than twelve hours per day, except to escape from some greater hardship. Is it right to close this avenue of escape—to cut off his right to choose for himself between want in his family and extreme toil for himself.

The classes this bill seeks to benefit would hardly admit that there was anything in the nature of their employment to differentiate it from that of all other free labor, and assimilate it to that of servitude, which the law must of necessity regulate in the absence of free agency.

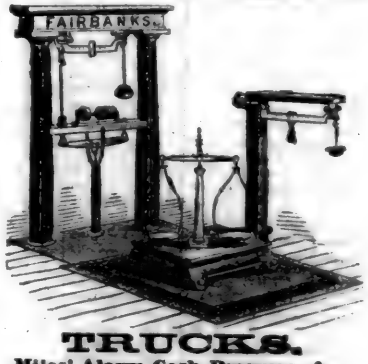
The fact that any man in a land of plenty is compelled to work more than twelve hours a day to procure bread for his family is a sad commentary upon our civilization and society—the more sad when we know there are hundreds of applicants for no poor a boon as the opportunity to do so. The great evil is, not that a few men in one employment do this, but that there are so many who would be glad to. If the necessity for laboring for disproportionate pay, or of devoting the natural hours of rest and recreation to severe toil were peculiar to the classes named, the law might possibly modify the wrong; or, it is more reasonable to think, society itself would soon supply a complete remedy. It is because the same unadjusted conflict between the right and the wrong is active and clearly visible in many other occupations, that legislation looking only to one feature of a vast system is of questionable power. To remember the car-driver and forget the seamstress; to pity and provide for the conductor and forget the many who have equal claims to consideration; to guard one class against oppression and neglect a large number, in whose tacit demands for relief precisely the same principle is involved, is to invest the statute with a character which is partial, and is to make the law invidious. Over work and under pay are common factors in a great problem; they constitute an evil in all countries. This great central evil there is no attempt to reach. In the sharp competitions of society, in the relations between capital and labor, which are the outgrowth of our imperfect civilization, perhaps any attempt to reach it by direct legislation would be futile. It is a part of the theory of our government that its adult citizens are free agents; that they can select their employments, and judge of their abilities and necessities to better advantage for themselves than the State can for them. Deeply convinced that this bill is in contravention of that theory, and that its practical effect would be an injury to the class it seeks to benefit, I am constrained to return it without approval.

NEWTON BOOTH, Governor.



The Iron Business.

We believe the New York *Times* correspondent is altogether too sweeping when he includes the railroad supply business, such as the furnishing of bolts, spikes, locomotives, fishplates, bridge iron, etc., in the general depression of trade. At least, our impression is that the numerous establishments in this city, which manufacture these articles, are in a very satisfactory state. Of course the railmaking proper is depressed, but the consumption of iron by roads is so rapid, and constantly going on, that demand for new rails must spring up very soon. The life of a rail is not longer than three years, and as many corporations have been compelled very largely, to forego replacement of worn out rails during the last seven or eight months, it can be readily seen how soon the demand will spring up again. The correspondent quoted, after having had an interview with Mr. Morrell, of Johnstown, says that "sooner or later, the railroad companies must go into the iron market as heavy buyers. Several gentlemen with whom I have discussed this matter, agree with Mr. Morrell in saying that the companies have, for the last six months, only bought twenty-five per cent of the ordinary requirements for renewals and repairs; and they do not hesitate in asserting that, if the companies do not soon do something to put their lines in first-class running order, there will be some terrible disasters recorded before the Winter of 1874-'75 passes away. Now, nearly every one I meet says that any prospects for the better in the iron market depend very greatly on the welfare of the railroad iron makers. The railroad iron interest equals in value that of three or four any other branches of iron manufacture. It is an immense consumer of pig-iron, and the price of pig iron rules the price of the ore from which it is made and the iron which is manufactured from it."—*Pittsburg Chronicle.*



☞ The Lake Superior and Mississippi Railroad, which has for a considerable time been controlled by the Directors of the Northern Pacific Company, on account of its indebtedness to that company, is about to pass back to the management of its original stockholders. The formal surrender of the road and its franchises will take place on the 1st of May.

National Freight Transportation.

PROPOSED FREIGHT ROAD FROM THE ATLANTIC TO THE MISSOURI RIVER—TEN MILLION DOLLARS ASKED FROM CONGRESS TO EXECUTE THE PROJECT.

The committee on railways and canals, to whom was referred House bill No. 1194, to charter a double track freight railroad company from tidewater on the Atlantic to Council Bluffs on the Missouri river, made a report to the House of Representatives on Wednesday. After considering at length the material facts in the case regarding cost, etc., the committee submit the following conclusions:

1. The line proposed, with its authorized branches and connections, will reach and affect large masses of population now separated by distance and excessive charges, each of which masses of population is the necessary supplement of the other. By a line to be constructed of eighty seven miles the main trunk of the Continental road will be connected with the lines of road which seek their western passage through the Hoosac tunnel, as well as the line proposed to cross the Hudson river at Peekskill.

2. The road proposed is not an attempt to force a line of railway through a new and undeveloped country. It passes directly through the richest and most productive zone of Ohio, Indiana, Illinois, and Ohio river and the lakes as to cause the local productions of that zone to seek transportation by the railway at its fixed price, rather than by lake or river.

3. The line accommodates itself to the existing currents of commerce, currents which owe their existence to permanent causes, and which, in the judgment of your committee, are not likely to be materially affected by any probable event.

4. It is reasonably certain that no private corporation can be formed in this country which will undertake and perform the same work and operate the road at the low rates fixed by the bill, simply as a private enterprise and upon their own risk, without endorsement from the United States.

5. Not the least among the meritorious propositions involved in this enterprise is the remodeling the present cumbrous, clumsy, antiquated and useless expensive manner of handling grain and other products in New York city, a manner so full of delay and cost as to have driven already a large portion of the grain trade to Boston, Philadelphia, and Baltimore, where proper mechanical facilities for receiving, discharging, and loading enable those cities successfully to compete with the great commercial emporium in this cheap business.

The following is a condensation of the important sections of the bill reported by the committee.

The first section of the bill fixes the termini of the road and imposes a condition that no grade eastward shall exceed forty feet to the mile, and requires the construction to be begun within one year from the passage of this act, and its completion within three years thereafter.

The sixth section provides for surveys and that the road shall be constructed as nearly as possible on an air line.

Section 8 requires a double track branch to Chicago and St. Louis, and gives authority to construct other branches not exceeding two on each side of the main line in each State.

Section 9 permits the purchase of other railways, but requires the consent of the State chartering said road before such purchase or consolidation shall go into effect.

Sections 10, 11, 12, and 13 contain provisions for consideration of the right of way.

Section 14 contains details for the organization of the company.

Section 15 declares the road a public highway and post road, and gives the right to construct telegraph lines, rates to be fixed by Congress.

Section 16 compels the reception and transportation of freight in the order of delivery at reasonable rates.

Section 17 compels the acceptance and transportation of cars from any company or individual, forbids undue preference, and requires service to be performed in the order of delivery upon fair and reasonable rates, to be fixed by a commission.

Section 18 defines "bulk freight" to include all articles of freiget not in packages placed in the cars by the shipper without handling by the railroad company and by the car load, and specifically enumerates coal, grain of all kinds, provisions not in packages, lumber, ores of metals, and live stock for market, and fixes a maximum rate not exceeding five mills per ton per mile for distances over 750 miles—with a sliding scale gradually increasing the rates with the shortness of the haul—and adding one mill per ton per mile for the winter months, and that the maximum rates for all other freights shall be fixed by a commission. [The proposition of the company is six mills per ton in summer and seven mills in winter]

Section 19 provides for the appointment of a commission of five—three to be appointed by the president and two by the company—to classify freight and fix the charges thereon as to articles not above enumerated. In all cases a majority of the government commissioners is required, and the commissioners shall be paid a fixed price for their services by the company. The same section provides severe penalties for breach of duty by the commissioners.

Section 21 requires that prior to any aid being given by the United States the company shall satisfy the proper officer that they own or lawfully control, by lease for not less than 99 years, sufficient lands on the Hudson for the terminal facilities of the road and for proper dockage, piers, warehouses, and elevators.

Sections 22 and 23 provide for the mode of giving a guarantee of interest on the bonds of the company, and declare a first mortgage on the entire real estate of the company in favor of the United States.

Section 24 provides for reserving out of the earnings of the company and paying over to the United States annually a sinking fund of $1,000,000.

Section 25 gives the right to borrow money and give mortgages or trust deeds therefor, subject, however, in all cases to the prior mortgage existing in favor of the United States.

Section 27 provides for inspection of all books, papers, &c., and for quarterly and annual reports to Congress.

Section 28 provides for exchange of freight or cars to and from connecting or intersecting railroads, rates if disputed to be fixed by arbitration.

Section 29 preserves the power in Congress to control, alter, modify or repeal the charter.

The bill is submitted with this report to the House of Representatives for information, not for present action.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 18, at 449,134 tons, and for the coal year 4,845,779 tons, against 4,622,629 tons to corresponding time last year, being a decrease of 276,850 tons. The bituminous tonnage for the week is 68,914 tons, and for the year 709,595 tons, giving a total of all kinds for the week of 518,048 tons, and for the year of 5,055,374 tons, against 5,827,481 tons to same time last year, being a decrease of 272,107 tons.

☞ Mr. Rufus Hatch, managing director of the Pacific Mail Steamship Company, has been elected managing director of the Panama Railroad Company, thus placing the management of the two corporations under one and the same control.

☞ About 1,400 hands are at work on the Valley (Va.) Railroad between Staunton and Salem, and more are being added daily. The Lexington (Va.) *Gazette* says that at the meeting of directors in Baltimore on the 9th instant a proposition from the Baltimore and Ohio Railroad was considered, to lease and run the road from Harrisonburg to Staunton upon the basis of a division of earnings. This proposition was declined, and a committee appointed to report at an adjourned meeting on the 3d of June next upon the expediency of leasing the road or the most advantageous mode of running it.

☞ At the last session of the New Jersey Legislature an act was passed authorising the proper municipal authorities of any city within the State to make contracts with any railroad company whose roads enter said cities, to alter, re-locate, change or elevate their tracks for the purpose of securing greater safety to persons and property, and promote the interests of said cities.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, May 2, 1874.

Stock Exchange and Money Market.

Money has been remarkably easy to the more responsible borrowers, all through the week. The offerings from bank and through private channels have been liberal; while the demand for accommodation has been much less urgent, especially from speculative sources. Call loans have been generally quoted at from 3@5 per cent, though in instances higher rates were paid to provide for pressing needs. The discount market has been quiet on the basis of 6@7 per cent per annum. The City banks, in their last weekly statement, were $4,352,200 lower on their deposits, and $5,041,200 on their loans and discounts, than the week before. The legal tender notes were reduced $424,300, while the specie reserve showed an increase of $122,800. The circulation was also augmented $61,800. The U. S. Sub-Treasury at this port has gained slightly in the line of its coin and currency reserves. The U. S. Sub Treasury in this city closed the week with a currency balance of $37,588,214 against $36,549,845 the preceding week; and a coin board of $57,117,244 against $57,040,504 on the previous return. The City bank exchanges, during the week, were $527,857,343, or a daily average of $87,892,890. The customs revenue of the port, during the week, was $1,950,247 of which $1,826,247 were in coin certificates. The City banks reported their average of gold last week at $23,336,400, and their greenback average at $54,739,600. Their deposits stood at $234,486,700. The loan item was about 288¼ millions. The circulation was $26,901,600.

The cash balances of the Treasury Department on Wednesday were as follows: Currency, $8,362,704; special deposits of legal tender for redemption of certificates of deposit, $51,345,000; coin, $88,889,879; including coin certificates, $33,981,600.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 249⅛ millions.

Government has received about 81 millions from internal revenue, thus far in the current fiscal year.

Gold has been fairly active, but variable in price. The speculation has shown a less confident temper than through the preceding week. The customs demand has been moderate. There has been rather more inquiry for shipment. Government has added to the available supply in the open market, by the anticipatiorp payment of the May coin interest on the public debt, to the amount of $1,600,000. This disbursement was commenced on Saturday last, under department instructions, from Washington. The extremes of the price have been 113¾@113½, closing at 113⅛ as against 113½ on Wednesday of the preceding week. The specie outflow, last week, was $423,236. The imports of specie at this port since Jan. 1, have been $1,263,625, against $1,097,018 same time last year. The customs demand for Gold last week averaged $325,041 a day. Foreign Exchange has been scarce and quoted higher, but has been rather moderately sought after. Bankers' sixty day bills on London closed on Wednesday at $4 87½@4 87½; sight bills on London, at $4 90@$4 90½. The week's exports of Domestic Produce have been to the currency value of $7,259,229.

Government securities have been in comparatively limited supply and very good demand at firmer and, toward the close, buoyant prices. U. S. sixes of 1881 closed on Wednesday of this week at 121¾@122; U. S. Five-Twenties of 1862, 118⅞@119¼; U. S. Five-Twenties of 1864 at 120⅛@120¾; U. S. Five-Twenties of 1865, 121⅝@121⅞; U. S. Five-Twenties of 1865 consolidated, 120@120¼; U. S. Five-Twenties of 1867, 121⅝@120⅞; U. S. Five-Twenties of 1868, 120⅜@120⅝; U. S. Ten-forties at 115⅛@115¾; U. S. Fives of 1881, (Funding Loan) 116⅞@117; Six per cent. currency Sixes from 94½@@95.

State and Railway bonds have been generally in fair demand since our last, and held more firmly. Central Pacific first mortgage six per cents have been scarce and wanted, closing at 94½@95; Western Pacific sixes, 87¼@87¾. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been quiet, and quoted at from 52@55. Railway and miscellaneous share property has been quite active, and generally much stronger, though variable in price.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,228,874, against $10,240,763 same week last year. The exports of domestic produce are $7,295,229, as against $5,855,290, last year. The exports of Gold and Silver, $423,236, as against $773,017 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $1,999,300, as against $2,410,618, same week last year.

General business has been moderately active, Cotton has been more freely dealt in, and quoted higher. Breadstuffs and Provisions have been in fair demand, but variable in price. Naval Stores and Petroleum have been held with firmness, but have been rather quiet. Tobacco and Wool have been moderately sought after within the previous range. Metals have been dull throughout, especially Iron, with Eglinton Pig Iron quoted at $35@$36. Glengarnock, $37 50@$38; Coltness, $39@$39 50; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $40@42 50. The Ocean freight market has been firmer, on a lighter offering of room on berth and charter, with a fairly active business reported, chiefly in the line of grain shipments. Foreign merchandise has been attracting more attention.

At the auction sale of Scranton Coal on Wednesday, 50,000 tons were disposed of within the range of from $4 37½@$5 32½, as against $4 22½@@$5 30 in March.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Railroad Laws.

The Railroad Commissioners for the State of Illinois met at Springfield on the 22d ult. Upon consultation, they decided to bring suits as follows: At Jacksonville, against the Toledo, Wabash and Western; at Macomb, against the Chicago, Burlington and Quincy; at Edwardsville, against the Chicago and Alton; at Tuscola, against the Illinois Central Railroad. These were all the suits agreed upon, though others are in process of arrangement. The general charge will be for extortion and unjust discrimination. The board decided to visit Cairo next week where a very large case is alleged to exist against the Illinois Central Railroad. The board are of the opinion that the railroads are daily approaching the schedules in fixing their tariffs.

The representatives of the Milwaukee and St. Paul Railroad, and several railroads entirely in Minnesota, had a consultation on the 22d with the Railroad Commissioners, and expressed their intention to submit to the Minnesota Railroad Law. One question of the construction of the law, however, remained undecided: whether the regulations as to rates will apply to contracts for freight carried beyond the State line.

Under the State law of last winter, creating a lien upon lands appertaining to the St. Paul and Pacific Northern Extension Lines, Receiver Farley has filed specific denials with the Governor as to all the liabilities for construction and material claims filed, amounting to $767,957, including one by DeGraff & Co. for $664,498. Failing to secure relief in the Legislature, the Dutch bondholders, who claim they have once furnished money for the payment of these claims, and expect within a short time to take full possession of the St. Paul and Pacific lines and extensions, will abandon building the Brainerd Extension, and connect with part of the St. Vincent Extension, already completed from the main line at Breckinridge, thus surrendering the extension land grants for the incompleted portion. The bondholders and receiver are advised they can hold lands already acquired on the St. Vincent extension, and that the DeGraff Lien Law will be void as to them.

Boston Water Power Co.

At the annual meeting of the stockholders of this company held in Boston on the 28th ult., Gen. James S. Whitney, President, in the chair, Albert F. Thayer, Treasurer, presented his report showing the financial condition of the company on the 31st of March, 1874, as follows:

ASSETS.

Real estate estimated as it stands:		
1,850,496 ft. east of Parker st. south of B. & A. R. R. @ $1 ft.		$1,850,496 00
1,040,000 ft. in basin north of B. & A. R. R. west of Parker st. @ 80c		832,000 00
5,900,000 ft. in basin south of B. & A. R. R. west of Parker st. @ 40c		2,360,000 00
1,026,425 ft. balance of Co.'s land in streets for which City owes		284,664 90
9,816,921 ft. owned by company.		
Mortgage notes receivable		868,000 00
Company's investments:		
321,000 ft. Huntington Av. lands @ 45c. above mortgage		144,450 00
1,546 Shares Boston Water Power Company stock @ $10		15,460 00
150 Shares Atlas Insurance Co.		15,000 00
Debt of H. M. Bearse & E. C. Drew, estimated at		15 000 00
Sewer Assessments estimated at		5,000 00
Cash on hand		2,294 52
		$5,892,865 42

LIABILITIES.

First mortgage bonds issued	$358,000 00	
Notes payable	878,699 01	
Loans payable (collateral pledged)	345,600 00	
Mortgage notes payable	878,101 82	
Dividend No. 16 (cash).	410 00	
Dividend No. 17 (scrip).	78,220 00	
Required to complete avenue for city of Boston	50,000 00	
		2 589,030 83
Balance of assets over liabilities.		$3,303,334 59

The following resolution, offered by Mr. M. F. Fowler, was adopted:

Voted, That the Directors of the Boston Water Power Company are hereby authorized to execute a mortgage to Dwight Foster and Lyman Nichols, trustees, on all or any part of the property of the corporation for an amount not exceeding $2,500,000, to be, if they see fit, taken in place of the now existing mortgage to the same trustees, and to execute bonds, to be secured by said mortgage, bearing interest at the rate of seven per cent per annum, payable semi-annually, said bonds to be disposed of at the discretion of the directors.

BANKING-HOUSE OF FISK & HATCH,
No. 5 NASSAU ST., NEW YORK.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons, buy and sell stocks and bonds at the Stock Exchange on commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which are very desirable for investment.

The CENTRAL PACIFIC is an important Trunk Line Road, with an average monthly revenue exceeding $1,000,000. The Company have a small unsold balance of their SIX per CENT. GOLD LAND BONDS, with the proceeds of which, and their surplus earnings, after paying expenses, interest, and dividends, they are adding to the permanent improvements of the road. The amount is less than $800,000; we are selling them at 85 and accrued interest, and consider them an excellent investment.

FISK & HATCH.

Railroads in Texas.

The Texas and Pacific Railway, main line, from Shreveport to Dallas, Texas, 192 miles, is now completed. From Dallas to Forth Worth, 30 miles, to be completed at an early day.

The Texas and Pacific Railway Trans-continental branch, completed from Marshall to Monterey, Marion County; to be completed to Texarkana, Bowie County, 69 miles, by 1st of October next; and from Texarkana to Sherman, 155 miles, by the 1st of January next, and from Sherman to Forth Worth via Denton, by April, 1875.

The Missouri, Kansas and Texas Railroad, is now in good running order from St. Louis to Denison, a distance of 622 miles. It is expected it will build a branch southwestward, from Forth Worth, via Waco and Austin to the Rio Grande, using the Trans-continental branch of the Texas and Pacific from Sherman to Forth Worth. At present it has but three or four miles of road within the State, viz: from Red river to Denison.

The International Railroad has 174 miles road in operation, viz: from Hearne, on the Texas Central, to Longview, where it intersects the Texas and Pacific. This company has consolidated with the Houston and Great Northern, and they are now under one management. This latter road extends from Houston to Palestine, Texas, where it unites with the International and is a consolidated line thence to Troupe, Smith County, where the International branches off to Longview, and the Great Northern to Tyler, thence to Mineola, Wood County, where it intersects the main line of the Texas and Pacific, 69 miles west of Marshall. This line will probably be extended to intersect with the Trans-continental branch of the Texas and Pacific, via Sulphur Springs, Hopkins County, at Clarksville, Red River County.

The Houston and Texas Central, connects with the Missouri, Kansas and Texas at Denison, 337 miles from Houston, making a continuous line of railroad from Galveston to St. Louis. This road has two branches in regular running order, viz: from Hempstead to Austin, 116 miles, and from Bremond to Waco, 45 miles.

The Galveston, Houston and Henderson runs from Galveston to Houston, 50 miles. The Galveston, Harrisburg, and San Antonio, is completed from Harrisburg to Columbus, 80 miles, and connects with Houston, 6 miles, by a branch.

The Gulf, Western Texas and Pacific Railroad is designed to run from Indianola to San Antonio, 160 miles. It is now in running order to Cuero, De Witt County, 70 miles from Indianola.

The Point Isabel and Brownsville Railroad is completed and in running order from Point Isabel to Brownsville, a distance of 20 miles.—*St. Louis Railway Register.*

☞ A large and enthusiastic railroad meeting was held in Woodstock on the 21st ult., at which it was resolved to proceed with the Woodstock Railroad; and that they commence laying the track at White River Junction, and go on as far and as fast as the funds realized from the bonds will allow. It is stated that $180,000 will complete the road.

☞ The U. S. Rolling Stock Company have elected the following trustees and officers for the ensuing year: Trustees—H. R. Baltzer, H. H. Van Dyck, William H. Guion, Lawrence Wells, Jas. B. Hodgskin. Officers—President, Jas. B. Hodgskin; vice-president, H. R. Baltzer; treasurer and secretary, A. Hegewisch; general master mechanic, C. F. Jauriet.

☞ It is announced that two of the new iron steamships for the Pacific Mail Steamship Company have been contracted for in Wilmington, Del., one by the Harlan & Hollingsworth Co., and one by Pusey, Jones & Co.

☞ The Lewiston and Auburn Railroad Company have elected as directors: J. G. Coburn, E. S. Davis, H. B. Bartlett, G. H. Pillsbury, M. T. Ludden, E. L. Wood, J. S. Randall, E. A. Little and F. M. Jordan.

☞ The Selma, Rome and Dalton Railroad is to be sold by a decree of the Chancellor of Alabama June 30th.

☞ The Calumet and Hecla Mining Company has declared a dividend of $5 per share, payable May 15.

Genuine Chester Emery.
REDUCTION IN PRICE.
The great increase in the production of the Chester Emery Mine enables us to reduce the price to seven cents for grain and four cents for flours, **with important discounts** to dealers, manufacturers and larger purchasers. The genuine Chester Emery is made from the purest and hardest crystals, and its cutting and polishing qualities are superior to any emery used in this market.

PHILADELPHIA.

The American Wood Carbolizing Co.
Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.
Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.
67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.
The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.
This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.
Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.
Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.
It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.
The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.
The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Ends, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.
It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.
Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

Pacific Mail Steamship Company.

FULL EXHIBIT OF THE FINANCIAL AND BUSINESS POSITION OF THE COMPANY.

To the Stockholders of the Pacific Mail Steamship Company:

The late misrepresentations that have been circulated through the newspapers regarding the condition of the affairs of your company, render it desirable that you should be informed, as far as possible, of its present condition and future prospects, and with this view I beg to submit the following:

Your company has now thirty three steamers in commission, of which six are new iron steamships, running, and all paid for.

The City of Peking, on which $852,000 has been paid, is now receiving her outfit at the foot of Ninth street, East River, in this City, and the City of Tokio, (Yedo,) on which has been paid $500,000, will be launched at Chester, Penn., on the 18th of May, and will be brought to this City to receive her engines and outfit.

The contract with the builders, Messrs. Jno. Roach & Son, stipulates that $150,000 shall be retained of the final payment, on each of these two ships, until after they have made satisfactory trial trips, showing a speed of not less than 14½ knots per hour.

The payments made on these eight iron steamships, including outfit, have already amounted to $4,100,000, and when the last two are completed, you will have added 28,000 tons of carrying capacity to your fleet.

The total tonnage for the year 1873, from New York to San Francisco amounted to.....154,000 tons.

Of this amount the P. M. S. S. Co. carried only 9,400 tons.

This year (1874) your company has thus far transported 9,243 tons, or within 157 tons of the entire amount carried during the previous year.

A like gratifying increase in the passenger business has been effected.

The number transported from New York, Jan. 1, 1873, to May 1, 1873, being..... 858
Same period in 1874..... 1,794

The above comparative statements refer solely to the traffic between New York and San Francisco, and do not include the China Line, the Central American Line, nor the traffic from San Francisco to New York, on all of which routes a similar satisfactory increase has been realized.

The reduction in expenses has been from thirty to fifty per cent. In the item of coal alone the company is saving from $4 to $5 50 per ton on purchases made in San Francisco, and from $6 to $7 per ton on that used in Acapulco.

The benefit to be derived from the introduction of iron propellers, combined with rigid economy which has been adopted in every department of your company's service, can be better appreciated by a comparison of the cost of the round trip from New York to Aspinwall:

Average cost of voyage last two years by the wooden steamers, forty one trips.... $27,400
Cost of voyage by the new iron ships..... 14,000
or a saving of upward of $13,000 each round trip.

Your company has every confidence in its ability to largely increase the business of the China Line by a diversion of the traffic via the Suez Canal route to the Pacific Mail Steamship Company's Line via Panama, thus adding materially to the revenue of the company as well as to that of the Panama Railroad Company.

As an evidence that these anticipations are not too sanguine, I refer to the fact that the first steamer which left China with freight for New York, via Panama, brought 370 tons of tea, of which 3,300 packages were originally intended to be sent via Suez Canal, but were subsequently changed and sent by the Panama route.

The tonnage through the Suez Canal during 1873, from China and Japan, was over 600,000 tons, valued at $240,000,000.

On the 20th inst. the steamer China arrived at San Francisco, from China and Japan, with 1,040 passengers and 1,300 tons freight.

On the 24th inst. the steamer Constitution arrived at San Francisco, from Panama, with 386 passengers and 1,570 tons freight.

On the 26th inst. the steamer Granada arrived at San Francisco, from Panama, with 240 passengers and 1,260 tons freight.

On the 27th inst. the steamer Colorado arrived at San Francisco, from China and Japan, with 860 passengers and 1,280 tons freight.

On the 27th inst. the steamer Colon arrived at New York, from Aspinwall, with 235 passengers and 1,651 tons freight.

Making five steamers, with 2,761 passengers, and 7,061 tons of freight, arriving at San Francisco and New York within a period of eight days, and on which the company will realize upward of $200,000 from freight alone.

The policy of the present board has been to manage the affairs of the company on business principles, and to bring the strictest economy to bear in all its details.

With its present equipment your company is prepared to carry from New York 1,200 tons of freight per week, and a like amount from San Francisco, Central and South America, besides 30,000 tons per annum from China and Japan.

One of the company's steamers will leave New York for San Francisco on Saturday, May 9, and every alternate Saturday thereafter.

On intermediate Saturdays, when necessary, steamers will be dispatched from New York, with way passengers and freight for the Isthmus and Central and South America.

Steamers will leave San Francisco for New York, via Panama direct, calling only at Acapulco, on Saturday, May 9, and every alternate Saturday thereafter.

On intermediate Saturdays steamers will be dispatched from San Francisco, calling at all way ports in Mexico and Central America.

Steamers will leave San Francisco for China and Japan on Saturday, May 2, and every alternate Saturday thereafter.

The next arrival from China will be due at San Francisco on Monday, May 18, the following one, Monday, June 15, and regularly every alternate Monday thereafter.

New York merchants will have the privilege of having their teas and silks forwarded either via Panama or by overland railroad, as they may prefer.

On the 1st December last, your company had a floating debt of $360,000. Since that time this debt has been liquidated, and $508,000 has been paid on the new iron steamers.

The average supply of coal and ship stores has been fully kept up at all points, and several materially increased.

Large expenditures have, in the meantime, been made on all your steamers. They have, as required, been newly painted and upholstered, and

the steamers Henry Chauncey, Montana, and Costa Rica have, at a cost of $160,000, been put in such thorough repair, that they are now in all respects as good as new.

The six new iron ships have been insured for $2,000,000, about two thirds their cost, at an outlay of $110,000, and the premiums paid.

The company has on deposit in bank in New York, currency	$78,870
The company has on deposit in bank in New York, gold	8,714
With J. S. Morgan & Co., bankers, London	10,000
Loaned on call in New York	370,000
Stocks on hand, market value	364,000
viz.: 6,000 shares P. M. S. S. Co., being balance of 10,000 shares received from A. B. Stockwell in settlement, 4,000 of which have been sold and realized $165,849 22.	
2,080 shares California Dry Dock Co.	
Due from Mexico and Central American States for mail service, 1873—to collect which an agent of the company is at present engaged	80,000
Claims against Union Pacific Railroad Company in dispute	$225,000
(Of which twenty five per cent is due to the Panama Railroad Company.)	
In addition to the above there is due the company for uncollected freights on cargoes in transit, all to be collected in forty days—estimated	875,000
Due from the United States Government July 1, 1874	125,000
	$1,411,584
*On the final completion of the steamers City of Peking and City of Tokio the company will have paid or owe Jno. Roach & Son	$725,000
(Payments to be made as the work progresses, according to contract.)	
The company now owes the Panama Railroad Company, due October, 1874	315,000
Amount of bills maturing June, July, and August	216,441
Taxes, 1873, in suit	43,000
Total indebtedness	$1,299,441

* (This payment of $725,000 to J. Roach & Son adds $2,300,000, including outfit, to the value of the company's fleet of ships.)

The cash assets on hand and to be realized within sixty days from this date show an excess of $112,143 over the entire liabilities of your company, after paying in full for the eight new iron steamers. In other words, it belongs to the stockholders, and no bondholders or creditors have any interest in it.

There will be a meeting of the stockholders on the 27th May to elect directors for the ensuing year.

With the above facts in your possession you will be enabled to form an opinion as to whether the present board have been acting for the best interest of your company, and if you are satisfied with what has already been effected, I would respectfully request you to execute and return to me the inclosed proxy, in case you are unable to be personally present at the election. RUFUS HATCH,
Vice President and Managing Director.
New York, April 30, 1874.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 25, at 433,252 tons, and for the coal year 4,723,797 tons, against 4,971,580 tons to corresponding time last year, being a decrease of 247,783 tons. The bituminous tonnage for the week is 74,755 tons, and for the year 783,830 tons, giving a total of all kinds for the week of 508,007 tons, and for the year of 5,510,427 tons, against 5,751,301 tons to same time last year, being a decrease of 246,874 tons.

Cleveland, Columbus, Cincinnati and Indianapolis Railway.

The earnings of this road for the years ending December 31, 1872 and 1873, compare as follows:

	1872.	1873.

Add surplus December 31, 1872		310,412 01
Surplus December 31, 1873		$893,390 19

Compared with the previous year the gross earnings of 1873 show an increase of $314,277 74; with an increase in working expenses of $229,753 29—making an increase in net earnings of $84,524 45. Deducting interest and taxes, the net income shows an increase of $55,678 49. The President in his report says:

In carrying forward a well considered plan of former Boards in developing the capacity of the railway, and mainly to fulfill contracts and obligations authorized and previously entered upon by them, it became necessary, during the year, to expend the sum of $701,643 07, details of which appear in one of the annexed tables. It became further necessary to advance, under contract, the sum of $323,960 44 to the Cincinnati and Springfield Railway Company.

And, in addition to these considerable sums, constituting an indebtedness in no wise chargeable to earnings account, it had been expected that other and larger outlays would be required in the future operations of the railway. Notably, the completion of the various improvements connected with the Cleveland Central Tract; additional side-tracks and equipment; a general office building and union depot at Columbus; increased terminal facilities at Cincinnati; sinking the tracks, within certain limits, in the city of Cleveland, and for which the company had already obligated itself; and, later, proposed changes of tracks in the cities of Columbus and Indianapolis.

For all this the intention had been to provide payment by the issue of capital stock, as designated to the stockholders by printed notice, which, for better information, is reproduced as follows:

CLEVELAND, COLUMBUS, CINCINNATI AND INDIANAPOLIS RAILWAY COMPANY,
CLEVELAND, O., March 8th, 1873.

"At a meeting of the directors of the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company, held at the office of the Company in Cleveland, on the 5th day of March, 1873, it was ordered: That a special meeting of the stockholders of the company be called, for the purpose of approving, or not, as shall seem to them proper, a lease of the said railway, its branches and leased lines, to the Atlantic and Great Western Railway Company, then to be submitted to said stockholders for their action; and also for the purpose of acting upon a proposal to authorize the directors of said Cleveland, Columbus, Cincinnati and Indianapolis Railway to issue not exceeding five millions increased capital stock of said company, for purposes authorized by law."

Just prior to the time appointed for the holding of this proposed meeting, two suits were instituted by stockholders of the company, against the company, its directors and officers, one in the Court of Common Pleas of Cuyahoga County, Ohio, asking for a preliminary injunction restraining this company from holding said special meeting; from authorizing or executing any lease or other contract which should give to the Atlantic and Great Western Railroad Company, or to any other party, any control whatever over the road and property of this company.

And also, to restrain this company from increasing, in any manner, its capital stock, and that, upon the final hearing of said suit the said injunction should be made perpetual.

The second suit, in the Circuit Court of the United States for the Northern District of Ohio, asked for substantially the same relief and almost in the same language.

In the first mentioned suit a preliminary injunction, such as asked for, was granted by the Court at Chambers, on an *ex parte* application by the plaintiffs.

In the second suit the motion for the allowance of the preliminary injunction was heard in open court; and, on such hearing, the same was allowed; restraining the execution of any lease or incumberance whatsoever to the Atlantic and Great Western Railroad Company, and to any person or party on its behalf.

The first suit was withdrawn during the past year, but the other one is still pending.

During the interval between the call for said special meeting and the time fixed for holding the same, legislative aid was invoked by some of the parties, who had set on foot these legal proceedings; and, on the 15th day of April, 1873, the Legislature of Ohio passed an act, to take effect from its passage, making more stringent the existing law providing how railroad companies might aid each other, and adding new provisions thereto.

This law amply secures the interests of all stockholders of this company, under any possible lease of this railway.

The result of this litigation was distressing and injurious to the best interests of the railway. Coupled with misrepresentation, no less than with prejudice as to the actual situation and the policy of the company, and followed throughout the autumn by the results of a financial panic, which rendered the negotiations of any form of railway securities, under the best of circumstances, doubtful and difficult, your board has been unable to consummate the original intention of its predecessors, in providing for the construction expenses of the past year, as well as in properly anticipating similar future expenditures, connected with which, and now being urged upon the management, is the work of sinking the tracks in the city of Cleveland, and with similar improvements being called for at Indianapolis and at Columbus.

With the unusual and unexpected diversion of earnings to construction account, nothing else was left your board, under the embarrassment brought about by the litigation just described, than to dispose of a certain quantity of its best assured and available assets.

Accordingly, a portion of the company's old issue of first mortgage sinking fund bonds, so called, were sold, amounting in the aggregate to $125,000, and leaving of these particular bonds, on January 1st, 1874, $300,000, at par value, in possession of the company, still undisposed of.

Without this relief, the dividend of August 15th would not have been paid.

As the second dividend season approached, and the dividend having been fairly earned, an earnest attempt was made by the management to finally terminate all legal controversy, and in connection with it relieve the financial embarrassment which had continued throughout the year.

The result of this effort, caused the issue by the board of the circular of February 23d to the stockholders; and a confident belief is yet entertained that there may be a speedy abandonment of all hostility, doubtless produced by a misunderstanding of the facts of the present situation, and a return to accord and harmony, in such measure as will ensure the best results for the future of the company and its interests.

The standard of the roadbed, track and equipment has been fully maintained.

And acknowledgment is heartily and gratefully rendered for the energetic and faithful performance of duty which, during the year, has markedly characterized all officers and employes of the railway.

The company built during the year 4 switching, 1 freight and passenger, and purchased on contract 6 freight locomotives, making on hand at the close of the year, 130—an increase of 12. Of these, 114 are coal burning and 16 wood burning. Sixteen engines were changed, during the year, from wood to coal burners, by the company.

The mileage for the year was: passenger service, 694,735 miles; freight service, 3,489,353 miles; construction, fuel and repairs, 166,480 miles—total, 4,350,568 miles, an increase of 473,411 miles.

The cost for repairs, including changes from wood to coal burning, was $185,483 50. The cost for new locomotives, $166,146 97. The entire equipment was kept fully employed, with the exception of the last quarter of the year, and is in good serviceable condition. The cost for fuel, (82,604 tons coal, and 46,033 cords wood) was $424,307 31.

There were purchased, and built in the company's shops, during the year, 240 box, 15 stock and 55 flat cars; and 13 box, 19 stock, 1 coal and 24 flat cars were broken up—leaving in service at the close of the year, 1,938 box, 235 stock, 524 flat and 579 coal cars. Seven freight train cabooses were built and 3 broken up, leaving on hand 56. Five derrick wrecking cars, commenced in 1872, were also completed for service. The amount changed for new equipment is $191,335 96.

Three passenger, 2 parlor and 2 sleeping coaches were added during the year. One coach was changed to a parlor coach. One coach was burned, and one broken up; and one sleeping coach condemned as unfit for service. The equipment at the close of the year was as follows: 41 passenger, 8 sleeping, 3 parlor, 1 directors' and 1 paymaster's coaches, and 13 baggage, 1 mail and 3 U. S. postal cars. The cost of new equipment was $51,335 96. The equipment is in good condition, but not sufficient for regular and extra service.

The equipment for the Cincinnati and Springfield line remains the same as last year, viz: 16 locomotives, 15 passenger coaches, 6 baggage, 2 U. S. postal, 100 freight, 100 stock, 100 coal cars, and 7 freight train cabooses.

A temporary engine house, with steam heating apparatus has been put up at Columbus, new pump houses and boilers built at Galion, Ridgeway and Daleville, and 8,942 rods of board fence constructed. A new Howe truss bridge has been built over Buck Creek at Moorfield, (in place of one destroyed by accident,) iron bridges at La Rue over the Scioto, and east of Ansonia over the Stillwater, and one iron girder highway bridge at Marysville, the cost of which was charged to repairs.

The total expenditures during the year amount to $4,805,413 42, viz: operating expenses, as above, including taxes and interest on bonds, $3,779,809 91. Advances to Cincinnati and Springfield Railway, $323,960 44. New construction, $292,824 51; and new equipment $408,818 56.

The total number of passengers carried was 543,624; of which 475,560 were way, and 68,064 through. Number of passengers carried one mile, 27,623,254.

The total number of tons of freight carried was 1,680,588; of which 1,050,106 tons were through, and 630,482 way. Of the through freight, 869,551 tons were carried eastward, and 188,555 westward. Of the way freight, 419,216 tons were carried eastward, and 211,266 westward. Total eastward bound, 1,288,767; do. westward do., 391,821. Number of tons carried one mile, 274,310,194.

The renewals of track embrace the following: 3,731 gross tons Bessemer steel, 473 gross tons new iron rail, 2,733 gross tons re-rolled iron rail, 296,260 lbs. railroad spike, 420,306 iron joint splices, 179,779 lbs. track bolts and nuts, 13,575 repaired rails, and 36,960 cubic yards ballast. 73 miles of track were laid during the year—39½ miles with Bessemer steel, and 34 miles with new and re rolled iron rails. About 40 miles of track were thoroughly ballasted, and 140,530 crossties renewed. The track is in better condition than usual at the opening of Spring. About 8,000 tons of rail and 150,000 ties will be required for the coming year.

Secretary & Treasurer.—GEO. H. RUSSELL.

Gen. Superintendent.—E. S. FLINT.

Chief Engineer.—FRANK FORD.

Auditor.—A. ELY.

☞ The Pennsylvania Railroad Company has declared its regular half-yearly dividend of five per cent, payable in cash on and after the 30th instant. Owing to the panic last fall, the dividend was a scrip one. But now the troubles are all over, the road is doing a profitable business, and the stockholders have no reason to fear that there will be any interruption of the regular dividends in the future.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS.

The receipts on capital account during the half-year to 31st January, 1874, amounted to £441,167, as follows:—

On account of May, 1873, issue of £1,209,000 perpetual 5 per cent debenture stock, including discount on total issue.		£400,670
For amount of November 1873 issue		520,000
		£920,670
Less—share account—difference in exchange on forty-four shares	£2	
Bond account—viz., 6 per cent bonds, matured 1st September 1873, paid off....	38,100	
Ditto 15th Nov. 1873, ditto.....	441,400	
		479,592
		£441,167

The total receipts on capital account amounted on 31st January 1874 to £8,113,849.

The charges to capital account during the half-year amounted to £857,353 as follows:—

For land works, permanent way, and incidental charges, buildings, &c.....	£107,421
Double track between Glencoe & Windsor	228,480
Allanburg branch (nine miles), from Allanburg on the Welland to Suspension bridge	37,758
Detroit river bridge surveys....	236
Third car ferry boat Saginaw....	2,106
Fourth car ferry boat Michigan....	28,847
Locomotives	108,070
Cars	81,851
Glencoe and Buffalo loop line....	101,097
Discount and commission on issue of £1,729,000 perpetual debenture stock, and cost of exchange on London.....	161,483
	£857,353

The total expenditure to 31st Jan. 1874 amounted to £8,103,736, leaving a balance at credit of capital account of £10,113.

The receipts and expenditure on revenue account for the half-year have been as follows:—

Gross receipts....		£625,916
Working expenses, including renewals, taxes, rents, and all charges....		430,080
		£195,836
From which is to be deducted—		
Interest on bonds, &c..	£97,870	
Discount and charges on American currency, &c	27,215	
Amount set aside for renewal of ferry steamers....	3,000	
Alteration of gauge account....	9,100	
Cost of repairing damage caused by floods.....	2,345	
		139,532
		£56,304
Add profit on working leased lines	1,494	
Balance of interest account.....	2,970	
Surplus from last half-year	5,024	
		9,489
Amount available for dividend.....		£65,793

The dividend for the half-year on the 5 per cent preference stocks amounts to £5,692 and from the balance of £60 101 the directors recommend a dividend on the ordinary shares at the rate of 2½ per cent per annum, which will absorb £55,741, leaving £4,359 to be carried forward to the next half-year.

On the 11th March public intimation was given that the directors had just received a telegram from Canada, stating that the half-year's accounts showed a surplus sufficient to pay a dividend on the ordinary shares at the rate of 3¼ per cent per annum, but the directors added that this was subject to their own and the auditors' examination of the accounts when received from Canada. On examination of these accounts, the directors were surprised to find that the dividend above mentioned could not be paid unless a portion of the amount expended during the half-year for re-laying the main line with steel rails was carried over to the next half-year, and as the directors could not assent to this, they had no alternative but to order the whole of the expenditure chargeable to revenue under the above head to be brought into the accounts for the past half-year. This, with some other corrections found necessary, reduced the balance available for dividend to the sum above stated.

The shareholders are aware that the interest on the cost of the Glencoe loop line has been charged to revenue in the past half-year, although the advantages which the company will derive from that line have been as yet but very partially realized. Other exceptional circumstances referred to in a subsequent part of this report have also pressed heavily on the working of the past half year, and when there is also kept in view the certainty, now that the entire main line has been re laid with steel, that the expenditure under the head of "maintenance and renewal of way" will for several years to come be materially lessened, the directors think it might have been a fair subject for the consideration of the proprietors whether, under the special circumstances mentioned, they would not have authorized the spreading of the final payment referred to over two half years; but in the absence of any such authority, the directors considered that they would not be justified in departing from the strict rule in such cases, and although the result may be for the moment disappointing, they are satisfied the course adopted will ultimately be to the advantage of the shareholders.

The aggregate traffic receipts on the main line and branches (exclusive of those of the Galt and Guelph, the Wellington, Grey, and Bruce, and the London and Port Stanley) exhibit a gross increase of £29,870, which consists of—

Increase in way passenger	£815
" way freight and live stock	5,672
" through freight and live stock	30,693
" mails and express freight.....	278
	£37,459
Decrease in through passenger traffic...	7,589
Total increase	£29,870

The receipts and ordinary working expenses per train mile for seven corresponding half-years compare as follows:—

Half-year ending	Gross earnings per train mile.	Working exp. per train mile.
31st Jan. 1868.... ....9s. 7¾d.		4s. 5¾d.
" 1869 .... .9 0¾		4 3¾
" 1870 .... .8 7¾		4 9¾
" 1871 .... .7 9		4 6¾
" 1872 .... .8 0¾		4 8
" 1873 .... .7 10		4 9¾
" 1874 .... .7 8¾		4 11

The earnings and expenses per train mile have been injuriously affected by the severe financial crisis which prevailed in New York from the beginning of September last, the effects of which have been felt throughout the United States and Canada. The passenger earnings show a decrease of £6,773 solely due to this cause, but although this branch of traffic was falling off, it was found impossible to reduce the number of trains. Without any increased expenses, therefore, the same trains could have earned a larger amount of money, and this decrease is consequently a direct loss to net revenue. The through freight business, as well as the local Canadian traffic, was also for four months of the half-year, from the same cause, very materially reduced, an almost complete stagnation of trade having been the result of the panic. For ten weeks previous to the close of the year the traffic receipts showed an average decrease of £2,615 per week, for, unfortunately, as the quantity of goods to be conveyed fell off, so the competition to carry what remained increased, and in consequence the rates for through freight became gradually reduced. The Great Western, whose line forms an intermediate link in the through chain, had to submit either to take its mileage proportion of such reduced rates, fixed by the competing terminal companies, or to lose the traffic altogether.

In order to show in figures the effect of this reduction in rates, the directors may state that the amount received for through traffic carried in the past half-year was £276,160, but had the tonnage which produced this been carried even at the low rates obtained in the corresponding half-year of 1873, the company would have received £306,950, or £30,790 more, for performing the same amount of work. From this the shareholders will see how severely the company has suffered during the past half-year from causes entirely beyond the control of the executive.

The directors also regret to have to notice the continued increase in the ordinary working expenses; the prices of labor and materials having again been high. The increased charge for interest against the half-year has been £60,335. Renewed instructions have been given that the most rigid economy shall be exercised in all departments, and that no further outlay of capital which can possibly be avoided shall be made.

The following table exhibits the receipts and expenses for seven corresponding half-years:—

Half-year ending	Receipts.	Expenses.	Per ct.
31st Jan. 1868	£400,812	£193 666	48.31
" 1869	423,311	209,752	49.55
" 1870	424,182	243,379	57.37
" 1871	444,348	267,481	60.19
" 1872	527,351	313,936	59.47
" 1873	595,889	376,512	63.19
" 1874	625,916	430,080	68.71

The discount and charges on the conversion of American currency for the half year amounted to £27,215, as compared with £33 182 in the corresponding half-year. The conversions were made at an average rate of 110½, the average price of gold for the half year being 111¼.

The ferry steamers' renewal fund has been credited with the usual half-yearly amount and accrued interest, and after debiting the cost of renewals of the ferry boat Great Western, there is a balance at the credit of the fund at 31st January 1874 amounting to £10,531.

The usual amount of £9,100 has been charged to revenue on change of gauge account, making a total of £54,600 charged against this account to 31st January 1874, leaving yet to be charged of the original estimate £36,384. Six old broad gauge locomotives and 6,000 tons of old iron rails are on hand, and will be disposed of at the first favorable opportunity. The proceeds will be placed to the credit of this account.

The system of charging a fixed rate for repairs and renewals of locomotives and cars has been continued. At 31st July 1873, the balance at the credit of this renewal fund amounted to £30,236. To this has been added in the past half-year, including interest, £13,829, making the amount at the credit of the account at 31st January 1874 £44,066 for locomotives. There was also placed to the credit of this fund is the past half year for renewals of cars £3,275; the total amounts to £47,341.

The operation of the Galt and Guelph, Wellington, Grey, and Bruce, and the London and Port Stanley lines has been satisfactory during the half-year. The working account of the Galt and Guelph, which, prior to the opening of the Wellington, Grey, and Bruce line exhibited little profit, shows this half-year a credit balance of £2,63 7which is due to the new traffic brought over it from the Wellington, Grey and Bruce.

The operation of the Port Stanley line, after debiting the working expenses, half year's rental, and proportion of the cost of renewals, left a profit of £843.

These two sums amount to £3,480, from which is deducted £900 for half-year's rental of the Welland, under the agreement with that company, and also 1,086, being the proportion of the expen-

diture for renewal, &c., of that railway, which leaves a balance of profit, on working the leased lines for the half-year, of £1,494.

The result of operating the Wellington, Grey, and Bruce at 70 per cent of the gross earnings is a profit of £157 which has been added to the profit on previous working, and there now stands in the books a credit of £312 under this head. Statements of the working of these subsidiary lines are appended to the accounts.

An amount, equal to 20 per cent of the earnings on the Great Western, derived from traffic interchanged with the Wellington, Grey, and Bruce, is applicable, under the agreement, to the acquisition of the bonds of that company. The aggregate of this traffic on the Great Western for the half year was £16,864, of which 20 per cent, £3,372, will be appropriated for that purpose.

The South Bruce division from Palmerston to Kincardine, 67 miles, is nearly completed, but is not yet in a condition for the Great Western to take it over from the Wellington, Grey, and Bruce, that company having difficulties in settling with the contractor, and requiring to raise a small additional amount of capital to finish the line. This delay is to be regretted, as the traffic from the fertile district traversed by this extension cannot, in the meantime, be obtained for its own line or for that of the Great Western.

The Allanburgh branch of 9 miles in length, which was commenced on the 19th August, and opened on 3d November for traffic, has proved of the greatest service, enabling the freight traffic brought over the loop line to be worked via the Suspension bridge, thus avoiding the tolls, which would have been levied if the traffic had been carried over the International bridge. The total amount expended in the construction of the Allanburg branch has been, to the end of the half year, £37,758. The general manager reports that if the traffic sent over this branch had been forwarded by the International bridge, the amount payable for tolls from 3d November 1873 to 31st January 1874 would have been £8,417.

The last section of the Glencoe loop line, from the Welland Junction to the International bridge, was completed and opened for traffic on 15th December 1873. The International bridge has been used to a small extent for the passenger business between points on the main line and the city of Buffalo via the Welland and the loop line, but the traffic in this direction will doubtless increase when the Erie connection with the International bridge has been effected. The total interest on the expenditure for the loop line to Welland Junction is charged against revenue from the commencement of the past half year. The interest on the expenditure from Wellard Junction to the International bridge at Fort Erie has also been charged against revenue from 15th December 1873, when that portion of the line was opened for traffic. The easier gradients of the loop line have enabled the company to run trains of twenty seven loaded freight cars during the winter from Windsor to Suspension bridge with one locomotive via the Allanburgh branch—the largest number ever worked over the main line having been twenty four cars, and then, with the assistance of a pilot engine at some points. On the whole number of trains which have been run over the loop line since the opening of the Allanburg branch the three additional cars per train has been equal to a saving of 152 trains or nearly two trains per day.

Mention was made in last half year's report of a proposal to create a reserve fund for the renewal of the permanent way, when the whole of the line was laid with steel rails. In completion of the renewal of the main line 30 miles of iron rails have during the last half year been replaced by steel, the proportionate cost to revenue being £33,176.

It has been decided also to relay the Toronto branch of 39½ miles with steel in the course of the present year, and the engineer has been instructed to report upon the estimated future cost of steel rail renewals, founded upon the experience of the past, and the question of the formation of a reserve fund will then be dealt with.

In 1853 the company became lessees in perpetuity of the railway over the Suspension bridge, Niagara Falls, at an annual rental of £9,000. The validity of this lease has been called in question, and the Canadian Vice Chancellor has recently given a judgment to the effect that an exclusive lease is *ultra vires* so far as concerns the half of the bridge within Canadian jurisdiction. This decision will be appealed against; in the meantime, negotiations have been opened in Canada, with a view of acquiring the whole property of the bridge for a fixed sum, and the directors desire to obtain the authority of the shareholders to take such action therein as may be deemed expedient.

The 6 per cent bonds of the company, to the amount of £488,200 which fell due in September and November 1873, have provided for by the issue of 5 per cent perpetual debenture stock.

The various new works, for which capital was raised last year, will require for their completion, in consequence of the rise which has taken place in labor and materials, a larger amount than was originally estimated. The same causes have produced an excess in the cost of the Glencoe line over the capital which was provided for it when its construction was authorised. That line has also been improved by the construction upon it of additional sidings, and other works, not contemplated in the original plan.

New sidings, and works of various kinds, have also been provided, or are in progress, at different parts of the line, and further rolling stock has been obtained, all with the view of meeting the expected increase in the traffic. The construction of the Allanburgh branch has likewise been a source of expenditure, for which no capital has been provided. A further creation of new capital, to the extent of about £500,000 is therefore necessary for these purposes, as well as to provide a working capital for stores, &c.; and it is proposed to raise this, by the issue of a sufficient amount of 5 per cent preference stock, convertible, at the option of the holders within a limited period, into ordinary shares. A resolution authorising the issue of this capital will be brought before the shareholders at the special meeting, to be held after the conclusion of the ordinary business.

The proprietors will remember that at the adjourned general meeting held on October 30th, 1873, a committee of inquiry was appointed, with the concurrence of the board, to examine into all matters relative to the company's affairs both in London and Canada. This committee at once commenced their duties, and for some time pursued their inquiries at the London offices. A delegation of their number has now gone to Canada, accompanied by assistants, to continue their investigation.

The examination of the affairs of the Detroit and Milwaukee will, it is understood, be one of the prominent objects of this investigation. It will embrace an inquiry into the value of the traffic connection of that railroad, the sufficiency of the supply of rolling stock, the condition of the permanent way, and the claims of the mortgage bondholders. Meantime, the ordinary business of that company has been conducted without interruption.

When the committee are prepared to present their report to the shareholders a special meeting will be called for its consideration, of which the usual thirty days' notice will be given. In the meantime, it has been deemed desirable that the meeting called for April 22d next shall be confined to the transaction of the necessary current business of the company.

The directors regret that the result of the working of the last half-year has been so unsatisfactory. They trust that upon the revival of trade in Canada and America the large amount of additional capital expended will become productive, and result in a better return to the shareholders.

On behalf of the board of directors,

THOMAS DAKIN, President.

London, April 10, 1874.

☞ The Watson Manufacturing company, of Paterson, N. J., has received four contracts for iron bridges from the United States of Colombia, South America, to be finished and shipped in June. One bridge will be a suspension, 130 feet span; another 164 feet, in two spans; the third, 70 feet span, and the fourth, 60 feet span. The last of the iron work for the Salavarry and Truxillo Railroad bridge over El Rio De Chim, in Peru, has been shipped. The total length of this bridge is 2,296 feet, and the cost complete $75,000 in gold.

The Private Corporation Bill.

Senator Wallace's bill for the creation and regulation of corporations has passed the Pennsylvania Legislature and been signed by the Governor. The mode of creation is simple and easy. Many of its provisions are valuable aids to enterprise, for instance the following sections relative to iron and steel companies:

Section 38. Companies incorporated under the provisions of this act for the manufacture of iron or steel, or both, of any other metal, or of any article of commerce, from wood or metal, or both, unless otherwise provided by this act, shall, from the date of the letters patent creating the same, have the powers and be governed, managed and controlled as follows:

Clause 1. Every corporation may, in the manner prescribed in this act, increase is capital stock to an amount not exceeding $5,000,000, and shall have the right to purchase, lease, hold, mortgage and sell real estate and mineral rights, to prove and open mines, to mine and prepare for market, or for their own use and consumption, coal, iron ore and other minerals, and to erect and construct furnaces, forges, mills, foundries, manufactories and such other improvements and erections as they may deem necessary, and to manufacture iron and steel or any other metal, or either thereof in all shapes and forms and either of these metals exclusively or in combination with other metals or with wood, and to transport all of said articles or any of them to market and to dispose of the same, and to do all such other acts and things as a successful and convenient prosecution of said business may require; provided, they shall not at any one time have more than 10,000 acres of land within this Commonwealth, including leased lands.

Clause 2. Every such corporation may make and issue bonds, with or without coupons attached, bearing interest not exceeding six per centum per annum, and to sell, exchange or otherwise dispose of the same upon such terms and conditions as they may deem advisable, and such bonds and the interest thereon may be secured by a mortgage or mortgages upon the corporate franchises, real or leasehold estate; provided, they shall not issue bonds for a greater sum than three times the amount of their capital stock paid in.

Clause 5. The incorporation of any association of persons for the purposes named in this section shall be held and taken to be of the same force and effect as if the powers and privileges conferred and the duties enjoined had been conferred and enjoined by special act of the Legislature, and the franchises granted shall be construed according to the same rules of law and equity as if it had been created by special charter, and no modification or repeal of this act shall affect any franchises obtained under the provisions of the same.

Clause 6. That it shall and may be lawful for any incorporated company of this Commonwealth or elsewhere to subscribe and take shares of stock in any company incorporated for the purpose named in this section of this act, or to purchase the bonds or stock, or guarantee the payment of said bonds and the interest thereon, or either principal or interest.

Clause 7. A majority of the stock of such corporation may be held by persons who are not citizens of this State or of the United States; a majority of its directors may be citizens of another State, or of any foreign country, and it may have an office at any place without the State at which the by laws of the corporation may authorize the same, meetings of stockholders may be held, and any business of the corporation transacted; but it shall also keep an office within the county in which its principal business in this State is transacted, and an officer of the company there, upon whom service of proceeds may be made, and the property and stock of such corporation shall be at all times liable to taxation under the laws of this Commonwealth; corporations for any of the purposes named in this section heretofore created by any special or general law of this Commonwealth on accepting the provisions of the constitution shall be entitled to all of the privileges and powers conferred by this act upon such corporations to be hereafter created.

Clause 8. That the stockholders of every company, incorporated for the purposes named in this section, shall only be individually liable for debts due to the laborers, or clerks, for services, and in that case for no period exceeding six months.

The corporations covered by clause eighteen, above quoted, are Manufacturing, Mining, Mechanical, Quarrying and other Companies:

Section 39. Companies incorporated under the provisions of this act for the carrying on of any mechanical, mining, quarrying, manufacturing or other business, as provided in clause eighteen of the second class in section two hereof, when not otherwise provided in this act, shall, from the date of the letters patent creating the same, have the powers and be governed, managed and controlled as follows:

Clause 1. That every such corporation may have a capital stock not exceeding five million dollars, and may, by a vote of three fourths of the general stockholders, at a meeting called duly for the purpose, issue two kinds of stock, namely, general stock and special stock; the special stock shall at no time exceed two fifths of the actual capital of the corporation, and shall be subject to redemption at par after a fixed time, to be stated in the certificates; holders of such special stock shall be entitled to receive, and the corporation shall be bound to pay thereon a fixed or half yearly sum or dividend, to be expressed in the certificates, not exceeding four per centum, and they shall in no event be liable for the debts of the corporation beyond their stock.

Clause eighteen of second class of section two is as follows:

The carrying on of any mechanical, mining, quarrying or manufacturing business including all of the purposes covered by the provisions of the acts of General Assembly entitled "An act to encourage manufacturing operations in this Commonwealth," approved April 7, 1849, and entitled "An act relating to corporations for mechanical manufacturing, mining and quarrying purposes," approved July 18, 1868, and the several supplements to each of said acts, including the incorporation of grain elevator, storage, warehouse and storage yard companies, and also including the storage and transportation of water, "with right to take rivulets and land and erect reservoirs for holding water," and excluding the distilling or manufacture of intoxicating liquors.

Mechanical, mining, manufacturing, quarrying, grain elevating, storage warehouses, storage yards, storage of water by reservoir or otherwise, transportation of water by aqueduct or otherwise, manufacture of woollen, cotton, flax or silk goods; also, of glass, iron, paper, lumber or salt or articles made from salt; printing and publishing, enamelled and vitrified iron, articles coated with glass or enamel, or made of cast or wrought iron; oil and other products of rosin; purchase and sale of patents and rights and licenses under said patents, manufacture or sale of patented articles; any horticultural or agricultural business; raising and growing of trees, plants, seeds and grains; transportation and storage of petroleum: mining coal; mining, quarrying and preparing for market lime, marl, soda, hydraulic cement or other minerals; smelting copper, lead, tin or zinc ores; mining and manufacturing of mineral paints and artificial slates, and other articles made by use of said painting materials; artifical manures; articles made out of iron and other metals; articles made out of iron, wood and other metals; common carriers; leather, flour or lumber manufacturing; oils, hydro carbon fluid or distillation of; coal oil refining; fuel manufactories; lubricating oils; materials made out of and from mineral oils and other oils or fatty substances, whether mineral, animal or vegetable.

All of the privileges conferred by clause 7 of section 38 (given above), are given by clause 18 of section 39 to the above named corporations.

The following provisions are general and cover all corporations for profit created under or accepting this bill:

Section 16. Every corporation created under the provisions of this act, or accepting its provisions, may, with the consent of a majority in the interest of its stockholders obtained at a meeting to be called for that purpose, of which public notice shall be given during thirty days in a newspaper of the proper county, issue preferred stock of the corporation, the holders of which preferred stock shall be entitled to receive such dividends thereon as the board of directors of the corporation may prescribe, payable only out of the net earnings of the corporation.

Section 17. Every corporation created under the provisions of this act or accepting its provisions, may take such real and personal estate, mineral rights, patent rights and other property as is necessary for the purposes of its organization and business, and issue stock to the amount of the value thereof in payment therefor, and the stock so isued shall be declared and taken to be full paid stock, and not liable to any further calls or assessments, and in the charter and the certificates and statements to be made by the subscribers and officers of the corporations such stock shall not be stated or certified as having been issued for cash paid into the company, but shall be stated or certified in this respect according to the face; no such corporation shall issue either bonds or stock except for money, labor done or money or property actually received, and all fictitious increase of stock or indebtedness in any form shall be void; every such corporation may provide for the issue of deferred stock in payment of such real or personal estate or mineral rights, and, if so provided, it shall be expressly stated in the charter filed, or in a certificate to be made and recorded, or in the acceptance of the statute, to be filed by any corporation accepting its provisions, with the amount of such deferred stock and the consideration of the same, and the terms on which the same shall be issued; and the said stock may be made to await payments of dividends thereon until out of the net earnings at least 5 per cent has been declared and paid upon the other full paid stock of the corporation.

Wood Carbolizing.

It is proverbial that large bodies move slowly, we know; but why it is that the railroad corporations of the country, and especially those engaged in constructing or enlarging their lines, are not more anxious to subserve their own true interests by grasping and applying every well tested improvement in railway economy, is quite beyond our comprehension.

It is well known that any kind of wood treated by the Seely Pelton process is thereby rendered entirely imperishable by any action of the weather or water, either salt or fresh for at least an entire generation.

The method referred to consists in brief, of forcing out from the fibre of the wood the sap or albumen and all the inherently destructive elements, and then saturating it, or filling those open pores with the preservative properties of creosote or dead oil.

Railway timbers thus treated are practically placed beyond the reach of decay, and we have seen such, that have stood the test 25 years, and to all appearances, are as sound as when first laid down.

Take the one item of ties for instance. These require relaying, on an average once every six years. It is well settled that ties treated by the above process show not the least sign of decay inside of 25 years, and how much longer they would last we have no practical means of estimating, except by the lapse of time.

Thus, then, in this 25 years' duration, there is saved we see, three entire renewals, over the whole line. Here, then, in the one item alone, of ties, we find a net saving in cash, for that period, of almost five millions of dollars, on an ordinary single track of 500 miles in length, taking current prices as the basis of our estimates.

What is true as to ties, also holds good with respect to the bridge timbers, depots, and all other exposed wood construction of a line of railway. The actual cash saving, that would thus be effected, in the period named on any considerable line of road, IS ALMOST FABULOUS.

Certain it is, railway timbers, ties, &c., thus carbolized, will never require renewal during the official lifetime of any present officer of such road.

The facts and figures proving the foregoing assertions, and now before us, are overwhelming and incontrovertible; and we call upon Railway officials throughout the country to give this subject of timber preservation, immediate and serious consideration, both as a matter of money to shareholders, and safety to the traveling public.

The "American Wood Carbolizing Co.," offices 59 Liberty St., N. Y., composed of some of our most substantial and reliable citizens, and whose advertisement appears in another column, will give any required information, as to price of territorial rights, cost and manner of creosoting, or for construction of apparatus for others to use.

☞ The total shipments of coal from the Shenandoah region during 1873, amounted to 1,265,079 tons. The shipments for the previous years were, in 1870 537,790 tons; in 1871, 795,584 tons, and in 1872, 1,006,914 tons, showing a satisfactory progression in the quantity produced. The entire production of the Schuylkill region in 1873 was 5,066,799 tons.

Southern Pacific Railroad.

The Bakersfield (Kern County, Cal.) *Courier* says: Work has been commenced on the extension of the railroad southward from Delano. At that time the force consisted of one hundred men and thirty five teams. It has been largely increased since, and iron and tires are arriving. The probabilities are very strong at this time that work will not cease until connection is made with the road extending out from Los Angeles to San Fernando."

Virginia Smelting Coal.

Schooners R. A. Collins, Ella H. Barnes, Caroline Hall, and Mary and Frances, are loading coal at the wharves of the Chesapeake and Ohio Railroad Company for the State of New York—two of them for Troy.

American Railroad Journal.

Saturday, May 9, 1874.

Stock Exchange and Money Market.

Money has been more active, since our last. The speculative demand has been more urgent. Lenders have found less difficulty in placing balances, and rates have been rather firmer, ruling generally at 4@5 per cent on call to the more prominent Stock Exchange houses. To the larger dealers in the public funds, advances have been made to the full extent of their moderate requirements at 3@4 per cent. The discount market has been comparatively quiet, with the best grades of business paper quoted at from 6@7 per cent per annum. The City banks, in their last weekly statement, were $85,200 lower on their deposits and $1,849,200 on their loans and discounts, than the week before. The legal tender notes were increased $1,093,400, and the specie reserve $1,303,200. The circulation was contrated $12,000. The U. S. Sub-Treasury at this port has gained considerably in the line of its currency reserve, while reducing its coin hoard mainly through May interest disbursements. The U. S. Sub-Treasury in this city closed the week with a currency balance of $38,288,829 against $37,588,214 the preceding week; and a coin hoard of $56,650,988 against $57,117,244 on the previous return. The City bank exchanges, during the week, were $491,427,114, or a daily average of $81,904,519. The customs revenue of the port, during the week, was $2,122,558 of which $1,998,559 were in coin certificates. The City banks reported their average of gold last week at $24,639,600, and their greenback average at $55,888,000. Their deposits stood at $234,401,500. The loan item was about 286⅝ millions. The circulation was $26,889,600.

The receipts of the U. S. Sub Treasury at this port from all sources, in April were $35,212,648, including $9,819,441 from customs; disbursements on all accounts, same time, $38,466,102; including $2,373,044 of coin interest on the public debt.

The sales of gold for May will be as follows; On the first and third Thursdays $1,500,000 each day, and on the second and fourth Thursdays $1,000,000 each day, making $5,000,000 in all.

The Treasury will be called upon to make provision for the pension payments due June 1, which will amount to about $7,500,000.

The disbursements of the Treasury Department in April, exclusive of the principal or interest of the public debt, were $13,171,163.

The cash balances of the Treasury Department on Wednesday were: Currency, $7,898,956; special deposits of legal tender for redemption of certificates of deposit, $52,615,000; coin, $89,712,470; including coin certificates, $35,332,600.

The outstanding amount of legal tender notes is yet 382 millions; and of National bank circulation 349 millions.

Government has received about 83¼ millions from internal revenue, thus far in the current fiscal year.

Gold has been depressed and quoted lower, closing weak. The speculative inquiry has been less active. The free coin interest disbursements of the Treasury office, and the Government Gold sale announcement for May tended to check speculative dealings. The export demand fell short of the anticipations of the operators for a rise. The customs drain was moderate. The extremes of the price have been 112@118⅛, closing at 112⅛ as against 113⅛ on Wednesday of the preceding week. The specie outflow, last week, was $889,384. The imports of specie at this port since Jan. 1, have been $1,263,625, against $1,097,018 same time last year. The customs demand for Gold last week averaged $363,834 a day. Foreign Exchange has been in less demand and has been quoted rather less firm. Bankers' sixty day bills on London closed on Wednesday at $4 87@4 88; sight bills on London, at $4 90@$4 91. The week's exports of Domestic Produce have been to the currency value of $5,736,888.

Government securities have been moderately active, but at rather lower currency prices, influenced, mainly, by the depression in Gold. U. S. sixes of 1881 closed on Wednesday of this week at 121⅛@122; U. S. Five-Twenties of 1862, 115@115⅛, ex May coupon; U. S. Five-Twenties of 1864 at 116⅞@117⅛; U. S. Five-Twenties of 1865, 117⅞@118⅛; U. S. Five-Twenties of 1865 consolidated, 119¾@119⅝; U. S. Five-Twenties of 1867, 120¼@120½; U. S. Five-Twenties of 1868, 120@120½; U. S. Ten-forties at 114¾@115; U. S. Fives of 1881, (Funding Loan) 115@115¼; Six per cent. currency Sixes from 116½@116¾.

State and Railway bonds have been in moderate request since our last, at about previous prices, in the leading instances. Central Pacific first mortgage six per cents have been in demand, closing at 94½@95; Western Pacific sixes, 87½@87¾. Chesapeake and Ohio First Mortgage Bonds, Six per cents, have been inactive, and quoted at from 51½@52½. Railway and miscellaneous share property has been very freely dealt in, but generally at much lower, and very irregular figures; the speculation having been mostly of a decidedly bearish temper.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,537,995, against $6,970,380 same week last year. The exports of domestic produce are $5,736,887, as against $7,513,679, last year. The exports of Gold and Silver, $889,334, as against $401,318 last year. The customs in Gold deposited during the week in the New York Office of the Treasury amounted to $2,185,700, as against $2,216,614, same week last year.

General business fairly active, in the line of domestic produce, but at variable and at the close easier rates. Foreign merchandise has been moderately sought after at about previous figures. The Metal trade has been without improvement, notwithstanding the more favorable foreign advices. Iron has been quite dull and more or less nominal in the local market Eglinton Pig Iron quoted at $34 50@$36. Glengarnock, $37 50@$38; Coltness, $39@$39 50; No. 1 American Pig at $35; No. 2 do. at $31@$33; Forge, $29@$31; English Rails at $55@$60, gold; American Rails at works, $60@$65; Old Rails, $40@$41. Wrought Scrap, $40@42 50. The Ocean freight market has been moderately active at stronger rates on grain shipments. The cotton trade of the week was light in receipts, owing to high water in the lower Mississippi and its tributaries. Only 4,300 bales were received at New Orleans, and 29,800 at all the ports. The clearances to foreign markets were 65,800 bales. The total crop receipts, to date, now stand 3,553,000 bales, against 3,258,000 last season, and 3,623,000 bales the big crop year, 1870-'71. The amount thus far marketed abroad is 2,495,000 bales, against 2,168,000 bales, to date last year.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Oakland *News* says that the Alameda, Oakland and Piedmont Railroad Company has been reorganized. Work on the road will soon be commenced.

☞ The Catawissa Railroad Company have declared a dividend of 3½ per cent on the preferred stock and 22½ cents per share on the new preferred stock, payable on the 8th instant.

☞ The Wilton Railroad Company has declared a semi-annual dividend of 3½ per cent.

BANKING-HOUSE OF FISK & HATCH,
No. 5 Nassau st., New York.

We buy and sell GOVERNMENT BONDS and GOLD at current market rates; buy Gold Coupons, buy and sell stocks and bonds at the Stock Exchange on commission for cash; receive Deposits, and allow interest at the rate of four per cent; make Collections, and transact a general Banking and Financial business.

We also deal in the CENTRAL PACIFIC and WESTERN PACIFIC GOLD BONDS, which are very desirable for investment.

The CENTRAL PACIFIC is an important Trunk Line Road, with an average monthly revenue exceeding $1,000,000. The Company have a small unsold balance of their SIX per CENT. GOLD LAND BONDS, with the proceeds of which, and their surplus earnings, after paying expenses, interest, and dividends, they are adding to the permanent improvements of the road. The amount is less than $800,000; we are selling them at 85 and accrued interest, and consider them an excellent investment.

FISK & HATCH.

The Legal Aspect of State Regulation of Railroads.

Allusion has been made in our columns to the action of the leading Wisconsin roads in resisting the application of the recently enacted "railroad laws" of that and adjoining States. On the authority of the New York Daily *Bulletin*, we learn that the Milwaukee and St. Paul Railway Company, (acting in concert, no doubt, with others,) proposes to meet this question at once, so as to determine what are the legal rights of corporations under the circumstances. As a preliminary step they have sought the counsel of the best legal minds in the country. The opinion is written by Hon. Wm. M. Evarts, and is concurred in, we understand, by Hon. Reverdy Johnson, Hon. Rockwood E. Hoar, and associate Judge B. R. Curtis, a combination of legal learning, which is as strong as the country affords. It only needs a hearing before the Supreme Court, to have these views propounded as the settlement of the issues involving the welfare of our railroad owners; but unfortunately this involves delay.

The case submitted to Mr. Evarts for opinion cites that the Law of Wisconsin of March 11th, 1874, (1) declares railways to be "public highways;" (2) divides the railroads of the State into three classes and makes different rates for each class, which would be ruinous to the roads; (3) compels companies to discriminate in their charges in a way which involves great inequality to shippers; (4) makes it a crime for any agent of a railroad to charge or receive more compensation for transportation than is allowed by this act; (5) delegates to a board of commissioners power to determine at what rates freight or passengers shall be carried, and makes disobedience to their decisions a misdemeanor; and (6) requires that said commissioners shall be conveyed free over the roads, thereby confiscating the use of the company's property.

Mr. Evarts' opinion is confined to the Wisconsin law, leaving for future consideration the like laws lately adopted in Iowa and Minnesota, whose operation also affect the Chicago, Milwaukee and St. Paul Company. He accepts it as settled in jurisprudence that a charter is in the nature of a

contract between the State and the corporation; and admits that Sec. I, Art. II, of the State Constitution—that all general laws or special acts (relating to acts incorporating corporations) may be altered or repealed by the Legislature at any time after their passage—authorizes the Legislature to modify charters, provided a provision to that effect be inserted in the original charters. So far the validity of the Act in question appears to be conceded. Mr. Evarts, however, maintains that there are necessary limitations upon the extent to which such alteration or repeal can apply. He maintains that the corporation has the same rights as the individual in the ownership and use of its property, resting upon the constitutional guarantees common to all property, and that to this the reservation of legislative control over the granted franchises does not apply. After stating the grounds of his opinion with admirable clearness, Mr. Evarts thus states his conclusions as to the extent of the power reserved by the State to alter or repeal granted charters:

I am now able to consider the true meaning of this reservation, in respect of the grant of franchises to private trading corporations, and of the rights of the grantee dependent thereon, which is expressed in the constitution by the words that the granting act "may be altered or repealed by the Legislature at any time."

It is quite manifest that this can mean no more, at the utmost, than that the granted franchise, to be a corporation, or the additional grant to exercise functional franchises, not of common right, but savoring of public service, may be absolutely terminated or their further exercise modified or burdened with conditions, if their further exercise is pursued by the corporation.

It certainly cannot mean that a "repeal" of the grant can make it as if it had never existed, confiscate or annul the title to the property, and create a vacant possession.

It certainly cannot mean that the State, not only thereby restores the granted franchises, in whole or in part, to their original deposit in the sovereignty of the State, but acquires all or any of the property of the private corporation for continued public use.

It certainly cannot mean that the State, besides terminating or modifying the exercise of the granted franchise by its grantee, can take up and carry on the public franchise itself, with and through the private property of the corporation, thus subdued, by conquest, not purchase, to the public use.

It certainly cannot mean that, besides depriving entirely, or *pro tanto*, the grantee corporation of the privileges, granted and their further enjoyment, the State can compel, by pains and penalties, the continuance of the public service by the grantee, not according to the inducements, profits and stipulations of the contract, under which the corporate service was assumed, but according to the uncovenanted exactions of the State.

Or, as this last proposition may be otherwise stated, there cannot be imputed to a reserved right in the grantor, the State, to subtract from the grantee the further enjoyment of the granted franchises, in whole or in part, an authority to compel the service of the unbroken franchise, in all its burdens, notwithstanding the rescission of the contract, in all its benefits to the grantee.

It would follow, from these propositions, that the extent of the reserved right to the State, under this cause of the Constitution of Wisconsin, is—

First.—Absolutely to terminate the franchise, thus liberating the grantee from further performance, and restoring to the State the franchise in its plenitude. This would leave the property of the corporation to be wound up under the protection of the Constitution, the law and the courts, and cast upon the State, if the railroad service was further desired within the borders of Wisconsin, the duty of providing for such service, at the public expense, or renewing a grant of the franchise to some new grantee.

Second.—To modify the granted franchise in its future exercise, either by reducing the privilege or by burdening it with such conditions as the State should see fit to impose. In this case the grantee would be free to accept or reject the modified or burdened privilege. Its contract exposed it, we may concede, to lose its privilege, at the pleasure of the State, but did not bind it to involuntary and uncompensated servitude to the State as a task-master. If the grantee accepts the reduced or burdened service, a new contract is made and new obligations assumed. If the grantee rejects the proffered franchise, thus reduced and burdened, the State may retire from the new exaction, or wholly terminate the franchise.

The opinion further concludes:

Upon these views of the limits upon the power of the Legislature, outside of the reserved authority to terminate or modify the franchises of private corporations, and this interpretation of the scope and meaning of the reservation itself, I have no difficulty in imputing to the recent laws of Wisconsin invalidity for repugnance to the Constitution of Wisconsin, and also to the Constitution of the United States. * * * I must regard, then, the authority asserted in behalf of the State by this legislation as equivalent to a claim, under cover of this reservation of power, to repeal or alter the charter of a private corporation, of right to appropriate the property of such a corporation to the public service, at the mere discretion of the Legislature and without compensation. This authority, thus asserted, is equivalent also to a claim, under cover, of this same reservation, of a right to maintain the contract of the charter in full force in all its engagements, onerous to the company, under pains and penalties, and to revoke or modify, at will, all stipulations for the benefit or profit of the company.

I cannot think that this right is reserved to the State by any true interpretation of that clause of the Constitution of Wisconsin, and I am of opinion that the compulsory legislation which imposes upon this private corporation the regulation of its emoluments and the supervision of its administration by the State, is repugnant to the clauses of the Constitution of Wisconsin, which prohibit taking property for public use without just compensation, and the passing of any law impairing the obligation of contracts, and that such legislation is also repugnant to the clause of the Constitution of the United States which prohibits the States from passing any law impairing the obligation of contracts.

☞ The Governor of Wisconsin has appointed as Railroad Commissioners under a law of last winter, S. H. Osborn, of Oshkosh, for three years; George H. Paul, of Milwaukee, for two years; and J. W. Hoyt, of Madison, for one year.

The business will hereafter be conducted at No. 59 Liberty st., under the name of PERKINS, LIVINGSTON, POST & CO.

PERKINS, LIVINGSTON & POST.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Robt Harris, C. R. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

New York, Saturday, May 16, 1874.

Foreign Bondholders and American Railroads.

There are among us no less than five gentlemen charged with the duty of looking up and protecting the interests of German holders of American Railroad bonds on which interest is not paid. Messrs. Villard, Wolff, Jordan, Murphy and Osterberg are their names, and the number of roads affected is about a dozen. The New York and Oswego Midland, Kansas Pacific, Oregon and California, St. Joseph and Denver City, Alabama and Chattanooga, Rockford, Rock Island and St. Louis, and Cairo and Vincennes roads are the principal objects of solicitude. The New York and Oswego Midland and the Rockford, Rock Island and St. Louis bondholders have each two conflicting representations. They all agree in their accounts of the uncomplimentary state of feeling which prevails in the minds of German bondholders regarding American roads, American bonds, American Courts and Americans themselves. It seems to be assumed by the creditors of these unfortunate American roads that the blame is all on one side; and that it is a clear case of modest and confiding virtue, on one side, and shameless deception and dishonesty, on the other. These German financial virgins complain that they have been deceived and ruined by listening to the charming and seductive temptations of their American suitors. They declare that they loaned their money in good faith, and at fair rates, on the pledge of roads which they supposed to be valuable; and they now ask that, since they cannot have their interest promptly, they may be placed in possession of the roads. It does not much matter that they will be no nearer their money with the roads, than with the bonds, but they plaintively ask that the naughty projectors, who coaxed the cash out of their pockets, may be punished for their duplicity. Their chief anxiety is that the American courts may not be upright enough, or gallant enough, to come to the rescue of suffering foreign innocence in the way invoked.

There is another stand-point from which to view this matter, which may or may not properly come before the courts, but which, in discussions of national honor and of international comity, has its bearing. Have these European bondholders used due diligence in making their purchases; and was a sufficient consideration given for the bonds? It is notorious that during the past ten years a vast quantity of railroad bonds has been sold in Europe, and especially on the Continent, which could not have been sold at home at all; it is also true that the prices obtained for them have been such as to raise a presumption of gross recklessness on the part of the borrower, or gross credulity on the part of the lender, or both. Under the rule of *caveat emptor*, it would seem as if the purchaser, who expected to get a seven per cent gold bond, running 30 years, and secured by a first mortgage upon a valuable and profitable railroad at the rate of 60 to 75 per cent of its nominal value, was either dazzled by his cupidity, or must have formed the most extravagant notions of the power of money in America. At all events he was "put upon the inquiry;" in the hope of large gains he took large risks, and has lost. Some of the above named bonds were sold at less than the lower figure we have named; perhaps the whole of them would average 65; and it is asserted of at least one of them, that the amount actually turned into the road did not reach 50 per cent, in gold, of the nominal amount of the bonds sold. There was a time when the Frankfort and Amsterdam bank offices were thronged with Americans, whose black bags were filled with railroad bonds promising to pay any rate of interest, anywhere, in any sort of money, and generally accompanied with liberal offers of shares and large commissions to the agents and first handlers of the loans. The railroads enumerated above are among those which seem to have promised most. "Hence these tears."

A good railroad, well placed, and honestly administered, in the United States, is a good property; and there are but few now built which could not pay a low rate of interest on their actual cost, if built to the best advantage by ready cash. Nor have we too many such railroads in the country. But of roads built largely, or wholly, on credit ruinously applied, we have not only too many; but we also have some aggravated specimens. The neglect of a few obvious requirements has brought this trouble upon our German friends, with whom we have a profound sympathy, notwithstanding their share of blame. There are good and bad men, and good and bad enterprises, in America, as there are also in Europe, (judging from the catalogue of native Bank and other corporations whose securities have depreciated); selection and discrimination are all-important here, as well as in Europe.

They have both kinds of our securities in Europe. We hear no complaint by the holders of the bonds of New York Central, Pennsylvania, Baltimore and Ohio, Philadelphia and Reading, Central Pacific, Chicago and Northwestern, Illinois Central, and several other corporations we might name, whose stocks and bonds are held in England and on the continent. These companies meet their engagements as they mature. But their securities were not offered in Europe to an amount approximating or exceeding, the value of their property; nor were they sold at 40 or 50 per cent discount. It would be absurd to expect foreigners to know as much of our industrial systems and of our corporations as is known at home; and for these reasons they should have more reliable guides in their investments than the banking agents who profit by the disposal of the bonds. Such an organization the gentlemen now with us may help to frame. In the

absence of independent, trustworthy, knowledge of the undertakings which solicit capital, there are a few rules which might save to keep foreign capitalists out of like trouble hereafter:

(1) The promoters and managers of the undertakings should be men of known business character and reputation; and not speculating adventurers.

(2) There should be a considerable portion of the whole estimated cost (not less than one-third) paid in or available in *bona fide* cash subscriptions to capital, or what is equivalent, that amount of property actually in productive existence, or in the shape of responsible guarantee.

(3) The bonded debt should not exceed the amount of unsecured capital—50 per cent of the total investment would be a fair limit.

(4) The bonds should have an honestly-acquired standing at home before they are taken abroad; or in the case of branch, endorsed or guaranteed bonds, then these remarks apply to the securities of the responsible company.

Having gotten into the difficulty, partly, as we think, by their own contributive negligence, the question remains: what is the best way out? The foreigners are apt to take the Shylock view of the situation and insist upon the fulfillment of the terms of the contract; they want the "pound of flesh" as nominated in the bond. This is the pawn-broking aspect of the cases. Strict equity and good business sense, while recognizing the claims of good faith, would consider these unfortunate bondholders as co investors with the still more unfortunate stockholders; or if the stock has not been paid for, then as special co-partners in railroad ventures. To foreclose the mortgages and take possession of the roads, in the greater number of defaulting companies, would not help the bondholders; but would hurt the other investors. Unless it can be shown that there has been grave moral delinquency, intentional cheating; or gross incompetency in the administration of the common property, we see no reason why the managers should be so punished. Their losses are grievous already. In most cases they can bring the roads out of debt and difficulty much sooner than the trustees, receivers, or lawyers authorized by the courts. Litigation can only retard the recovery.

True, there is a contract, and a solemn covenant in the bond; but is it wise, prudent or profitable, (to say nothing of fairness,) to keep the faith, if it kills the unfortunate debtor to do it? We think a better course will be hit upon, in most cases; and the affairs be adjusted upon some basis of compromise in accordance with the risks, losses, gains, and negligence of the several classes of creditors.

Finances of Louisiana.

The following extract from a letter to Mr. John B. Manning, of this city, from the Auditor of State of Louisiana, gives information which will be of interest to the creditors of that State:

In reply to your communication of the 8th inst., would say that the coupon enclosed falls due after the 1st January, 1874. The new consolidated bonds will be dated January 1, 1874, and will draw interest from that date; consequently no interest will be computed on the old bonds after that time. All coupons due on or before that date will be paid during the year in cash. Coupons partially due at that time will, I suppose, be added to the face of the new bonds.

The Funding act is now being carried out. The Board is organized, bonds are being prepared and preparations for the exchange going forward as rapidly as possible. Nothing will be given to represent the 40 per cent. of reduction; each exchange must be absolute and complete. The new bonds, however, and the law will be sufficient evidence of the transaction. The injunction against the $1,000,000 8 per cent levee bonds is still in force.

Consolidation Coal Company.

NEW YORK, February 18, 1874.

To the Stockholders:

The Board of Directors respectfully submit their annual report of the business and operations of the company for the year ending December 31, 1873:

The gross receipts from mines (including coal on hand) and from railroads, rents, etc., were		$3,300,709 28
Working expenses of mining, operating railroads, taxes, freight, salaries, legal expenses, etc		2,504,373 49
		$796,335 79

The expenses above stated ($2,504,373 49) are the ordinary operating expenses. In addition thereto, there have been paid out of the earnings of the year, for permanent improvement, new rolling stock, etc., the following sums:

Steel rail account—being cost of steel rails over and above iron rails removed	$42,620 00
New cars	16,650 00
Two locomotives and machinery for shops	37,988 68
Cost of new mine opened, also locomotives for mine, and 2¼ miles T-rails for underground transportation	18,000 00
Total	$115,268 63

There has also been paid from the year's earnings as follows:

Interest on funded debt	$200,864 95
Sinking fund (retiring $93,000 of mortgage debt)	76,760 00
	$277,624 95

SUMMARY.

Total receipts		$3,300,709 28
Total outlays and expenditures of every kind, exclusive of interest and sinking fund	$2,619,642 12	
Inter'st on funded debt	200,864 95	
Sinking fund	76,760 00	
		2,897,267 07
Net earnings of the year's business applicable to dividend		$403,442 21
The total debt of the company on its coal lands and railroads, January 1, 1873, was		$3,265,100 00
Convertible mortgage bonds, issued January and February, 1873, to complete payment for Bedford Branch Railroad and Allegheny property		11,000 00
		$3,276,100 00
Reduction by sinking fund during year 1873		93,000 00
Total debt January 1, 1874		$3,183,100 00

The report of the Board and special report of the President, presented at your last meeting, having given a full statement of the property owned by this company, both of mines and railroads, and of the means of transportation to market, it is only necessary now to state briefly the condition and prospects of your property at the close of the year which has just elapsed.

There were mined and delivered from the company's property in 1873, 548,484 tons; 1872, 504,132 tons, showing an increase of 44,352 tons.

The sales for the year would doubtless have been greater but for the financial panic which occurred in September last, thus affecting the business during the best months of the year. The falling off was more especially felt in the manufacturing interest, though the demand for steamship and railroad service was to a certain extent affected by this extraordinary crisis. Not only was the consumption diminished, but the price of all classes of coal throughout the country was for a time reduced.

The policy of the Board has been to proceed with the steady improvement of the mining property and the enlargement of its capacity, in order to keep pace with the growing demand for Cumberland coal. An important improvement suggested in the last annual report, viz., the substitution of locomotive for horse power at the Hoffman and Astor mines—has been fully carried out, thus dispensing with more than two miles of the Cumberland branch, which was made up of very heavy gradients and sharp curves. The small locomotive called the "Ant" now traverses a subterranean passage of two and a half miles, hauling from sixty to eighty tons of coal in its train. The promised saving by this improvement has been fully realized. Two of our most valuable mines are worked with these small locomotives, and in both instances with economical results.

A new mine has been opened during the year, which will, from this time forth, furnish its proportionate supply of coal. Some of the other mines have been enlarged, and it is safe to state that for the year 1874 the Consolidation Company's mines will have a capacity of 3,000 tons per day.

There will be no large or extraordinary expense required in the mining department during the coming year. In order, however, to secure and retain good miners (men of family), it will be necessary to erect fifteen or twenty small tenements at one of our principal mines, the total cost of which will be from twelve to fifteen thousand dollars. As these houses will yield a fair return in rent, the company will be fully reimbursed in interest on the outlay. By furnishing such tenements, skilled miners are secured, who become permanent residents of the region, while their sons, as they grow up, become the faithful employees of the company which has given steady work and comfortable homes to their parents.

The number of miles owned and worked by the Consolidation Company is as follows:

Cumberland and Pennsylvania Railroad, and branches to various mines	38
Eckhart to Cumberland Division	14
Branch to Pennsylvania State Line	3
Total	55

The tonnage of the Cumberland and Pennsylvania Railroad in 1873 was		2,243,659
In 1872		1,890,605
Increase		353,054
Tonnage of the Eckhart or Cumberland Division in 1873 was		226,473
In 1872		229,687
Decrease		3,214

During the year there were placed in the main road of steel rails 575 tons.
And in the branches and main line of iron rails 187 tons.

The ballasting has also been renewed and increased.

The policy of the Board, as suggested in the late annual report, has been to proceed in relaying the main road (over which such a heavy traffic passes) with steel rails, as its business and condition should require. The work done in this way during the yast year, as well as in draining and ballasting, has much improved the road, and,

though the tonnage has been largely increased, it remains at the close of the year in far better condition than twelve months previously. The testimony of all customers is that their business has been done with regularity and dispatch.

By pursuing the same policy, the main line will at the end of the year 1875 be completely laid with steel, when the net profits will be increased by the saving in wear and tear of rails and rolling stock.

In anticipation of the increased tonnage, two powerful locomotives were purchased last spring. In our own shops, twenty-one new iron coal cars were built, and ten platform cars reconstructed. Some valuable machinery was also added to the company's shops. These items, amounting to $56,500, have been charged to the expenses of the year. It will not be necessary, even with a considerable increase of tonnage, to add to the locomotives for the coming year, but a few additional cars may be required.

The fleet of canal boats belonging to the company, and plying upon the Chesapeake and Ohio Canal, has been kept in good condition, and has yielded a fair return to the company.

In regard to the extent of business for the coming year, it is not wise to make predictions. The effects of the panic are passing away, manufactures of various kinds are being gradually resumed, and the supply of the deficiency caused by a partial suspension of business for several months will probably call for a considerable quantity of our coal in this branch of trade upon the opening of navigation, while the demand for steamship and railroad purposes must increase with the growth of our foreign and inland commerce. It is the opinion of dealers in anthracite that the prices of that class of coal will be, at least, equal to those of 1873, which will tend to strengthen and uphold the price of Cumberland coal. The expenses of the company, as compared with last year (when large outlays for improvements were made), will be considerably reduced.

During the coming year, the Board will consider the propriety of establishing a retail department for the supply of New York and Brooklyn. All the great anthracite companies have adopted such a course with profitable results.

In this great city there are many persons who, from considerations of health, or the pleasure of a cheerful fire, burn bituminous coal in their dwellings and offices. English cannel costs $25 per ton, and Pennsylvania and Virginia coals $16 per ton. Cumberland lump and screened coal may be furnished (cartage included) at $10 per ton, the fine or small coal being sold at a lower price for smith's purposes, for which there is a large demand. By order of the Board of Directors.

ALLAN CAMPBELL, President.

STATEMENT OF ASSETS AND LIABILITIES, December 31, 1873.

ASSETS.

Mining property	$8,709,000 00
Cumberland and Pennsylvania Railroad and equipment	3,081,901 93
Cumberland Branch Railroad and equipment	730,526 00
Real estate and property at Eckhart	350,745 78
Machine shops and machinery	244,487 90
Dwellings at mines	115,045 00
Wharf property at Baltimore and Cumberland	189,153 00
Canal boats and barges	59,651 88

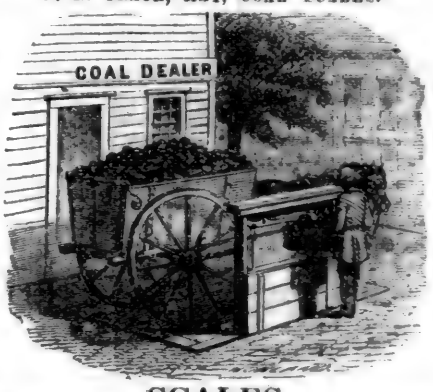
Taxes due and unpaid	30,000 00
Due State of Maryland for taxes collected and to be refunded	8,536 24
	$14,643,822 55

H. C. HICKS, Treasurer.

Junction and Breakwater Railroad.



The Baltimore *American* says that the purchase by the Philadelphia, Wilmington and Baltimore Railroad Company of a controlling interest in the Junction and Breakwater Railroad, previously announced in that paper, has received confirmation, and then adds:

The effect of this will undoubtedly be to give the former road the control of the entire railway system of the Peninsula. The Delaware Railroad and its branches are already controlled and operated by it. The Junction and Breakwater Road, with the Baltimore, Chesapeake and Delaware Bay Railroad, would have constituted an independent road across the Peninsula, and by steamship lines connecting it with New York on the east and with Baltimore on the west, would have formed an independent through route. The purchase, however, gives the Philadelphia, Wilmington and Baltimore Railroad the control of this road also, and as it would have been to some degree a competitor for through travel, it is presumable that it will endeavor to prevent the establishment of such a route. This would make the Baltimore, Chesapeake and Delaware Bay Railroad a local road extending from Harrington, in Delaware, to the Chesapeake Bay. The latter road is all under contract, and a strong force is at work upon it. The road will have steamboat connection with Baltimore and Annapolis, and will be a necessary and valuable railway connection; with the Junction and Breakwater it will be a pleasant and direct route to Rehoboth Beach and Cape May. If the establishment of a through route under one control should be deemed sufficiently desirable, the construction of about fifteen miles of road from Harrington due east to the Delaware Bay would make a shorter route than by the tortuous Junction and Breakwater Road.

The Junction and Breakwater Railroad is about 40 miles in length, extending from Lewes, on the Delaware Bay, to Harrington, on the Delaware Railroad—the latter being already operated under lease by the Philadelphia, Wilmington and Baltimore Railroad Company. The State of Delaware holds a first mortgage upon it of $400,000. The actual cost of its construction was about $530,000. The cost of the controlling interest in the road (something over 6,000 shares) is stated at $93,000. The business last year produced sufficient net earnings to meet the interest on the mortgage, and leave a small surplus, which was applied to paying off floating debts, the operations previously having resulted in a deficiency. It is represented that five miles of road, from Lewes to a new Summer resort at Rehoboth Beach, will be promptly extended by the lessees, making that place a popular resort. It has one of the finest beaches on the Atlantic coast.

Insurance		92 50
Depreciation of cars, furniture, etc.		5,018 08
Balance—profits		50,842 17
Total, as above		$692,724 67

Compared with the previous year the gross earnings of 1873 show an increase of $311,455 55, with an increase in expenses of $82,461 03—making the increase in net earnings $228,994 52. The president in his report says:

The present organization of the Southern Pacific Railroad Company was effected October 11, 1870, by the consolidation of the following companies, viz: The San Francisco and San Jose Railroad Company; The Southern Pacific Railroad Company; The Santa Clara and Pajaro Valley Railroad Company, and the California Southern Railroad Company, all of which had been duly incorporated under the laws of the State of California. By virtue of the consolidation, the new company succeeded to all the rights, privileges and franchises of the companies above named.

The object of the new corporation was to construct, equip, maintain and operate a line of railroad from the city of San Francisco to a point on the Colorado river, near the southeastern boundary of the State of California, a distance of seven hundred and twenty two miles, with a branch from Tehachapa pass to the Colorado river at or near Fort Mohave, a distance of say three hundred and eight miles, and such other branches as the board of directors may decide to establish.

PROGRESS OF CONSTRUCTION.

When the present company was organized, October 11, 1870, there were only eighty miles of road, extending from San Francisco to Gilroy, constructed and in operation.

Since that time the road has been extended from Gilroy to Solidad Crossing, sixty two and one half miles; also from Carnadero to Tres Pinos, eighteen and one quarter miles, and on the Visalia Division from Goshen to Delano, forty one and two tenths miles, making the whole number of miles now in operation two hundred and two and one half.

CONTRACT FOR BUILDING THE ROAD.

A contract was entered into with the Contract and Finance Company to construct and equip the whole line of road, for which they receive the mortgage bonds of the company at the rate of $40,000 per mile, and the balance of their pay in the capital stock of the company. Under this contract one hundred and twenty two and one half miles of road have already been built and equipped, and when the contract is fulfilled the company will have the road with the necessary sidings, rolling stock, depots, and machine shops, with no indebtedness except the mortgage bonds before mentioned, together with all the land granted by Congress free from any incumbrance.

EARNINGS AND OPERATING EXPENSES.

The earnings and operating expenses since the organization of the company have been as follows, viz:

Year.	Earnings.	Operating expenses.	Earnings over operating expenses.
1870 and '71, 9 months, Oct. 1, 1870, to June 30, 1871	$430,097 50	$222,427 06	$207,670 44
1871 and '72	723,856 01	376 278 11	347,577 90
1872 and '73	1,035,311 56	468,739 14	576,572 42

An examination of the above statement will show that while earnings have increased, the ratio of operating expenses to earnings has decreased, being 52 per cent in 1870 and '71, and only 44 3 10 per cent in 1872 and '73. The earnings for each mile of road have also steadily increased, as will appear from the following statement:

Year.	Earnings.	Average No. of miles.	Earnings per mile.
1870 and '71, 9 months, Oct. 1, '70, to June 30, '71	$430,097 50	80	$7,168 21
1871 and '72	723,856 01	100	7,238 56
1872 and '73	1,035,311 56	121½	8,521 08

and we have no doubt but that the earnings per mile will show a large increase as the road is extended through the fertile valleys lying south of its present terminus.

GRANTS FROM THE STATE OF CALIFORNIA AND THE CITY OF SAN FRANCISCO.

Your company has received from the State of California a grant of thirty acres of land, situated in what is known as Mission Bay, in the city of San Francisco, an equal amount having been granted to the Central Pacific Railroad Company. In the improvement of these sixty acres, the companies have jointly expended $352,224, which is all that can be satisfactorily expended until the streets and alleys are closed in part, and some additional land adjoining the grant is secured. This no doubt will be done in time for your company to make the necessary improvements to accommodate the vast business that must be brought to this point, for in this the interests of the city of San Francisco and of your company are identical.

The city of San Francisco has granted the company the right to extend its track down Fourth street to Louisiania street, and thence along the water front on that street to Eldorado street. This grant will secure the object so long desired, the bringing together of ship and car. This improvement is now being made, and when completed will do much towards accommodating the business of the road for the present year.

It will also largely increase the earnings of the road, as business which has hitherto been diverted to other routes will come through to San Francisco. Taking the single article of grain, there were diverted from your road during the last fiscal year, 54,213,602 pounds, which, had it been carried through to San Francisco, would have added largely to its earnings.

PROSPECTIVE BUSINESS OF THE ROAD.

There are several considerations that have an important bearing upon the prospective business of your road, which demands special notice:

First—The construction of the proposed railroad from Watsonville to Santa Cruz. This railroad will pass through the extensive red wood forests, and will afford a vast tonnage for your road, as the timber will find a ready market in large quantities in the Salinas and other valleys along the line.

Second—The towns and villages through which the Southern Pacific Railroad passes afford the most delightful as well as the most available suburban residence. San Jose, Santa Clara, Redwood City, Menlo Park, Belmont, and other places equally well located, with a climate that is unsurpassed, with the intelligence and refinement of their citizens, and their educational and religious advantages, afford great inducements to all who are seeking quiet and delightful residences within easy access of the city. Already many business men of San Francisco are finding a home beyond the city limits, and the steady and rapid increase of this suburban population guarantees to your road a large and profitable local business.

Third—The discovery of extensive deposits of coal in close proximity to the line of your road, which can be easily reached as the road is extended.

When we consider that coal from these deposits can be delivered in San Francisco over the low grades of your road at the minimum cost for transportation, and when we consider also the limited supply of coal on the Pacific coast from other sources, together with the fact that the road can supply itself with cheap fuel, and secure a large increase in its business in the transportation of coal for domestic and manufacturing purposes, the importance of this interest cannot well be over estimated.

Fourth—The general location of the Southern Pacific Railroad is peculiarly favorable for developing and controlling a large and remunerative miscellaneous business, for it occupies almost the only passes through which a railroad extending from San Francisco to the Colorado river can be built, and must therefore command the entire business between San Francisco and the southern portion of California, as well as Northern Mexico and Arizona. At the Colorado river it will meet the Texas and Pacific Railroad, which is being constructed with great rapidity; and when this connection is made, it will give your road a direct communication by rail with all the southern and southwestern portions of the United States, and the shortest line from San Francisco to New Orleans and the country bordering the Gulf of Mexico, over which you may look for much of the surplus grain for the southern half of California to pass on its way to the European market.

Fifth—The country tributary to your road embraces nearly one third of the entire state of California, say 50,000 square miles. In traversing this large extent of country the road passes through some of the finest valleys in California, such as the San Jose, Santa Clara, Pajaro, Salinas, Tulare and other large and fertile valleys south of

the Sierra Madre, in the counties of Los Angeles and San Bernardino. The soil in those valleys is exceedingly fertile, and produces all kinds of vegetables and grain of the temperate zones, and most of the fruits of semi-tropical regions, such as oranges, lemons, limes, olives, apricots, figs, etc., in great abundance. Recent experiments in the culture of tobacco, near Gilroy, where some four hundred acres were planted the past season, have shown that the soil in that part of the state is peculiarly adapted to that crop, the yield per acre being from 1,500 to 2,000 pounds of a superior quality, equal to the best Havana, and from 2,500 to 3,000 pounds per acre of the coarser varieties. Between four and five thousand acres will be planted next year, chiefly in the Salinas and Santa Clara valleys, and already a company composed of San Francisco capitalists has established an extensive tobacco and cigar manufactory in Gilroy, where they have begun to make chewing and smoking tobacco and cigars from the crop of 1873. Recent experiments have also demonstrated that jute, ramie and cotton can be grown in great abundance along the line of your road, for which the producer will always find a ready sale and remunerative prices, as these products will bear transportation, and thus have access to the world's markets.

Among the foot hills and on the slopes of the mountains are vast tracts of land abounding in wild oats and native grasses, which are very nutritious, and afford pasturage for sheep and cattle throughout the entire year; and the temperature is so mild, even in winter, that shelter is seldom required. Nearly all the land in the foot hills also produces the grape in great abundance, and much of it is considered the best vineland in the world, as it never fails to yield a crop. There are also immense tracts of timber land covered with red wood, red cedar, pine and other varieties, which will afford an extensive lumber business for the road; in short, the country traversed by and tributary to the Southern Pacific Railroad has almost every variety of land adapted to every branch of agriculture, with a mild and healthful climate, and is already attracting the attention of emigrants from the Eastern States, as well as from the nations of Europe, and is being rapidly taken up along the line of the road, and even in advance of its construction.

LAND GRANT OF THE UNITED STATES GOVERNMENT.

As before stated, the contract for building the road is such that it leaves to the company, unincumbered, all the lands granted by the Act of Congress except the right of way 200 feet wide through the public lands.

The length of the road upon which lands have been granted is, say, nine hundred and thirty-two miles. The grant embraces all unoccupied lands designated by odd-numbered sections for twenty miles on each side of the road; and when any of these odd-numbered sections have been reserved or otherwise disposed of, the company has the right to select a sufficient amount from the unappropriated lands between the twenty and thirty mile limits to make up the deficiency. From examinations made in the local land offices, it has been ascertained that there is a sufficient amount of vacant land between the twenty and thirty mile limits from which to select, in place of land settled upon, or reserved within the boundaries of the grant proper; it is therefore safe to say that the company will receive, upon the completion of the road, the full amount of land covered by the grant. The land agent of the company, after a careful examination and classification of the lands, places their value, at a low estimate, at $30,000,000; and it is with much satisfaction that you can contemplate the ownership of this immense property, especially when you consider that its value to yourselves and the country has nearly all been created by your own energy and perseverance.

Your board would recommend that the lands be sold to actual settlers, at low rates, according to location and quality, as soon as arrangements for their sale can be completed, as it will be much more advantageous to the company to sell their lands at low prices, and have them brought under cultivation at once, than to hold them, even though much higher prices could be realized after a few years.

The policy of the general government, in granting each alternate section of land to aid in the construction of railroad lines through those districts far removed from navigable waters, is fully justified by the rapid increase in the value of lands along the line of roads so constructed.

Before the Southern Pacific Railroad was built, land in some of the great valleys through which it runs was of very little value, and there was no market for it even at the minimum government price of $1.25 per acre; while now, with the road in operation, it is being rapidly taken up at the price fixed by the government, which is twice that charged for lands unaffected by these improvements, so that the government not only receives the same amount of money that it would have received if no grant had been made to the railroad company, but also has a market for its lands where there would have been none without the road. And this is not all; the construction of a line of railroad, with all the necessary fixtures and buildings, adds largely to the amount of taxable property in every township through which it passes, and thus tends to lighten taxation as people settle along the line of your road, principally on account of the business which it affords, and in consequence of these settlements, the value of the land is increased many fold.

With all these vast and varied interests awaiting the construction of your road, the villages and cities with their rapid increase of population, the fertile valleys with their great abundance and variety of agricultural resources, the forests with their wealth of lumber, the mines with their vast supplies of coal and untold millions of the precious metals, you may reasonably hope for satisfactory dividends on your investments when the road is completed.

We cannot, however, ignore the fact that at this time a spirit of hostility against property held in a corporate capacity is being aroused and stimulated among the people by a small portion of the newspaper press and a class of people who never seem happy unless they are disturbing some legitimate interests.

The claim advanced is virtually this, in the case of railroads, that having been built and paid for by one company of men, they should be controlled by another who have no interest in them whatever, except as a means of transportation for themselves and the products of their own industry. But ownership and control can no more be separated in the management of railroads than in the conduct of any other legitimate business.

A sense of justice, as well as the necessities of the case, establish the principle that ownership and control must go together. Railroad companies must have passengers and freight to transport, or their investment will be unremunerative; and the people along railroad lines must have easy and rapid transportation, or the products of their industry would be of little value. And we hope and believe that the time will soon come when property in railroads properly managed will be as safe from excessive taxation, unfriendly legislation and enormous awards for damages to persons and property, as though owned by private individuals, for, in the end, excessive charges imposed upon the roads must be paid by those who use them.

The companies that are employing their time, energy and capital in constructing, equipping and operating railroads, and the agriculturists and manufacturers, are naturally and of right should be allies and not antagonists. And this fact will be fully recognized and understood when the agrarian war cry against corporate property has given place to more correct views of the relation between labor and capital. That portion of your road now completed and in operation is earning more than sufficient to pay the interest on its bonded debt, and is increasing in value from month to month. Still, in view of the disturbed condition of financial affairs, and the fact that a portion of the people of California seem disposed to do all in their power to make this class of property unproductive and thereby depreciate securities based upon it, your board would recommend that the company go forward with the work of construction with great caution, practicing the most rigid economy in operating the completed portion of your road, acquiring all necessary grounds for depots, sidings, machine shops and other purposes, and thereby strengthening the credit of the company so as to give its securities a high standing in the great financial centres from which the capital necessary for the completion of the road must be drawn; and then, when the time comes, as it surely will, that capital invested in good railroad securities will be considered safe, this great work can be carried rapidly forward to completion.

At the close of the last financial year the company had 19 locomotives—including five added in the month of May previous. Twelve has been changed from wood to coal burners, and five equipped with pumps for the Westinghouse Air-Brake. The number and kind of cars on the road were as follows: 20 passenger, 1 passenger and baggage, 6 baggage, 3 smoking, 1 officers', 1 pay, 1 hunting, 188 box, 4 caboose, 15 stock, 90 flat, 12 dump, 1 boarding, 8 stone, 27 push, 1 water, 1 wood, 28 hand, and 1 flat car with pile driver and engine—making a total of 404, of which 122 had been added during the year. Ten cars had been equipped with the Miller Platform and Buffer, and 23 with the Westinghouse Air Brake. Miles run by locomotives, 460,254. Passengers carried southward, 168,462; do. northward, 162,013—total, 330,475, of which 5,403 were through and 325,072 way. Tons of freight carried southward, 62,583; do. northward, 120,077—total, 182,660. The track has been kept in excellent condition; and the rolling stock is all in good order.

BALANCE SHEET, June 30, 1873.

ASSETS.

Construction account	$9,265,982 77
Real estate	528,825 00
Land account	29,667 85
Equipment account	663,577 09
Building "	277,915 00
Machinery and tools	43,017 00
Material	70,461 01
Fuel	19,626 15
Office and station furniture, and telegraph instruments, &c	22,893 87
Balance of accounts outstanding, including $10,000,000 advanced to Contract and Finance Co., as per contract, and deducting obligations	9,198,421 34
Cash in hands of treasurer	204,655 09
	$20,311,042 17

LIABILITIES.

Capital stock	$12,210,200 00
First mortgage bonds	8,050,000 00
Profit and loss account	50,842 17
	$20,311,042 17

President.—C. P. HUNTINGTON.
Vice President.—D. D. COLTON.
Directors.—C. P. Huntington, Robert Robinson, S. T. Gage, D. D. Colton, Charles Mayne, E. H. Miller, Jr., J. L. Willcutt.
Treasurer.—F. H. MILLER, JR.
Secretary.—J. L. WILLCUTT.
Gen. Superintendent.—A. N. TOWNE.
Chief Engineer.—GEO. E. GRAY.

Bond Repudiators Again Beaten.

One Nicolay, having taken legal advice as to the value of certain bonds of the counties of St. Clair and Henry, Missouri, issued in aid of the Kansas City and Memphis Railway Company, knowing that they were disputed as illegal, but believing that they were collectable, bought a quantity of them and brought suit in the United States Circuit Court at Jefferson City. The St. Louis *Republican* continues:

The chief reliance of the defence was on the allegation that scheming speculators, relying on the aid of the counties through which it passed, had combined to build a railroad from Kansas City towards Memphis, Tenn.; that these speculators pretended to organize as in connection with the Tebo and Neosho Railroad, under the provisions of a charter previously granted to that company; that, without having obtained the indorsement of the people at a popular election, they assumed to act under the provisions of the act of March, 1868, concerning aid in building branch roads in this State; that the directors of the Tebo and Neosho Railway Company were aware of the facts and connived at the fraud; that the speculators mentioned obtained an order from the county court of Henry county in August, 1870, without the knowledge or consent of the Tebo and Neosho Company, subscribing 1,500 shares of $100 each in the stock of the Clinton and Memphis branch of the Tebo and Neosho Railway. To this statement of facts Mr. Nicolay, the holder of the bonds, demurred, claiming that the whole proceedings had been in conformity to law, and that there had been no illegality in the issue of the bonds. The county answered to the demurrer that the subscription was illegal and without effect; that the plaintiff had actual notice; that he was fully informed of the facts, and therefore had no just grounds for recovery. The court sustained the demurrer, and entered judgment against the county. This case is similar to a number of cases now pending in the courts, and will be made a test case and certified on appeal to the Supreme Court of the United States.

The amount of bonds issued by different counties in the State under similar circumstances reaches some seven or eight millions of dollars. The grounds upon which the court sustained the demurrer of the plaintiff seem to have been the constitutionality of the act of March, 1868, as decided by the State Supreme Court as final, and that under the law the subscription made by the county court was valid, and, of course, admitting all that the defense claimed, that the company was a fraudulent organization for purposes of speculation, that did not invalidate the fact that the bonds had been issued by the legal representatives of the county, in accordance with the then existing law, and so the court decided.

☞ The Boston *Journal* says that the gain in earnings of the Chicago, Burlington and Quincy Railroad for the first three weeks in April was $72,000, and about $100,000 per month this year over the receipts in 1873. The Burlington and Missouri River Railroad in Nebraska gains about 50 per cent over last year. The land sales the first four months of last year amounted to about $200,000; this year they are over $750,000. The Union Pacific Railroad is doing more business than for the corresponding month last year, but owing to the competition of the Pacific Mail Steamship Company the receipts for April will show some falling off. The contest for the terminus of the road between Omaha and Council Bluffs is still active and undecided. The company consider Omaha, where their workshops are established, as the terminus, but run their cars over the bridge for the accommodation of passengers.

Jay Cooke & Co's Creditors.

The creditors of Jay Cooke & Co. will be glad to learn that the most vigorous efforts are being made by the Trustee in charge of the assets, aided by the committee of creditors, to extricate the concern from the fog in which it has been environed, that each may see and comprehend the real situation. To this end the parties in interest held a meeting on the 7th instant, and authorized a dividend of five per cent, payable in cash, upon all claims proven before the Register, as soon as orders for the dividends have been made out, and sent to the creditors by Register Mason, which, it is supposed, will require some two or three weeks. So far so good, and is easily understood—covering, as the transaction does, only cash. But beyond this, at the same meeting, the Trustee was authorized by the committee to further settle with the creditors upon the following terms: Fifty per cent in the Northern Pacific 7-30 gold bonds, at seventy cents on the dollar; eighteen per cent in the Oregon Steam Navigation Company's stock, par $100, at forty cents on the dollar; seven per cent in first mortgage bonds of the Lake Superior and Mississippi and other railroad companies, at from seventy to seventy-five cents on the dollar, and ten per cent in the ten per cent income bonds of the Lake Superior and Mississippi Railroad Company, at forty cents on the dollar. This arrangement is voluntary, and may be accepted or declined as each creditor shall elect, but no one can receive any more than the above named percentage of any one of the securities. That is, as we understand it, any creditor may settle 50 per cent of his claim by accepting Northern Pacific bonds at 70, or 18 per cent of his claim in Oregon Steam Navigation bonds at 40 per cent, and so on of any other security on the terms stated. There is about 850 millions of securities, which divides up among all the creditors *pro rata* at the rate per cent named of each class. The party accepting leaves the same percentage of each security for such creditors as may choose to wait further developments, or until the final settlement. Under this operation the amount involved will be very materially narrowed, as it is already ascertained that many of the large creditors will accept, by which they will have at once their proportion of the assets to manage and dispose of as opportunities shall offer. It is proposed by the Trustees and committee to make a further cash dividend of ten per cent as soon as it can be realized from the remaining assets. Upon this being carried out the creditors will receive 15 per cent in cash and 85 per cent in securities at the rates given above. Creditors of small amounts, say of $200 or less, may avail themselves of all the advantages of the large creditor by several joining in amounts sufficiently large to bring them within the operation of the arrangement as regards the denomination of bonds, &c. This seems just and fair all round.—*Philadelphia Ledger.*

Michigan and Ohio Railroad.

Mr. James S. Gibbs, of Buffalo, President of the Michigan and Ohio Railroad, is in this city, accompanied by several directors, in the interest of a thoroughfare in which Columbus is deeply interested. It is proposed to construct the Michigan and Ohio railroad from Grand Haven, Michigan, to Portsmouth, Ohio, a distance of about four hundred and fifty miles, passing through Granville, Michigan, and passing through Bryan, Defiance, Bellefontaine, Lima, Marysville, Columbus, Circleville, Chillicothe, etc., and intersecting the Michigan Central, Michigan Southern and many other railroads. An engineer who had been over the route south of this arrived in the city on Saturday. Two corps of engineers are on the route in Northwestern Ohio; one was expected to arrive in Bryan Saturday night, and another is coming this way from Lima. Still another corps of engineers will be started from Columbus early this week to meet the Lima corps. For the present no detailed survey of the route between here and Portsmouth will be made, the route being sufficiently well understood from former surveys for present purposes.

The advantages of a railroad from Columbus to Portsmouth have been thoroughly discussed and are well understood. Direct communication with prominent points in Southern Ohio is a want much felt here, and it is conceded that we cannot have too much access to the coal and iron fields. Besides this the Michigan and Ohio road, if built, will open to us directly a part of Northwestern Ohio now only accessible by circuitous route, and will be a "straight shoot" for the great lumber regions. Muskegan and Grand Haven now manufacture about six hundred million feet of lumber annually; immediate connection with such a region is a matter deserving serious consideration. At Granville, thirty miles this side of Grand Haven, are located plaster beds said to be the most extensive in the world. Coal and iron ore one way, and lumber and plaster the other, would be an exchange that ought to insure profitable railroad business.—*Ohio State Journal, May* 11.

☞ The Atlantic and Great Western Shenango branch will be extended this season from Harrisville southeast through the new Butler oil district to Brady's Bend, on the Allegheny Valley road, passing through Petrolia and Martinsburg, twenty-seven miles.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
59 Liberty Street,
NEW YORK.

PHILIP G. SCHOFIELD,

(Successor to PETER SCHOFIELD,)
MANUFACTURER OF
STEAM VACUUM & HYDRAULIC
GAUGES,
AND
LOCOMOTIVE SPRING BALANCES,
Frankford Road & Seargeant St.
PHILADELPHIA.

RIEHLE BROS.,
650 North Ninth St., Philadelphia,
New York Store, 93 Liberty Street,
Pittsburg Store, 56 Wood Street.
LATEST IMPROVED STANDARD.

Our Patented Double Beam Iron Lever Rail Road Track Scale acknowledged the BEST.
MAKERS of the NEW TESTING MACHINE.

Duncan, Sherman & Co.,
BANKERS,
No. 11 Nassau Street,
NEW YORK.

Issue CIRCULAR NOTES and LETTERS OF CREDIT or TRAVELERS IN EUROPE, and available in all the principal cities; also for use in the United States, West Indies, &c. Also TELEGRAPHIC TRANSFERS to LONDON, PARIS and CALIFORNIA.

Accounts of Country BANKS and BANKERS received on favorable terms.
